

## Creates a unique set of wallpapers right now with a perforated screen on the Realme 6 Series

Many young people want to personalize and make their 'hard' more unique. Here is an extremely simple and super cute way you can do immediately with the perforated screen on the Realme 6 Series.

Perforated screens are considered a new design trend on smartphones this year. With the advantage of less stunned rabbit ears, water droplets, more durable than sliding cameras and, importantly, the hi-tech look. Especially with the front camera located in the screen as the Realme 6 | 6 Pro duo, a little ingenious you can turn this device into a "graceful mole" with the appropriate wallpaper.

See if the wallpapers above look unique, you can do it with just a few simple steps

With one shot, you can immediately guess the "secret" here, it is looking for pictures with eyes, sun, moon, . a little big size. And when choosing to be the wallpaper, try to put in the position of the 16 MP selfie camera of Realme 6. This is an extremely breeze or smartphone with a punchy screen now, creating a strong visual effect not only for you that other people look at it also admire its toxicity. What I have to do at home this season, searching for suitable photos as a wallpaper is also a fun hobby, isn't it.

If your bear is using Realme 6, be sure to send this wallpaper right away, make sure she "melts" right away

Or take advantage of your idol photos to create a cool wallpaper!

Or take a picture of the times that person took him out to find suitable pictures

With the dual selfie camera on the Realme 6 Pro is almost the same. A little different when you need to find the character in the image with both eyes at a distance similar to the dual selfie camera cluster of 16 MP + 8 MP of the Realme representative. You can try with familiar characters once used by netizens such as photos in The Incredibles, Wall E, etc. Or refer to the photos right below. The creativity of young people is unlimited, so you can be sure that you will have immediately a cool ton-sur-ton background image with your Realme 6 Pro.

The dual selfie camera system of Realme 6 Pro applies this type of wallpaper to make it more cool

For those of you who already own the duo Realme 6 | 6 Pro will probably add excitement about the new "hard" model. This is not only the first mid-range smartphone duo possessing the fashionable 6.5-inch Full HD + punch screen, but also has a high 90Hz refresh rate to experience smooth, clear moving images. Now you can personalize the perfect screen on Realme's new smartphone, it will increase the coolness for you when you hold it up.

A bit of searching, creating with countless photos on the internet or even photos taken from the rear camera on the Realme 6 Series, you have skillfully used the selfie camera in the screen of the device to beautify, express my quality for my phone Try it now and show your results on social networks to be able to receive likes, wow from friends and relatives!

In addition, Realme also introduced a separate talk show, with a 4-episode series, broadcast on Realme Vietnam's YouTube channel. Round Table Technology - RealMe, RealTalk is the place where technology enthusiasts such as reporters, reviewers, photographers, gamers . can sit together, be yourself to tell the true feelings and experiences. of themselves and connect with the audience, users through engaging content revolving around the development trend of smartphones. Welcome to the first episode of the Technology Roundtable with the theme "Screen" on the evening of April 14!
