Recently, Blackmagic Design has just released a new optimized video cutter software specifically for YouTubers called DaVinci Resolve 16.

This software not only helps YouTuber cut videos faster, but also has a new look that looks quite nice and modern with the emphasis on a dark professional interface.

## **Some outstanding features of DaVinci Resolve 16:**

1. Equipped with a separate module, separate from the current edit page, users can easily switch back and forth.
2. Equipped with a new Dual Timeline feature that allows you to watch all of the built-in videos so that users can work comfortably without continuously zooming in on the cut videos.
3. Provides full tools for users to use for easy tasks including import, trim, mix audio, color schemes, .
4. Additional source tape feature allows users to review everything in the form of a long tape, easily searching for parts to edit quickly on the timeline.
5. DaVinci Neural Engine, learning machine system supports up-scale (upgrade) frame better, automatically combines color, facial recognition, content processing and many other features.
6. The Resolve FX module adds a number of new plugins like analog noise, removing objects, textures, and shadows.
7. Improving and upgrading old modules like beauty, face refinement, warping.
8. Fairlight audio page is added with many plugins, 3D audio support, .

Operation between each segment and overall video is easier thanks to the Dual Timeline feature.

DaVinci Resolve Studio 16 software has added new effects.

The most advanced version of DaVinci Resolve Studio 16 is currently available for \$ 299. The company also launched a free version for users, of course some features were cut off but not significant.
