

Core i5 laptop chips stand out

There is a strong configuration with Core i5 chips, but the slim and light design is notable for these models.

There is a strong configuration with Core i5 chips, but the slim and light design is notable for these models.

With a range of VND 15 million, consumers can choose a laptop using a new Core i5 chip. If you add a bit, you can buy a machine with discrete graphics, ATI and Nvidia, to support the graphics and gaming work very well. The advantage of a laptop using Core i5 chip is a high configuration but a slim, compact and lightweight design.

1. Asus A42F (VND 14.9 million)

Asus A42F. (Photo: Laptopspec) .

Asus A42F is designed to look impressively with floral patterns.

This device is equipped with Palm-Proof technology, so users don't have to worry if they touch the touchpad because Palm-Proof will recognize the palm, so the touchpad will not work.

ASUS A42F is supported and accelerated by Power 4 Gear technology, adjusting the fan speed in different operating environments, while saving power up to 4 hours with 6 cell battery, 45 "improvement Compared to the same product segments, the keyboard feels comfortable, moderate bouncing, does not create a lot of sound when

typing. In addition, it is okay to pour water into the keyboard because of the overflow technology. Disables water on the keyboard.

A42F owns Core i5 350M chip 2.73 Ghz 3MB cache, 2GB RAM, 320GB SATA hard drive, 5400rpm. 14-inch screen supports resolution (1,366 x 768 pixels), LED backlight, Onboard Integrated Intel GMA HD graphics card.

2. Asus A42J i5-520M (VND 16 million)

Asus A42J has HD resolution LED screen.

Asus A42J i5-520M is elegant with a lightweight design. The LCD screen of the device is covered with a diamond-shaped checkered design and a bright shiny layer, an elegant mouse button.

The device comes with a discrete graphics card, the latest generation ATI Mobility HD 5170 with 1GB of "memory" for maximum graphics quality and a new generation Core i5 CPU and Palm-Proof technology. Laptop performance is also improved by 20% thanks to TurboBoost technology. Asus uses the Intel Calpella platform - Core i5 processor that operates on Asus motherboards, making the A42J improve performance many times over older products.

HD resolution LED screen is cared with sunken-hinge technology, improves viewing angle according to each owner's status or lighting conditions of the environment.

The A42J is equipped with an Intel Core i5 520M 2.4Ghz chip, 2GB DDR3 memory, 250GB hard drive, 14-inch screen, Altec Lansing 2.1 speaker.

3. Dell Inspiron 1564 (VND 17 million)

Colorful Dell Inspiron 1564. (Photo: Dealgiant) .

The device is designed in a simple way and is somewhat similar to Dell's Dell Studio series. The case is made of glossy plastic but the quality is good, only scratches during use. The connection ports have been fully pushed by Dell to the sides of the device, making it quite convenient to use.

The design of the keyboard with the multimedia key system makes it difficult for new users. The touchpad is covered with a rough layer that makes the mouse feel very good. Two mouse buttons are very soft but slightly deep.

The device is equipped with Intel Core i5-430M chip, 2.26 GHz, 2GB DDR3 memory, 320GB hard drive, discrete graphics card ATI Radeon HD4330 512MB, 15.6 inch screen with maximum resolution of 1,366 x 768 pixel.

4. HP Probook 4420S-WQ945PA (VND 17.6 million)

HP Probook 4420S loyal to two classic colors. (*Photo: Smart-parts*) .

HP ProBook faithful to classic black Caviar and red Bordeaux. It owns a typical chiclet keyboard of the ProBook series with standard size. The bounce of the keys is good for real feeling, not mistakenly manipulated and especially easy to get used to. HP ProBook 4420s is equipped with a multi-touch touchpad for good sensitivity both in normal use and multi-point.

This device has hardware configuration Intel Core i5-430M processor 2.26 GHz 3MB L3 cache, Intel HM57 Express chipset, DDR3 2GB 1333 MHz RAM memory Intel GMA HD graphics chip, 320GB hard drive speed 7200 rpm and optical drive read and write DVD.

5. Dell Studio 1458-9GKMV2 (VND 19.9 million)

Dell Studio 1458 has traditional black tones.

Dell Studio 1458 is designed with sophistication and elegance with traditional black tones. Machine with Intel Core i5 processor 430M with 2.26 GHz speed, 4GB memory, 1333Mhz, 320GB hard drive.

Combined with 14-inch WXGA WLED HD screen TrueLife display technology, supports ATI Mobility Radeon HD 4530 video card, maximum resolution of 1,366 x 768 pixels.

The device weighs about 2.38 kg and has two 6-cell or 9-cell battery options, so the Dell Studio 14 battery standby time can be up to 8 hours.

6. Dell Studio 1558-6WGX5 (VND 22 million)

Dell Studio 1558 has 6-cell and 9-cell battery options. *(Photo: Laptopspirit)* .

Dell Studio 1558 carries an optional Intel Core i5 processor, 4GB memory, 1333Mhz, 320GB hard drive. In addition, 2.0 Megapixel camera, Bluetooth, Wi-Fi and 3G support maximum support for online video conversations.

