

# CSC? - Vietnam Mobile Police: The official Vietnamese shooting game arrives on Steam.

The W3ATeam development team recently announced that the first public test version of CSC? - Vietnam Mobile Police is nearing its launch after more than 3 years of development and refinement.

Currently, Vietnamese gamers can add CSC? - Vietnam Mobile Police to their wishlist on Steam.

## CSC? - Vietnam Mobile Police: A Vietnamese shooting game that allows players to take on the role of the Vietnamese Mobile Police Force.

CSC? - Vietnam Mobile Police is a Vietnamese game developed by W3ATeam that allows players to experience the feeling of being a mobile police officer participating in patrol, protection, and security missions for the nation.

CSC? - Vietnam Mobile Police began development in 2016 and is a first-person shooter (FPS) game. In the game, players control a team of mobile police officers. To complete missions, players must use their tactical thinking skills to build and implement plans and adapt to unexpected situations. The missions in the game are based on the real-life tasks of the Vietnamese mobile police force, such as apprehending criminals, catching terrorists, suppressing armed crime, and dispersing disturbances.

Unlike popular foreign game series such as Call of Duty or Battlefield, CSC? - Vietnam Mobile Police will focus on tactical gameplay rather than intense gunfights. To win, players need to be cautious in every action and handle situations cleverly.

Besides its unique gameplay with many bold ideas, CSC? - Vietnam Mobile Police also brilliantly recreates the image of riot police officers, from their uniforms to their accompanying equipment.

Currently, the game's release date has not been announced. The developer, CSC? - Vietnam Mobile Police, promises to launch the game as soon as it is completed.

CSC? - Vietnam Mobile Police will be developed for PC and Linux with relatively light system requirements:

1. OS: Windows Vista, 7, 8, 8.1, or 10 / Linux – Steam OS
2. Processor: 2.0 GHz dual core
3. Memory: 4 GB RAM
4. Graphics: Nvidia, AMD, or Intel OpenGL 4.0 / DirectX 11 graphics.
5. DirectX: Version 11
6. Memory: 2 GB free
