

Create style for Facebook Avatar with two attractive features

Along with using animations to make Facebook Avatar, users can set the time to switch between Avatar images, or decorate the frame according to the festival and then return to the old picture.

Allowing Facebook apps to use video is available in smartphones, or video itself to make Profile picture Profile has received great love from the community of users. But for those who use Facebook on the web platform will be "disadvantaged" when it is impossible to replace the regular Avatar image into an animation like the application.

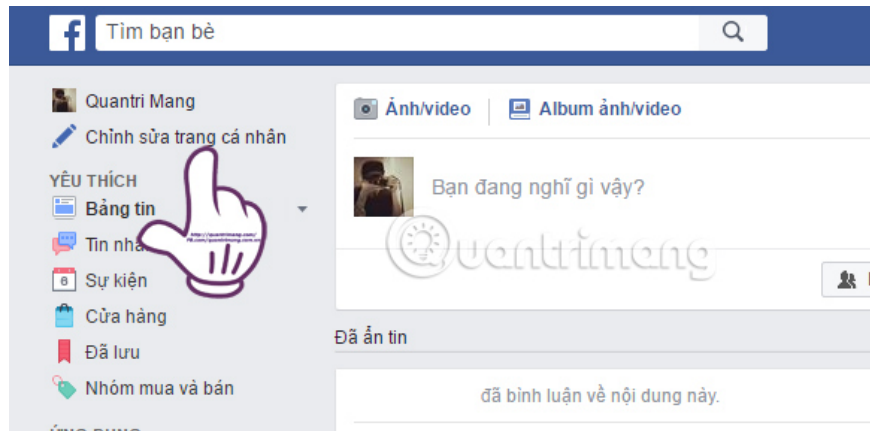

However, there are currently many applications that support users to change the style of Facebook Avatar, such as Avatar Face Maker, Avachara Avatar, . in the article Self-created Avatar Facebook with 5 online applications. But if you do not want to use the tool to create Facebook Profile image, you can immediately use 2 features available on Facebook. We can set the time to convert from the new Avatar to the old Avatar, or decorate the festival avatar and return to the old Avatar during the set time period. In this article, we will introduce and show you how to use two features to change Profile Facebook photos.

1. Feature to automatically transfer Facebook Profile picture:

With this feature, users can create and use a new Avatar. It will then set the time to use the new Avatar and then return to the previous Avatar.

Step 1:

First of all, we access Facebook personal account on the web. At the **Home page** interface on Facebook, click on **Personal page editing** (Edit Profile).

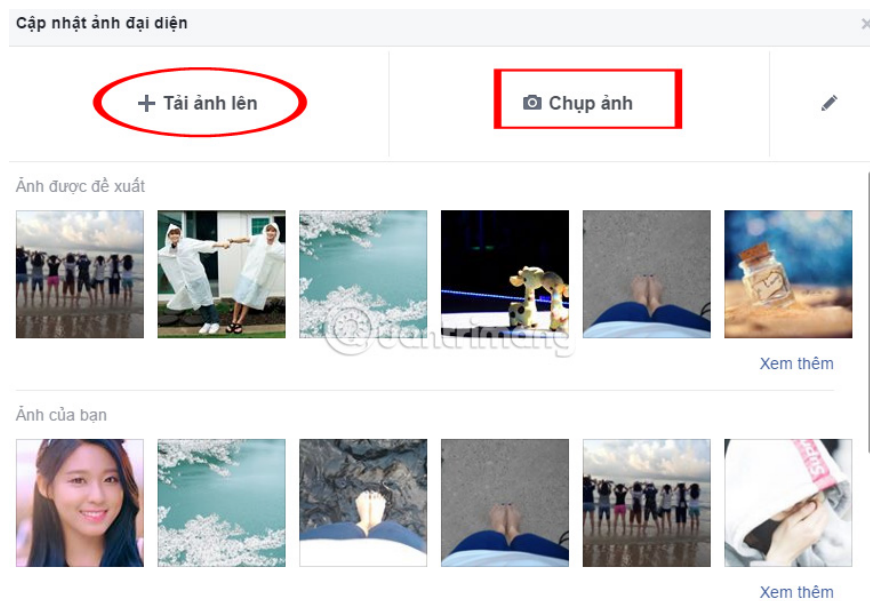

Step 2:

Next, hover your mouse on the Facebook profile photo area and click on the Update Profile Picture (Update Profile Picture) line.

