

Create cute drawings from photos using AI.

Discover how to use ChatGPT AI to transform photos into adorable drawings in just a few simple steps. Detailed instructions with images.

Have you ever wished you could draw a cartoon portrait or a cute colored pencil drawing from your cherished photos? Previously, this required sophisticated drawing skills or complex graphic design software. But by 2026, with the explosion of Artificial Intelligence (AI), especially ChatGPT , creating personalized, unique works of art has never been easier or more enjoyable.

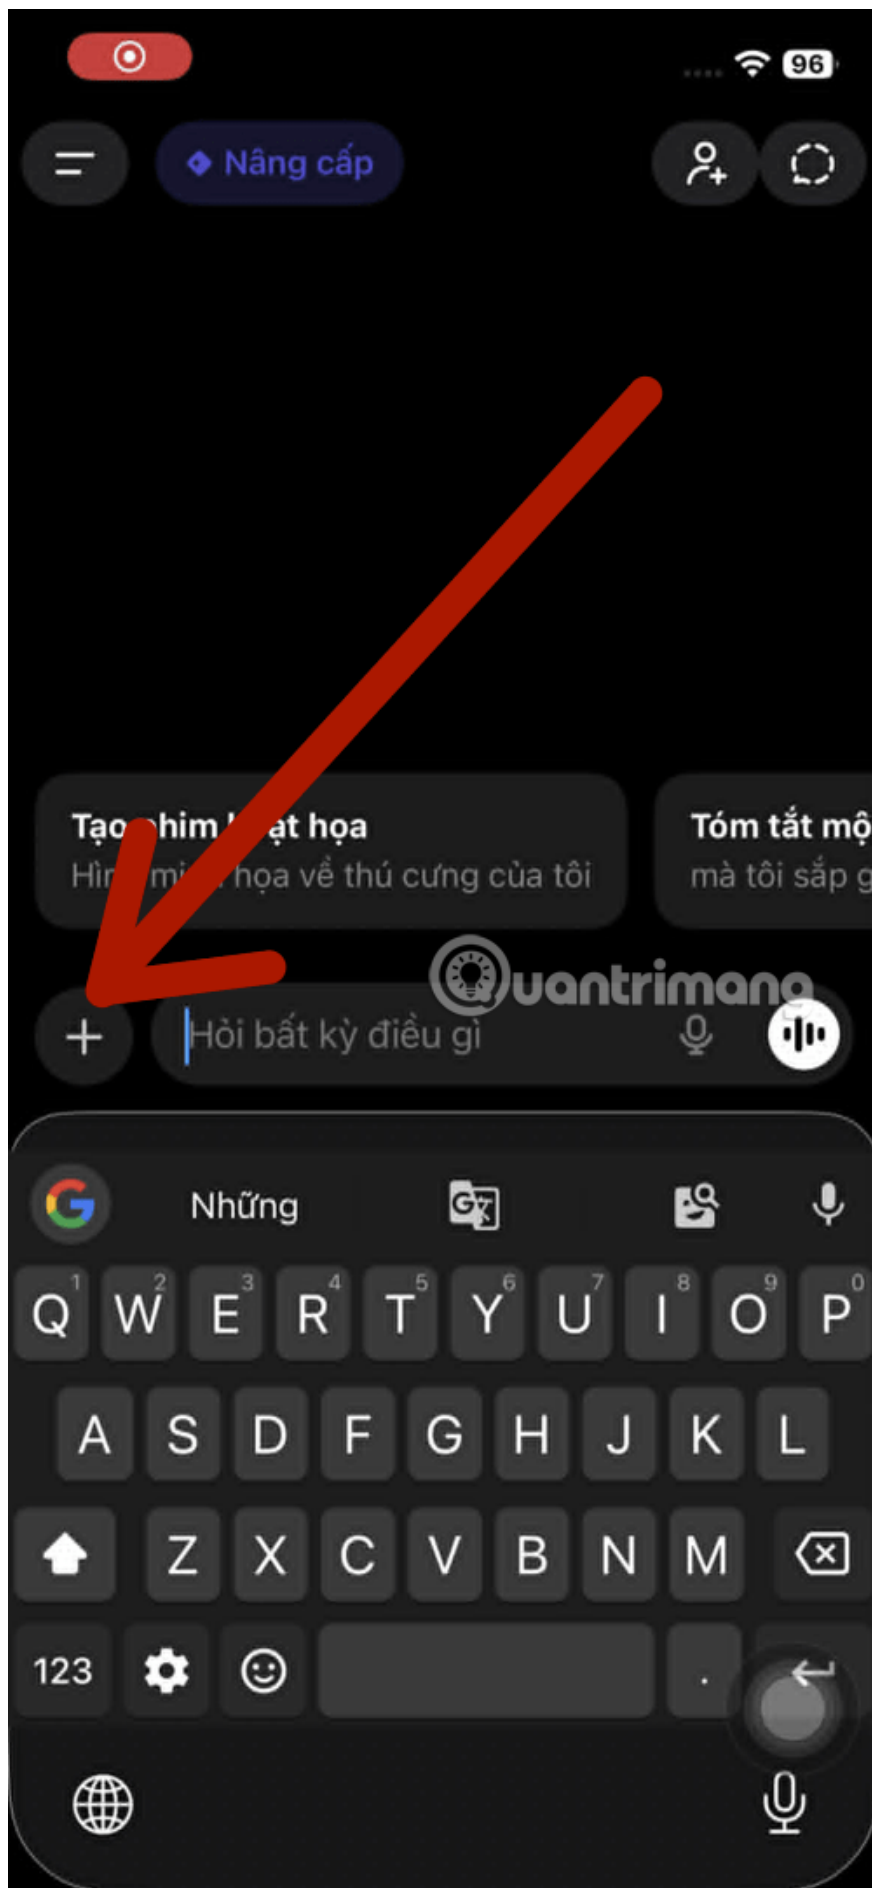

This article will guide you through a simple 6-step process to transform any photo into a cute, personalized drawing using the ChatGPT AI app on your phone. Let's explore this limitless creative power!

Instructions on how to create cute drawings from photos using ChatGPT

Step 1: Initiate a new chat session and attach files.

First, open the ChatGPT app on your phone. Make sure you are using the version that has the image creation feature.

On the main chat interface, look at the bottom left corner of the input bar. Click the plus icon to open the attachment options menu. This is the first step in uploading your image to the AI ??system.

Step 2: Select a source image from the library.

After pressing the plus button, a popup menu will appear at the bottom of the screen. This menu allows you to select the type of attachment.

1. **Options:** You will see icons such as Camera (Take a photo directly), Image (Select from gallery), "Create image" (This option is usually used to create from text-to-image directly, but here we will use image-to-image), etc.
2. Tap the "Images" or "All Photos" icon to access your phone's photo library. Then, **select the photo you want to turn into a drawing** .

Step 3: Confirm the uploaded image

After selecting an image from your library, you will be taken back to the chat interface. At this point, you will see a thumbnail preview of your chosen image appear above the input bar.

1. **Action:** Double-check that this is the correct image you want to use. If it is, the image has been uploaded and is ready.

Step 4: Prompt to create a cute-style image.

This is the most crucial step that determines the final result. ChatGPT AI needs specific instructions on *how* it should redraw the image.

The ChatGPT application itself can automatically fill in prompts ("Autofill"), but for the most accurate and "cute" results, you should write the commands yourself.

