CSGO commands for those who only play the available modes in the game and do not need much customization commands for their game screen, the CSGO code is less important.

Perhaps on CS GO, the use of cheats is not very important because all players only need to find matches in C4 (Demolition) or hostage (Hostage) game modes.

So many people still think that CSGO cheat codes are not available, but you also know that the code table is still available in the game's settings for you to use. Some commands can lead you to playrooms with other game modes like zombie, zombie escape.

Should the CSGO code for those who only play the available modes in the game and do not need much customization commands for their screen, the CSGO code is less important. And if you want to try CSGO codes, then check out the CSGO cheats below and see how to enter instructions.

### Adjust the command to display parameters in CSGO

**net\_graph 1:** Enable the display of ping, lag, fps, rate on your PC and the server.

If you want the table to display this parameter smaller, use some of the cheats here.

1. **net\_graphheight** 80 (choose from 0-1000, 0 is the smallest, 1000 is the largest)
2. **net\_graphproportionalfont** 0
3. **net\_graphpos** from 1 to 3 select the display position for net\_graph

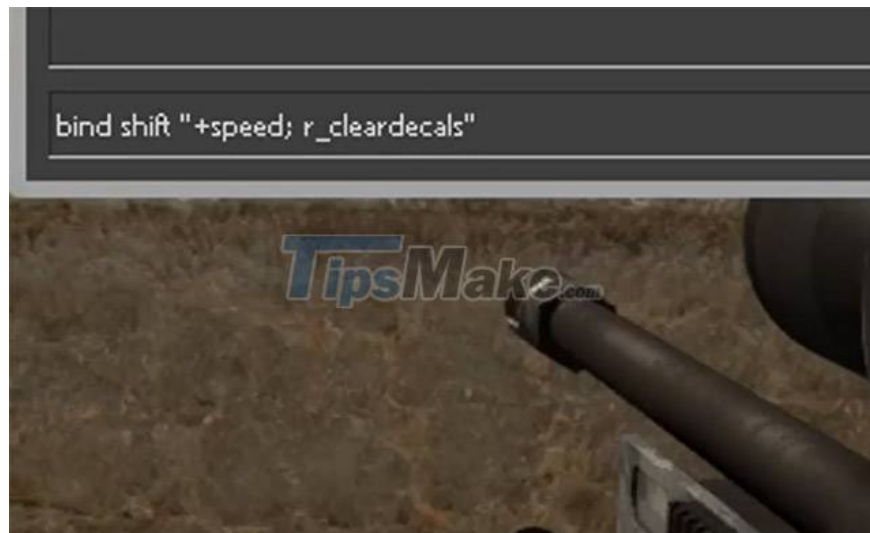

A little bit related to the net\_graph code above that you can adjust the parameters by **config.cfg** following the link below. C:\Program Files (x86)\Steam\SteamApps\common\Counter-Strike Global Offensive\csgo\cfg

1. cl\_interp 0.009766
2. cl\_interp\_rate 1
3. cl\_updaterate 128
4. cl\_cmdrate 128
5. rate 200000
6. fps\_max '129' //can increase to 300 if your computer configuration is strong.
