

Data price 'emergency' service

We all risk losing data, whether it comes from a damaged hard drive, data errors or accidentally deleting files. If you are unable to retrieve the data yourself, you can use the popular 'data rescue' service nowadays. However, if you are not alert, you will most likely lose your trust.

In the time of social network development today, after only a few minutes online, you can be dazzled by finding a series of "SOS" addresses in the country. Hard drive of personal desktops, laptops, server's hard drives, USB drives, memory cards, removable hard drives . damaged firmware, immersed, burned, due to "ghost" mistakenly, accidentally deleted, formatted . all The frequency is all in the "supported" list of data rescue companies. However, the price you get is sometimes a bit harsh even though the error is simple and the time to retrieve data may take weeks.

CÁC PHƯƠNG ÁN CỨ DỮ LIỆU

- Phương Án 1**
Thiết bị cứu dữ liệu bị lỗi như Ghost nhầm, Setup win nhầm, Format nhầm.
Thời gian xử lý 2-4 giờ.
- Phương Án 2**
Dữ liệu thất bại do Firmware, Bad sector, không thể truy cập vào dữ liệu, nhận thấy dữ liệu không thể copy.
Thời gian xử lý 1-2 ngày.
- Phương Án 3**
Bước cuối, cần thiết chuyển sâu vào miền dữ với những lỗi như hiệu cc, ghi mạnh, chày phát ra âm thanh.
Thời gian xử lý 2-4 ngày.

Công ty TNHH Khôi Phục Dữ Liệu Võ Nguyễn
24/16 Đoàn Thị Điểm, Phường 1, Quận Phú Nhuận, TP.HCM

Since its inception in 2002, Vo Nguyen is one of the units in the top of the best data rescue centers in Ho Chi Minh City and Da Nang. In addition to expertise, what Vo Nguyen particularly noted is professional ethics. The honesty and absolute confidentiality of customer data is strictly regulated by the company, so there will be no more problems of the hard drive or copying countless junk files into the guest HDD to increase capacity and charge. .

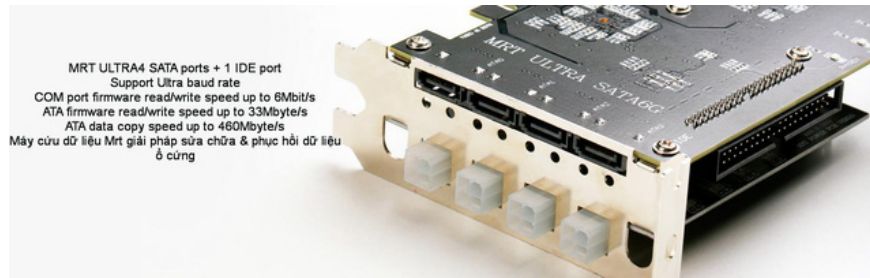

Besides, Vo Nguyen and a team of technicians are carefully selected to meet the high professional level, well-trained in Russia and China and have had experience in handling many difficult cases. gained prestige and quality of service with many big customers such as KTV VTC16, Ho Chi Minh City Open University, BigC Vietnam . The company also received the trust of many big partners when it became a unit. Maintain data for many "big" businesses such as Masan, Ton Hoa Sen, Vinamilk .

Mr. Vo Ngot - Director of Vo Nguyen Data Recovery Company, shared: In addition to modern equipment that are completely imported from abroad such as: AC3AB's PC3000, MRT Lab's Ultra from SCSI, SATA, SAS . to solve the most difficult and complicated cases, "In early 2020, Vo Nguyen has just succeeded in importing exclusively the Sata standard Ultra Data Rescue machine, a new design of MRT Laboratory. LAB was launched in 2015 with a completely new framework. This is the first PCIE2.0 interface data recovery tool in the world. The MRT Ultra is dedicated to high quality, high speed and human experience. Perfect use, can be classified as advanced configuration among MRT tools.

Standard SATA Data Rescue machine SATA 3.0

Sata MRT Ultra Data Rescue with PCI-Express 2.0 interface with four original SATA 3.0 ports and one IDE port that supports all IDE interface hard drives (CE, CF, ZIF), SATA (MICRO SATA) , 1.8-inch, 2.5-inch, and 3.5-inch hard drives with capacities up to 5TB, and one-click auto-diagnostic repair module. Is an effective USB terminal that can work with Seagate F3 serial hard drive, support Flash ROM programming unit, recover hard drive corrupted firmware, ability to unlock and reset drive password High hardware, support for data recovery and hard drive repair due to unsuccessful read / write heads, support for virtual head mapping technology, support for hard drive repair with physically damaged areas, support disk image, selective head image, file recovery, support to edit Head map in RAM for data recovery, support to edit Head map in RAM to recover data.

PCI-Express 2.0 interface with four SATA 3.0 ports

Notably, the standard Sata MRT Ultra can also review error tables (P list, G list, T list, etc.), download the service information access program - LDR, hide the defects of magnetic surface. Besides, it can also provide direct reading and writing to Seagate SA monitoring, forward and reverse scan, and direct data recovery from bad sectors and Provides MFT Scan to recover accidentally files erase

Recently, Ultra was released to the market, a platform running software that supports 32-bit and 64-bit Windows operating systems. Featured by more ports, more advanced technology, less CPU utilization rate and hardware design of SATA3.0, there are two main power inputs, 4 power output interface, 4 interface SATA3.0 interface and 1 IDE interface. At the same time, there is a great improvement in the performance of Ultra Ultra ships. Check that the firmware transfer rate is increased from 2MByte / s to 33MByte / s. Check the DE image speed is increased to 460MByte / s. The theoretical transfer rate is as high as 600MByte / s. This tool is a good choice for users with large business volumes, professional data recovery companies and disk repair organizations.
