

CQ35 - the breakthrough of the Presario series

With a size of 13.3 ", the screen displays 16: 9 standard instead of 16:10 as on CQ45, this is a laptop worth noting for movie fans.

Compaq Presario CQ35 is a combination of CQ20 mobility with CQ45 performance.

With a size of 13.3 ", the screen displays 16: 9 standard instead of 16:10 as on CQ45, this is a laptop worth noting for movie fans. In addition, CQ35 is also integrated LED system, making the display brighter, more honest and lively. Altec Lansing loudspeakers bring vitality to action movies or rich color sound clips.

In order to increase connectivity and data transmission, the CQ35 is integrated with eSATA communication interface, with speeds 5 times higher than USB 2.0 and is fully backward compatible with traditional USB 2.0 protocols. This allows high-speed communication with peripheral devices such as portable hard drives, external optical drives . CQ35 is also equipped with HDMI ports to connect to high-end LCDs.

CQ35 has a configuration that extends from Pentium Dual Core CPUs to higher-end CPUs such as Core 2 Duo and Montevina platforms (Centrino 2). Graphics card is GMA onboard 4500 MHD on the latest Intel GM45 chipset - the latest of Intel. HP ProtectSmart technology has the ability to automatically lock the hard drive in case of loss of data when the owner accidentally drops or bumps.
