

Create shortcuts for Window applications

Create shortcuts to open software applications or folders faster.

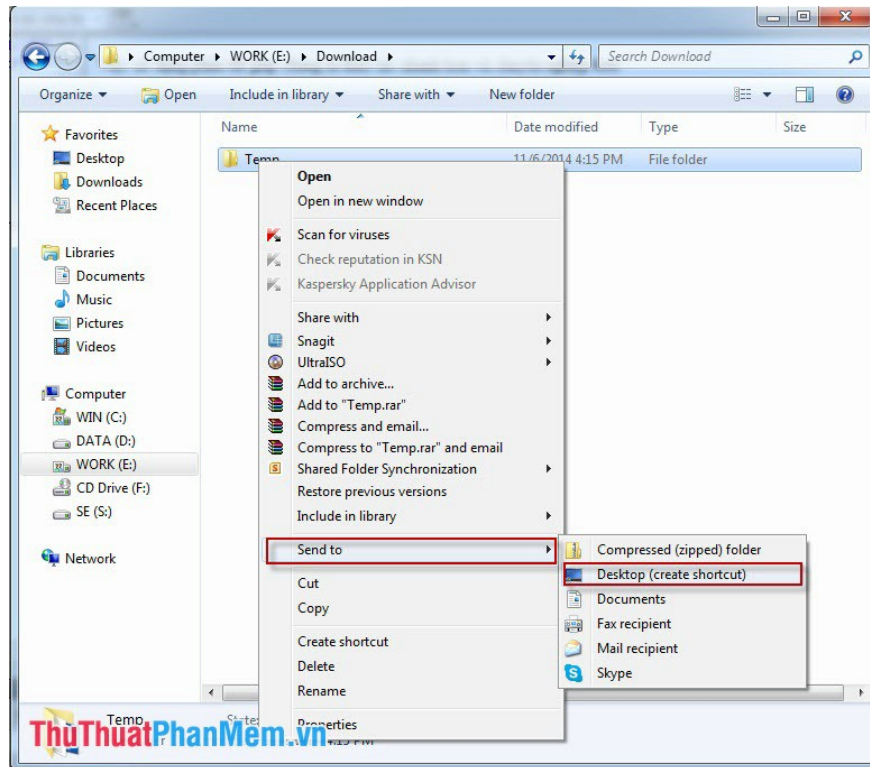

Shortcuts help save time and increase productivity so that almost all programs such as Microsoft Office, Paint, Photoshop . use shortcuts. We often have to open programs or folders in the computer so why don't we create shortcuts for it to use those programs faster, save time, and show expertise our karma.