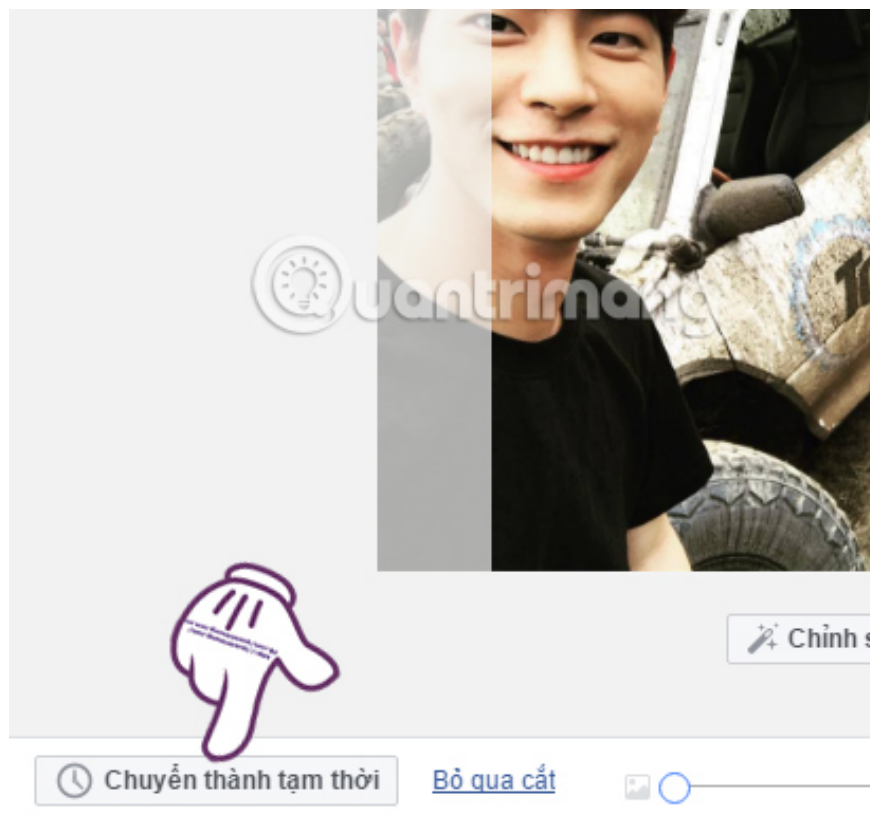

Step 3:

Appearance dialog box Update avatars. Here, we can upload a new photo, select previously uploaded photos or Take a picture to make Facebook a new avatar.

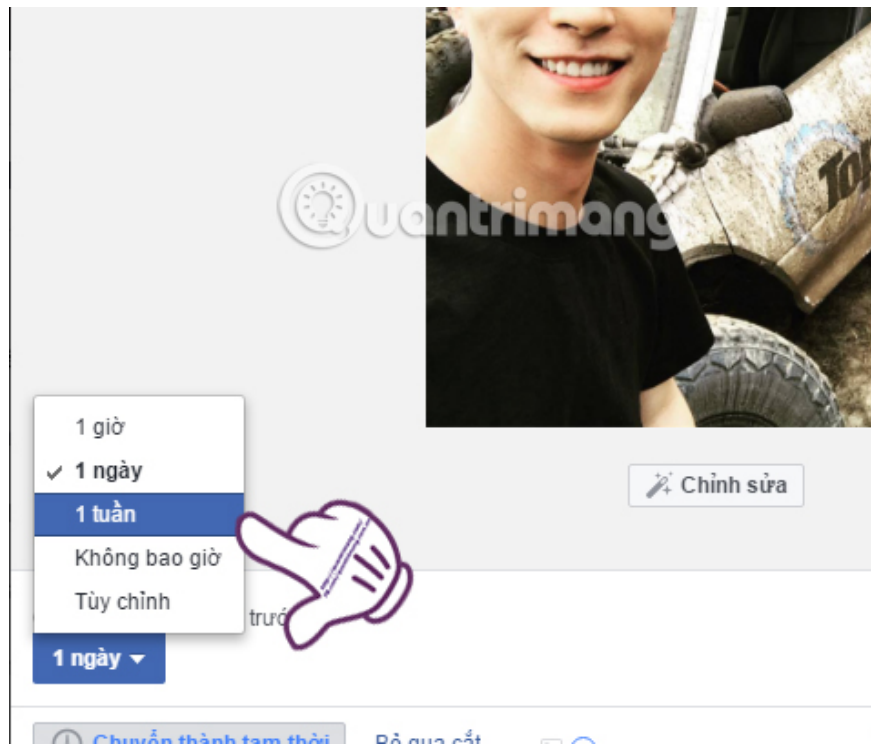

Step 4:

After you have selected a new image, you will be taken to the Create Profile Picture **interface** . Here, we can adjust the frame to create a avatar. Then, just below the image click on the item **Make temporary** (Make Temporary).

