Create Image GIF

[Create animated images using Bloggif.com](#)

The *Bloggif.com* website interface offers several tools that allow you to create animated images:

- **Animated text:** Create animated text.
- **GIF Slideshow:** Create a slideshow of images with transition effects.
- **GIF effect:** Creates animation effects for static images.
- **3D Cube:** Create a cube containing five images that can rotate in 3D space.
- **Glitter:** Creates a dynamic background for photos.
- **Glitter Frame:** Creates an animated frame for photos.
- **GIF video:** Convert video into an animated GIF.
- **Animated smiley:** Adds animated icons to photos.

This article will guide you on how to use animated text to create animations.

Step 1 : On the website interface, click on Animated text. A new page will then appear:

- **Your text:** Enter the text you want to animate.
- **Choose an effect:** Select an animation effect for the text
- **Font:** Choose a font

The screenshot shows the 'Create a text GIF' interface. The 'Your text' field contains 'Betdownload'. The 'Choose an effect' dropdown is set to a red starburst effect. The 'Font' dropdown is set to 'party s'. Below these fields is a link for 'More options...' and a green button labeled 'Create my text GIF'.

Step 2 : You can set additional advanced parameters in the **More options...** section , including:

- **Text Size :** Font size, **Background color :** Background color, **Text alignment :** Alignment (center, right, left),

After setting everything up, click " **Create my text GIF**" to start creating the GIF animation.

The screenshot shows the 'More options...' section of the 'Create a text GIF' interface. The 'Your text' field still contains 'Betdownload'. The 'Choose an effect' dropdown is set to a red starburst effect. The 'Font' dropdown is set to 'party s'. The 'Text Size' is set to 50 px (Max : 150 px). The 'Background color' is set to white. The 'Outline color' is set to 000000 with a Thickness of 2 px. The 'Shadow Color' is set to 000000 with a Thickness of 1 px. The 'Turn the text' is set to 0 (degrees -360 to +360). The 'Text alignment' is set to center. A green button labeled 'Create my text GIF' is highlighted with a red border.

Step 3 : Right-click on the text you just created and select " **Save Picture As.** " to save it as an animated image.

Result of your text GIF

Betdownload

Taimienphi.vn

Right click on the text and then **Save Picture As ...**

And here are the results:

Betdownload
