

# DaVinci Resolve 17 video course summary

DaVinci Resolve is a popular video editing software with a series of attractive features. Below is a video tutorial for beginners on DaVinci Resolve 17.

With curriculum designed for both new users and established professionals, Blackmagic Design certified training will teach you the skills you need to be more creative, work faster, and get the job done! This article will summarize the DaVinci Resolve 17 video course provided by Blackmagic Design.

## How to edit video with DaVinci Resolve 17

### Introduction to video editing in DaVinci Resolve 17

**Explore the art of editing in DaVinci Resolve!** Editing is at the heart of cinematic storytelling and this video will help you understand the tools and techniques to achieve your creative vision.

This video expands on the editing features on the page. You'll learn how to refine your rough cut using crop editing, frame and replace footage, mix audio, and even add effects, transitions, and titles!

### Multicam editing

Learn multi-camera editing with DaVinci Resolve. You'll learn how to sync angles directly in the timeline before editing a simple two-camera video and then a larger multi-camera music performance!

### Visual effects in the editing page

Discover how to enhance your projects with visual effects on the editing page! You'll learn how to use movable pads, pull green screen locks effectively, create simple replacement signs, and much more.

## Color in DaVinci Resolve

### Introduction to color correction

This video introduces you to the powerful color page in DaVinci Resolve. Learn how and why to use the primary and secondary grading tools, along with how to read ranges, balance footage, and more!

## **Advanced Color**

Explore advanced features used by Hollywood colorists! Learn how to set up color management, structure grading with the node editor, work with RAW media, use tracking with Magic Mask, and much more!

## **Mini board**

Work faster and have more creative control with the DaVinci Resolve Mini Panel. Learn how to navigate color pages, edit multiple parameters at once, and grade. How to do it all without using a mouse!

## **Content delivery**

Learn how to prepare your content for delivery! This video walks you through setting up and using delivery presets, working with render queues, delivering content for live use, and more!

## **Color Management**

This video will show you why color management is an important part of your video editing workflow and walk you through the different color management systems and settings available in DaVinci Resolve.

## **DaVinci Resolve Fairlight**

### **About audio**

This video introduces you to the Fairlight page in DaVinci Resolve including navigation, importing media, selecting clips, balancing levels, simple editing, and even editing dialog with plugins!

### **Introduction to sound design**

Explore the art of sound design and effects editing including clip and track level control, creating playlists with markers, managing clips in the audio library, even adding effects!

### **About the combination**

Learn the importance of audio mixing. In this video, you'll pan tracks, sweeten audio with EQ and dynamics, work with buses, use automation, and prepare audio for distribution.

### **VO and ADR Recording**

This video will show you how to record a simple voiceover for a scene and then how to use ADR tools to replace the dialogue. You'll also learn how to set up your microphone and start recording!

## **How to use Audio Track Layers**

This video will show you how to use audio track layers, a powerful tool that allows you to edit multiple tracks at once for the best performance.

## **Channel map and linked groups**

Learn how to work with channel mapping and link groups in DaVinci Resolve. By the end of this lesson, you'll be equipped with the skills you need for future multi-channel audio projects!

## **Dolby Atmos integration**

Explore the world of Dolby Atmos with Fairlight's built-in tools! You'll work with a professionally produced demo project before creating your own Dolby Atmos mix with Fairlight Immersive tools.

## **DaVinci Resolve Fusion**

### **What is Fusion?**

Explore the powerful Fusion site where you can create cinematic visual effects and motion graphics! You'll learn the basics of a node-based interface for compositing, tracking, keying, and more.

### **Basic Compositing**

Learn how to perform common compositing tasks on the Fusion page. You'll discover how to combine separate shots to create a seamless final image and replace skies with the powerful luma keyer.

### **Motion Graphics in Fusion**

Explore the real 3D workspace on the Fusion site. You'll learn the basics of building with shapes, using views and cameras, adding lights, and rendering your 3D objects to 2D.

### **3D Compositing in Fusion**

This video expands on the advanced 3D compositing tools on the Fusion page. You'll learn how to use the powerful 3D camera tracking tool to add objects, how to paint out unwanted objects, and more!

Above is the basic **DaVinci Resolve 17** video course. Hope the article is useful to you.
