

Crucible is here: How to play Amazon's new, free PC game

Here's what you need to know about the new team shooter.

Crucible, the team-based sci-fi shooter from Amazon Game Studios and Relentless Studios, was finally released in May. It's Amazon's first big-budget PC game, and it's free to play.

To check out Crucible, you can download it on Steam -- it's currently PC-only. Simply search for the game and scroll down until you see Play Crucible. Click the green Play Game button. There are also DLCs for purchase: The Tracker Founder's Pack for \$15, the Predator Founder's Pack for \$25 and the Alpha Hunter Founder's Pack for \$50.