This article shows you how to create keyboard shortcuts for Windows applications

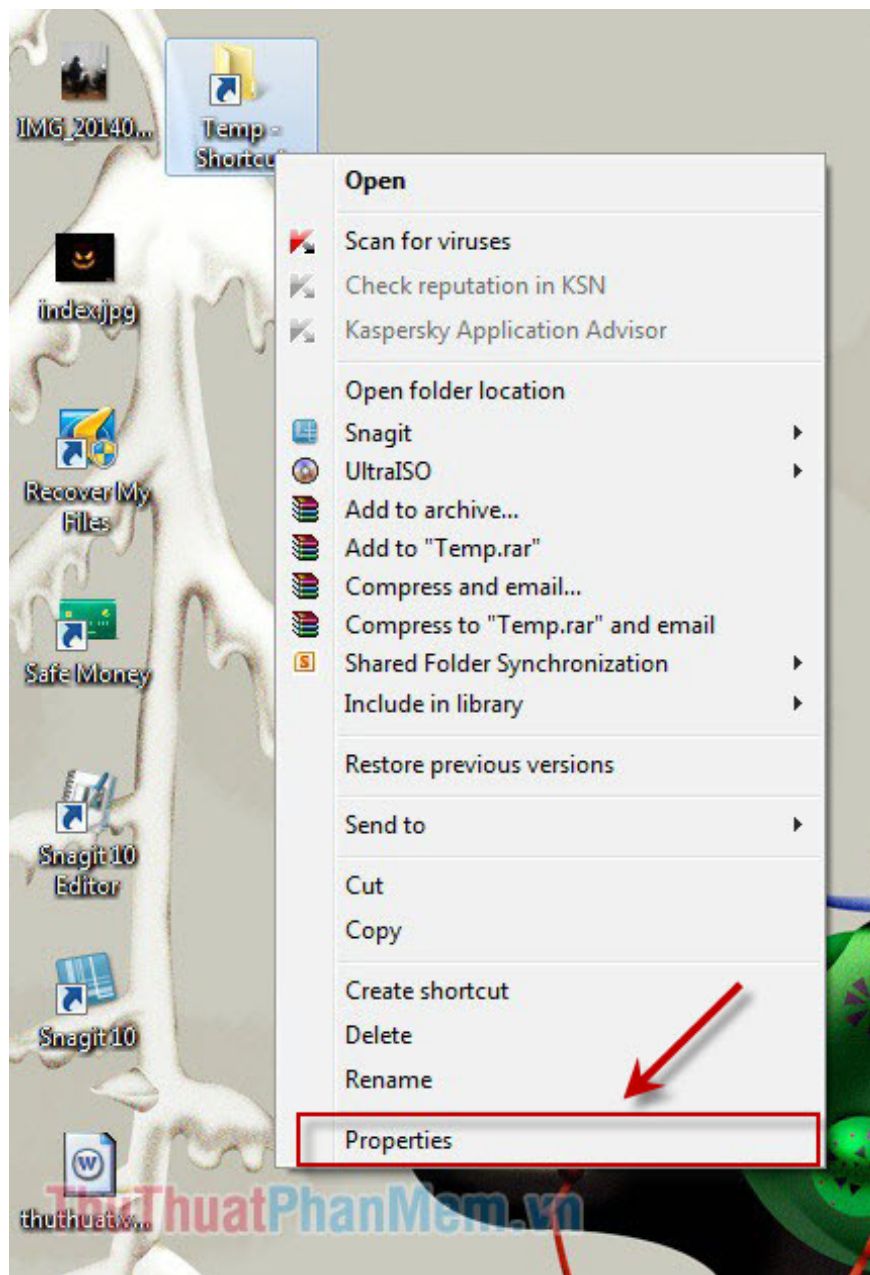

1. For folders in computer

Step 1 : Create a shortcut for the folder

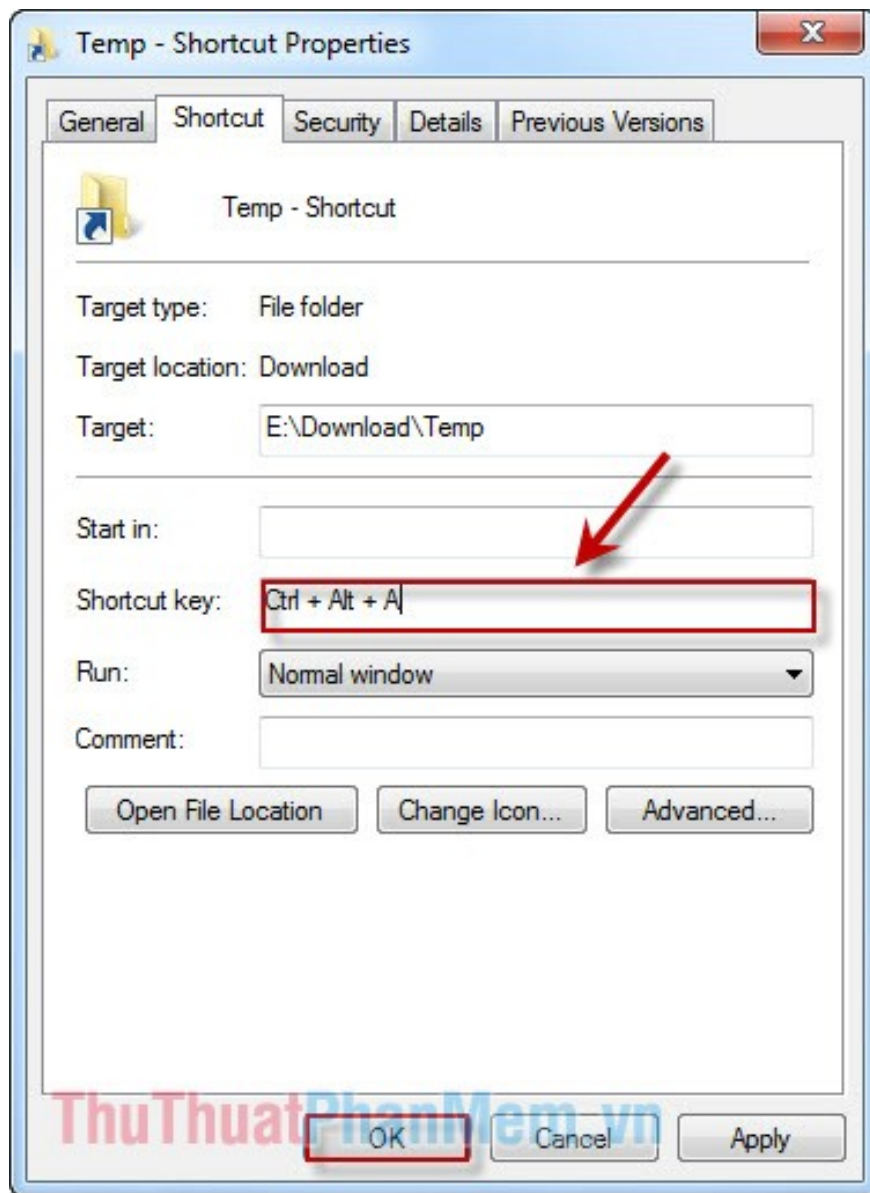

Step 2 : Set up keyboard shortcuts