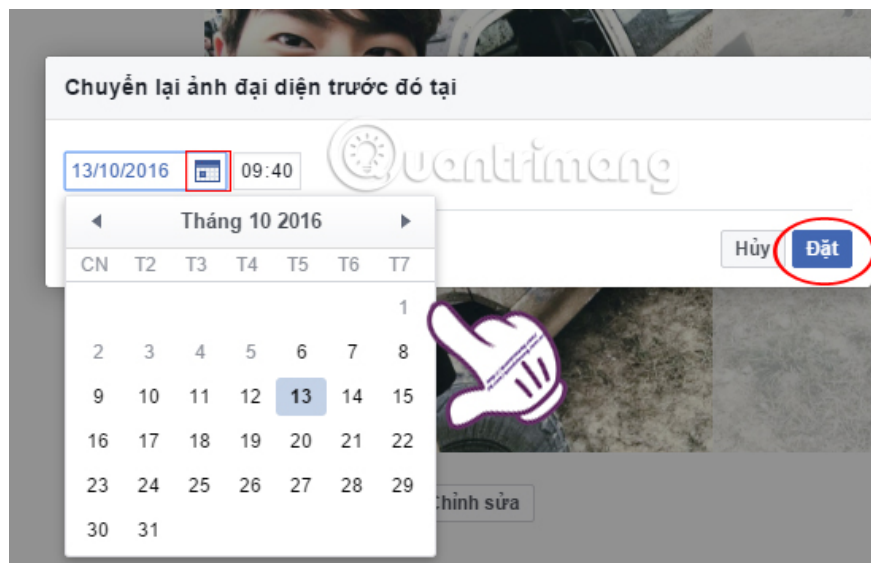

Step 5:

There are timelines for us to choose. You can **choose the time period to use the new avatar** , and then **return to the old Profile picture** when the set time expires.

In addition, when clicking on **Custom** , users can set the time and date details to switch to the previous avatar. Click **Set** to select the time.

Finally click **Save** to save the new changes.

Thus, the profile picture of the old Profile will return to Facebook after the set time using the new Avatar image.

2. Set the Avatar time for the festive season:

As with the above feature, users can decorate Profile Facebook profile with festive seasonal patterns, and also return to the old avatar at a certain time.

Step 1:

You also login to your personal Facebook account and access the address below:

1. <https://www.facebook.com/profilepicframes>

Step 2:

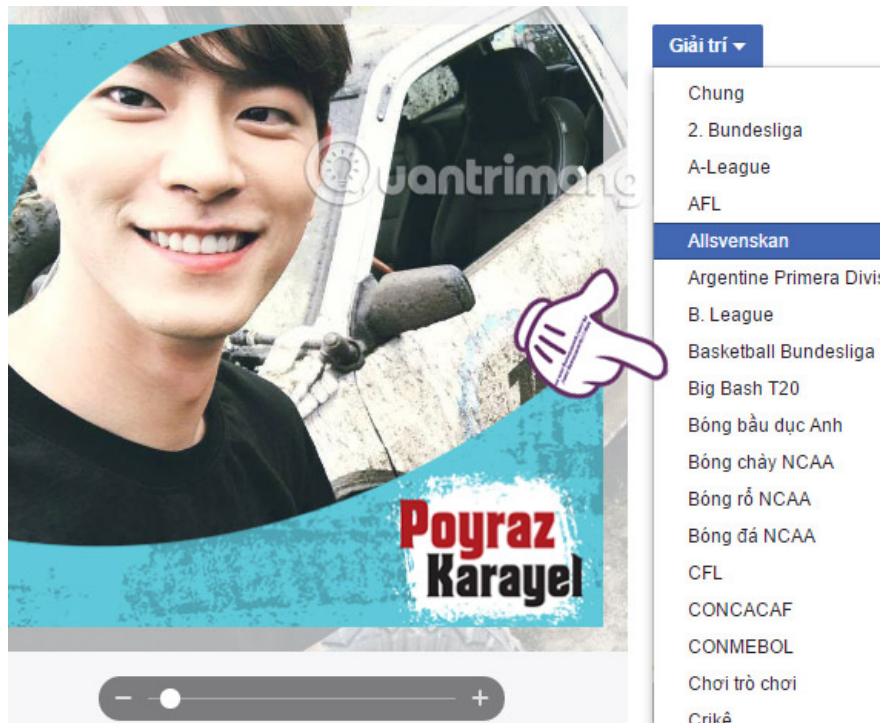

At the Change Your Profile Picture interface, you will see a series of topics that Facebook provides to decorate your avatar.

To view the Avatar Facebook decorator list, click on the **General** menu (General).

Step 3:

There are many topics to choose from. As soon as you select a certain theme, the avatar also changes according to that choice.

Step 4:

After decorating the Facebook Profile image, we will set the time for the photo to automatically switch back to the old avatar. Click on the **Back** to previous profile (Switch back to previous profile picture in) button. **Select the time period you want to change** and finally press Use as a Profile Picture (Use as Profile Picture) is done.

The above are 2 available features to change the profile picture of Profile Facebook and then return to the old avatar. Hopefully with these two features, you will have a unique idea for your Facebook Avatar image.
