

# Create shortcuts for front and back cameras on Galaxy S9

Maybe you don't know, on the super product Galaxy S9 has an extremely useful shortcut that helps you directly open the rear or front camera quickly.

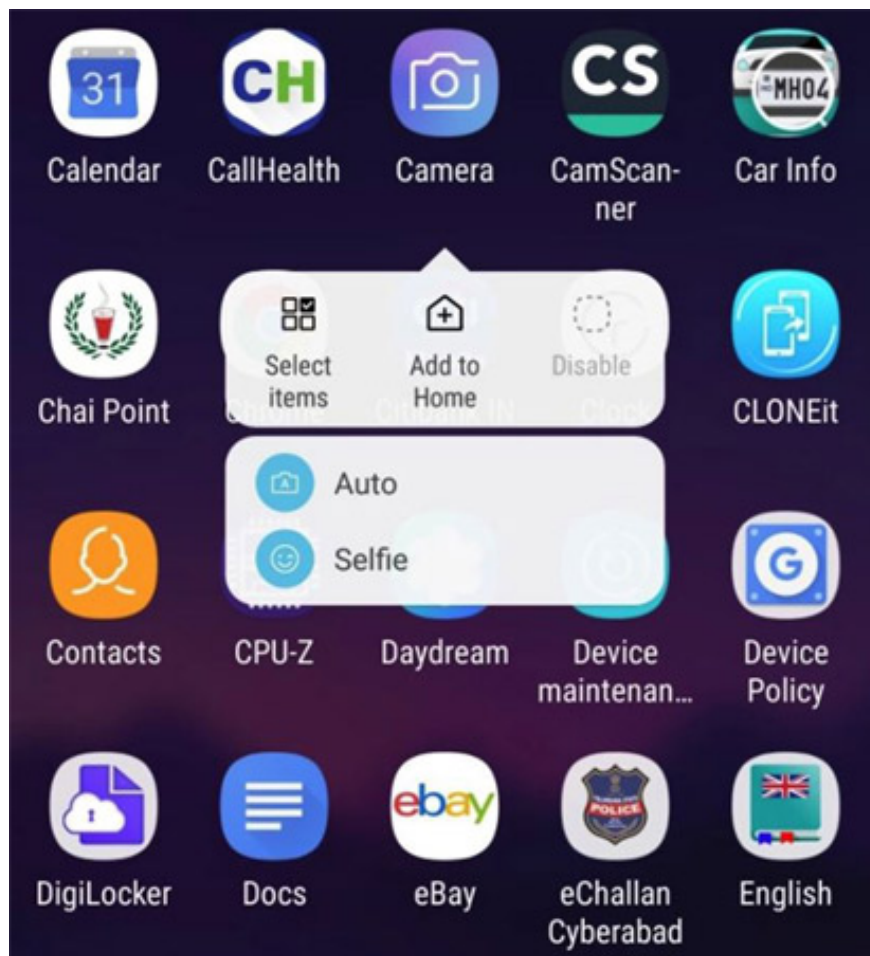

Maybe you don't know, on the super product Galaxy S9 has an extremely useful shortcut that helps you directly open the rear or front camera quickly. This is especially effective in case you want to take lots of photos and don't want to miss a moment. And the following, Network Administrator will guide you to create camera shortcuts on Galaxy S9 screen.

1. How to adjust the colors displayed on Galaxy S9
2. Enable Dolby Atmos on Galaxy S9 to experience extreme sound
3. How to create slow-motion video with Super Slow Motion on Galaxy S9

## Instructions for creating camera shortcuts on the Galaxy S9 phone screen

### Step 1:

On the Galaxy S9 phone screen, press and hold the camera application until it appears a new interface (do not open it). Now, as you can see, the 2 options in the picture below are *Auto* and *Selfie*. These are 2 available shortcut keys that Galaxy S9 provides to users.

## Step 2:

Create shortcuts for the rear camera on Galaxy S9 by holding down *Auto*, then drag and drop it anywhere on the home screen you want.

Similarly, to get a shortcut for the front camera on Galaxy S9, click on *Selfie*, then drag and drop it to the position you want it to appear.

So, with a few simple steps like above, you can easily create a shortcut for both the rear and front cameras on the Galaxy S9. Now, whenever you need to take a picture, use this shortcut to quickly access the cameras. Hopefully, this feature will also be updated for other Android devices in the future.

I wish you all success!
