

Dark Theme mode for YouTube application has been updated on Android for all users

Today, YouTube has officially updated Dark Theme mode (dark wallpaper) for Android users worldwide. Dark Theme mode was first introduced by YouTube 1 year ago and until March this year, this feature has come to iOS users.

Today, YouTube has officially updated Dark Theme mode (dark wallpaper) for Android users worldwide. Dark Theme mode was first introduced by YouTube 1 year ago and until March this year, this feature has come to iOS users.

After updating YouTube version 13.35 on Android, users can choose a black background that is easier to see at night for this application to replace the traditional white wallpaper. When opening the latest version of YouTube, users will receive a message asking if they want to activate Dark Theme mode immediately.

← General

Remind me to take a break
Off

Dark theme
Enable dark theme throughout the app

Limit mobile data usage
Only stream HD video on Wi-Fi

Double-tap to seek
10 seconds

Picture-in-picture
Tapping Home button while watching continues playback in a miniature player on top of other apps

If you are busy and ignore this message, users can access Settings -> select General -> turn on Dark Theme mode to activate.

After successful activation, the YouTube application will have a black background image, while the font and icons will turn white.
