

Dark Mode for Google Chrome is coming to Windows 10 and this is the way to experience it first

Recently, Chrome developer Kasting confirmed in an article on Reddit that Chrome's official Dark Mode is about to be updated on Windows 10.

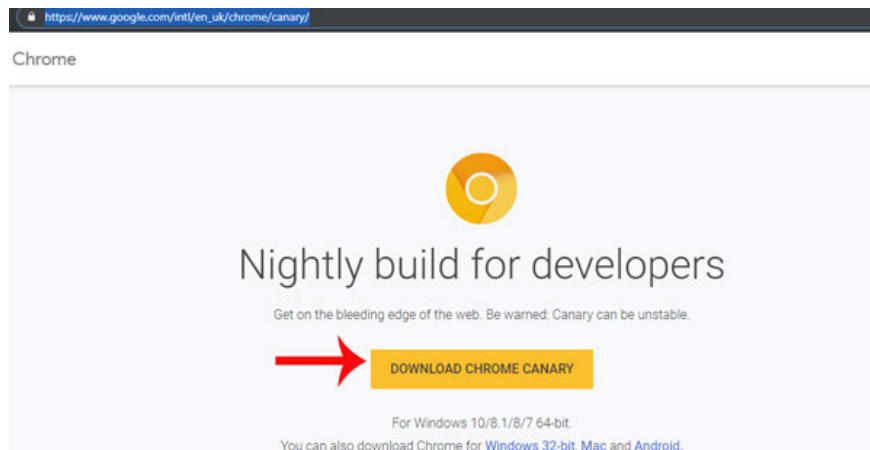

Recently, Chrome developer Kasting confirmed in an article on Reddit that Chrome's official Dark Mode is about to be updated on Windows 10. However, it is not yet known if Dark Mode is available. update on mobile version of Chrome or not.

Earlier, Google also announced plans to bring dark mode in Chrome on macOS Mojave.

Currently, the specific time Google brings the official Dark Mode on Windows 10 PC has not been revealed. However, users can experience this feature through a trial version of Google (Google Chrome Canary).

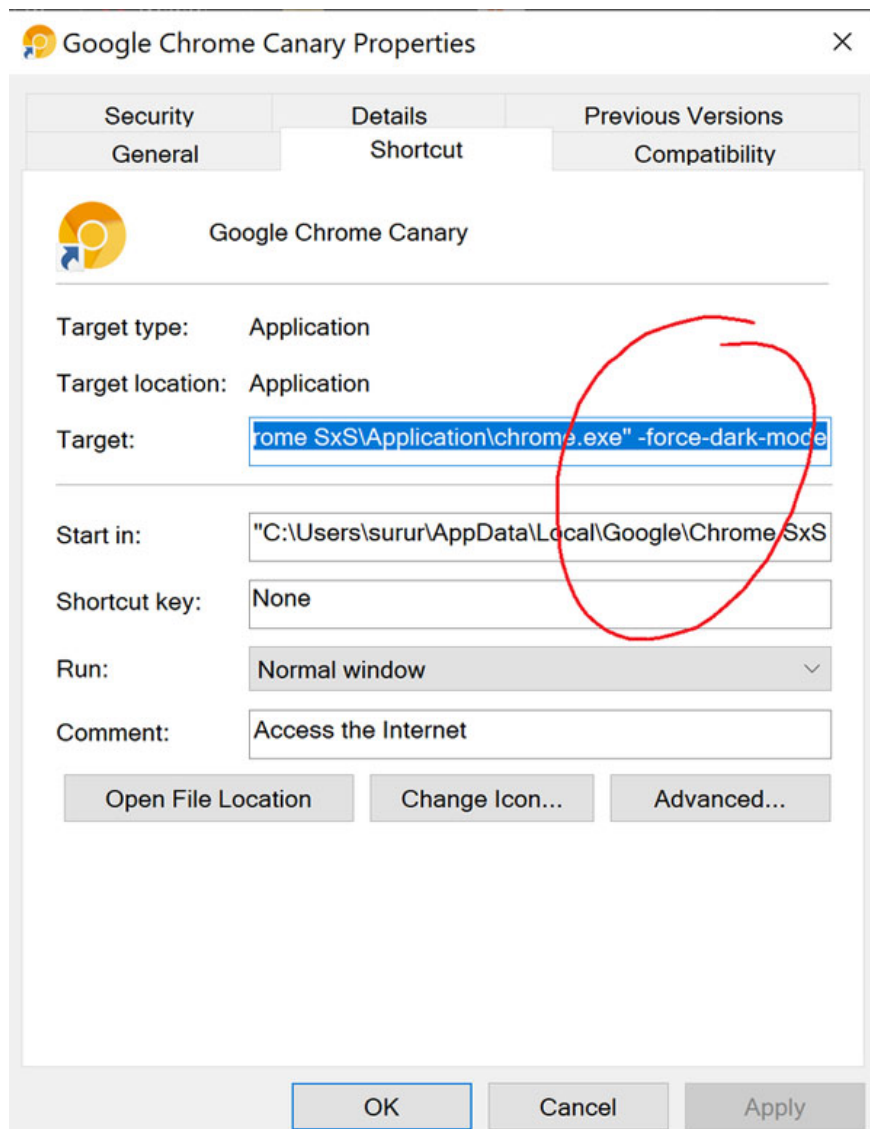

Step 1: Visit the link below and download Google Chrome Canary.

https://www.google.com/intl/en_uk/chrome/canary/

Step 2: Install Chrome Canary.

Step 3: Right click on the application's icon -> select Properties -> at the Target item, add a space and '-force-dark-mode' behind 'chrome.exe' -> click Apply.

Dark Mode automatically activates and switches Chrome's entire interface from white to black, while icons and domain names, tab names will turn white.

However, this is only a trial version, so it is not really perfect as the right scroll bar is still white, the items in the gray menu are quite difficult to see and only turn white when pointing at.