1. **Action:** Click on the "Ask anything" input bar and begin typing your prompt .

Tips for creating a perfect 2026 prompt for cute photos:

Chuyên về hình ảnh nhân vật thành một bức phác thảo chì màu quy chuẩn, ngây thơ trên giấy vẽ có kết cấu, phong cách minh họa sách thiếu nhi. Nét chì mềm áp, rõ ràng. Chủ thể trung tâm. Thêm các yếu tố xung quanh theo phong cách hoạt hình dễ thương: một trái nhân cách hóa đáng yêu với má hồng ở góc trên bên trái, trái tim và ngôi sao bay lơ lửng, kẹo ngọt và hình vẽ kẹo mút trên cửa. Thay thế cây chỉ tiệt trùng thông xanh nhân giấm, dây kẹo. Màu pastel và màu sáng, vui tươi. Tâm trạng tươi sáng như mơ, kẹo ngọt và trẻ con. Không thực tế. Kết cấu nghệ thuật bút chì sáp chất lượng cao.

Please write your own prompt based on the above idea.

Step 5: Wait for ChatGPT to generate the image.

After composing your prompt, press the submit button (arrow icon). ChatGPT AI will then begin analyzing the image and combining it with your prompt.

Share: Click the "Share" button to send your artwork to social media or to your friends.

Modification: If you're not completely satisfied, you can enter a new prompt directly in that chat session to ask the AI ??to make adjustments (e.g., "Make the blush darker," "Add more candy").

5 tips to help you get the clearest picture.

1. **Clear Source Image:** Use a high-quality, well-lit original photograph. Avoid blurry images or those that obscure faces.
2. **The more detailed the prompt, the better:** Don't just write "Draw cute pictures." Specify the style (cartoon, chibi), colors (pastel), and decorative elements (hearts, candy). The prompt in Figure 3 is a perfect example.
3. **Focus on Emotions:** Use words that describe emotions such as "warm," "cheerful," "radiant," "chubby," and "rosy cheeks."
4. **Experiment with Different Styles:** Besides children's illustration style, you can try "anime cute style", "felt art style" (felt paintings), "polymer clay art" (clay paintings), etc.
5. **Continuous Refinement:** If the initial result isn't perfect, write more prompts to make adjustments. The AI ??will learn from these requests to improve the result.

Conclude

With the help of ChatGPT AI, creating cute and unique drawings from your photos has become a reality, right at your fingertips. The simple 6-step process guided in this article will be the key to unlocking the door to personalized artistic creativity for anyone, regardless of their painting skill level.