More specifically, Dell Studio 1558 also supports Dell's Touch Suite multi-touch technology, which is applied to many utility software such as Dell Touch Zone, You Paint, Touchcam (for webcam) to help maximize interaction with prizes. The program needs graphics.

The design of Dell Studio 1558 is creative with brilliant colors. Weight is about 2.5 kg and there are 2 options of 6 cell or 9 cell battery for Dell Studio 15 standby time up to 8 hours.

7. Toshiba Satellite E200-D430 (VND 25.1 million)

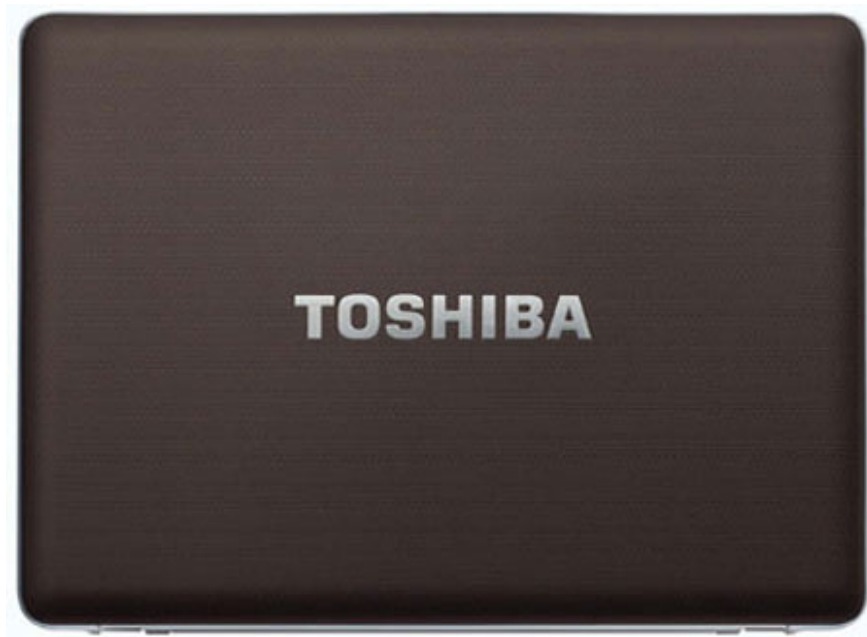

Toshiba Satellite E200 is suitable for women.

Toshiba Satellite E200 is a laptop that is highly portable with a light weight, only about 2.24 kg, although the screen is up to 14 inches and easy to carry. In addition, the machine also makes an impression thanks to a fancy design and good hardware configuration.

Toshiba Satellite E200 owns 14-inch LED backlight screen with resolution of 1,366 x 768 pixels with WXGA standard, 16: 9 ratio. The test version is configured with 2.4 GHz Intel Core i5-520m processor, 4GB DDR3 RAM memory, NVIDIA GeForce G310M graphics card with 512MB VRAM, 500GB hard drive and read / optical drive Burn DVD with LabelFlash disc label printing technology.

Most impressive at Toshiba Satellite E200 is design. This model possesses elegant curves at all edges suitable for female users. The connecting edge of the large black plastic rear is also the place to connect the ports.

8. Toshiba Portege M900-D338 (VND 25.1 million)

M900 has multi-touch mouse. *(Photo: Techypermart)* .

This machine is compact, but luxurious. The power it possesses is also remarkable: Intel Core i5-520M CPU (2.4 Ghz - 3MB Smart Cache), 4GB DDR3, a SATAII 500GB hard drive, Geforce 310M discrete graphics card with 512MB DDR3 memory.

M900-D338 is equipped with multi-touch mouse, the cover protects the hard drive from physical bumps, power saving features.

9. Sony Vaio VPCS117GG / B (VND 30 million)

Sony Vaio VPCS117GG / B 13.3 inch screen. (*Photo: Laptoppricesinindia*).

This Vaio is a black shell with a mysterious image, a keyboard with a backlight.

The device is equipped with Intel Core i5-520M 2.40 GHz chip that can raise the frequency to 2.93 GHz, HDD (500GB), preinstalled with original Windows 7 Professional (64-bit) operating system.

The screen has a size of 13.3 inches with a maximum resolution of 1366 x 768 WXGA using VAIO Display technology, LED backlight. It is equipped with NVIDIA GeForce 310M GPU graphics processor with CUDA technology.

If including the battery, the Sony Vaio VPCS117GG / B weighs 2 kg.

10. Sony Vaio VPCF115FG (VND 30 million)

Sony Vaio VPCF115FG screen 16.4 inches. (*Photo: Sony-asia*).

Built-in 2.4GHz Intel Core i5-520M processor can raise frequency to 2.93 GHz with the latest TurboBoost and NVIDIA GeForce 310M graphics processors to ensure speed and performance.

Large 16.4-inch LCD screen with maximum resolution of WXGA 1,600 x 900 pixels gives vivid images with high contrast. The box has a matte black veil above it for a traditional look.

The device is pre-installed with the original Windows 7 Home Premium (64-bit) operating system. The hard drive has a capacity of 500GB and is equipped with advanced connections such as eSATA / USB port, HDMI output.