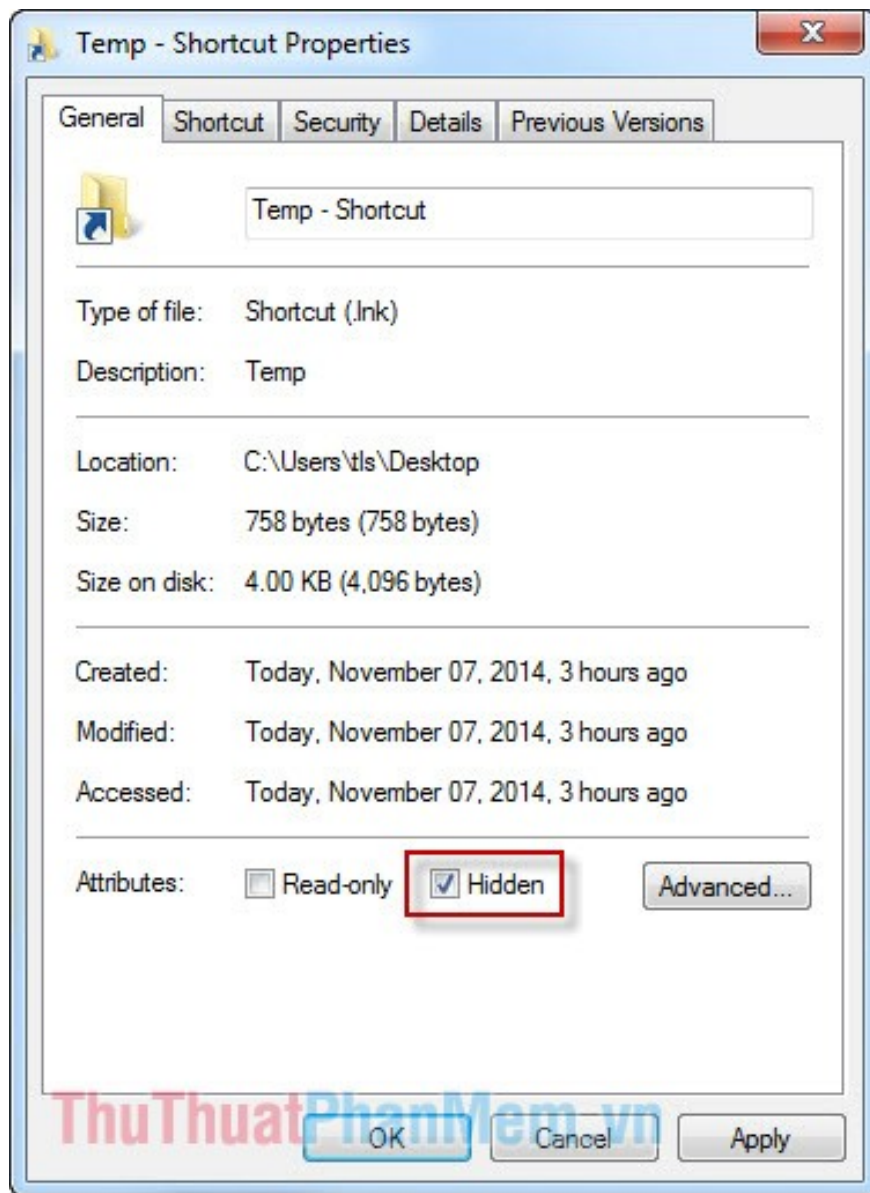

- Right-click the shortcut icon you want to create a shortcut for and select Properties

- Set shortcut keys for shortcut by using *Ctrl + Atl + words on keyboard* or *Ctrl + Shift + Words on keyboard*.

