

Create a free iTunes account without a credit card

Because of copyright issues, Apple has limited the registration of iTunes accounts by strict rules and regulations. But the biggest problem that users in Vietnam face is probably Apple requires credit card information to own an iTunes account. While credit cards are still something too expensive and not really popular, this is a big problem for the majority of iFan in Vietnam.

In this article, we will show you how to create your own iTunes account without using a credit card.

Because of copyright issues, Apple has limited the registration of iTunes accounts by strict rules and regulations. But the biggest problem that users in Vietnam face is probably Apple requires credit card information to own an iTunes account. While credit cards are still something too expensive and not really popular, this is a big problem for the majority of iFan in Vietnam.

However, do not hurry so give up. Please refer to the article below to learn how to create and own your own iTunes account without any credit card information. In particular, iTunes accounts created with this method will be used exclusively for the US AppStore, meaning you can download and update all the hot software there.

1. For those who already have an iTunes account but cannot use it with the US AppStore

If you already have an iTunes account but can only use it with the AppStore in Vietnam, for some reason you want to switch to the American Appstore, the problem is not difficult at all.

First, of course, you must log into your iTunes account to start the conversion steps. Open iTunes, click on **Apple ID** on the right corner of the screen, then select **Account** .

Fill in your ID and password.

Scroll down, in the **Account Information** section, you will see the **Change Country or Religion** box .

Next, select the country that is **US** in the newly **scrolled** table and select **Continue** .

So you have finished converting your iTunes account to the US AppStore without any difficulties. Next is a guide to creating a completely new account.

2. For those who want to create a separate iTunes account for the US Appstore

To create an iTunes account with an American AppStore, as mentioned in the introduction, the most difficult step is the credit card information. But if you can't go straight, we will take a detour and skip that step easily.

The first thing you need to do is find any free application on the AppStore app store. The fastest way is to select the **Free Apps** section on the right of the iTunes interface.

When you find the application, click on the **Free** button to download it to your computer. In this step, iTunes will ask us to log in to the account to get the download process started.

Remember to choose **Create New Account** at the interface that appears.

Next, fill in the email address and password parameters in the box.

Provide Apple ID Details

Email: This will be your new Apple ID.

Password: Passwords must be at least 8 characters long, contain an uppercase letter, a lowercase letter, a number, and a space, the same character 3 times in a row, or a password you've used in the last year.

Verify: Retype your password to verify

Notice, at the credit card section, there will be an additional payment method, **None** - nothing. This method only appears when you download a free application, but if you start creating an account right away and skip this step, then surely you will not be able to see it.

Provide a Payment Method

If you provide a payment method now, you will not be charged until you make a purchase. If you select None, you will be asked to provide a payment method when you make your first purchase.

If your billing address is not in the United States, click here. [↻](#)

Credit Card:      **None**

Note: Only when downloading a free app or game will this take effect. Also, if you download anything else, videos, songs, e-books, this will be void.

In fact, this approach is not only used to create iTunes accounts with the American Appstore, but also to create any AppStore you want. The final step is also a difficult step, which is to fill in information about the user. You will need a real address in the US to complete this step. We will guide you in a great way to overcome this barrier.

Visit Fake Name Generator website. As its name suggests, this website specializes in providing addresses, names, even blood types, careers from many people in about 20 countries around the world. There will be an article detailing how to use Fake Name Generator later, and now we continue the main work.

In the main interface of the website, you will see there are 3 options: **Gender** - gender, **Name set** - name, and **Country** - country. In the **Gender** and **Name set** fields, you can freely adjust, but in **Country**, select **American** to get an address in the US.

Your Randomly Generated Identity

Gender: Male
 Name set: American
 Country: United States

These name sets apply to this country:
American, Hispanic