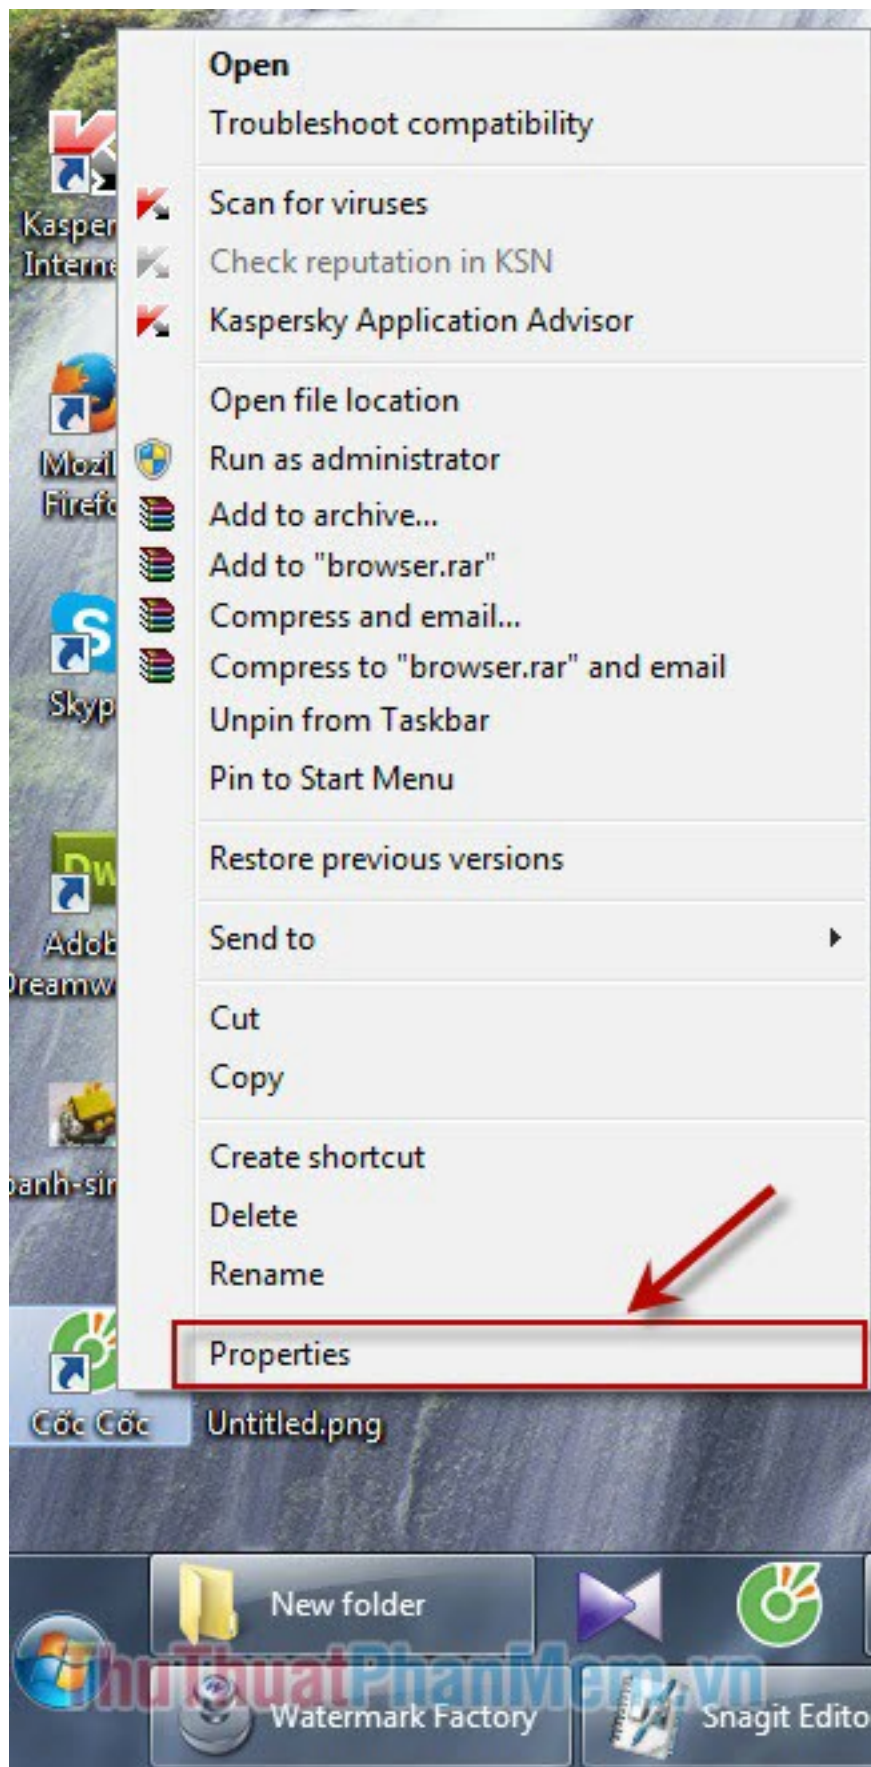

If you want to hide the shortcut that created the shortcut on the desktop, right-click the shortcut and select the General tab in the Properties dialog box, select Hidden

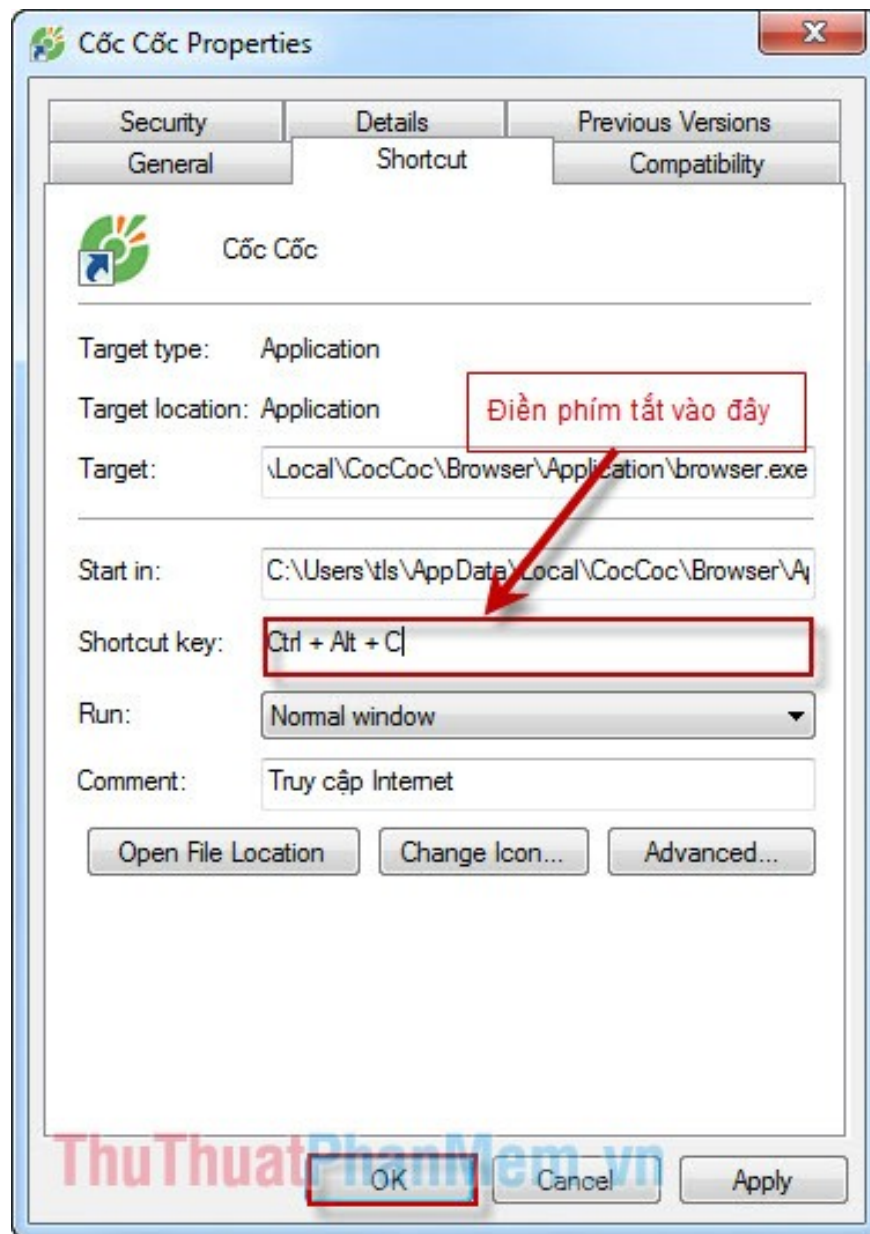

Now to open the Temp folder in your computer under the path E: DownloadTemp, we just need to press Ctrl + Alt + A.

2. For programs on the Desktop

- Right-click the icon to put shortcuts on the screen and select Properties

- Set a shortcut for the program by using *Ctrl + Atl + words on the keyboard* or *Ctrl + Shift + Words on the keyboard*.

Now to open Coc Coc browser, you just need to press Ctrl + Alt + C.
