

Decoding HDMI sign (STB) on TV

On some TVs that have an additional STB symbol next to the HDMI port, your home TV can watch cable or satellite TV via the set top box or CableCARF signal converter.

With the development of current technology, newly launched TVs bring many new features, more new experiences for users. We can surf the web on TV, play games, watch Youtube videos or control television by phone easily. In addition, some TVs also incorporate additional connection ports such as USB, HDMI, HDMI (ARC) or HDMI (STB).

So what does the HDMI port attached to the STB sign mean, and how is it used? In this article, we will bring you the necessary information and how to connect to the HDMI port (STB).

1. What is an HDMI port (STB)?

STB is an acronym for Set-top-box, ie a signal decoder for television, so that television can watch digital TV, satellite TV, internet TV or a television receiver to turn ordinary TV into a television. minh .

Such a popular set-top-box types such as: VTC digital receiver, VTVCab, K + receiver, internet TV receiver of MyTV, FPT Play, Android top box TV, Apple TV . If on an HDMI-enabled television (STB) it means that this port is the best support for connecting the TV to the receiver types. Thanks to the HDMI STB port, the quality of cable television will achieve perfect standards in HDTV range.

2. How to connect with HDMI port (STB):

First of all, we need to prepare the HDMI cable to connect to the port.

First, plug HDMI cable into HDMI port (STB) on TV. The other end will plug into the HDMI port on the receiver. On TV, select the data input as the DHMI port that we connected. Click Source buttons, Input, or some TV lines will be arrow buttons.

After connecting, the quality of the picture on the TV is significantly changed. For other TV series can also connect to HDMI port, but if you want to watch movies with sharp HD image quality, vivid sound, you should use HDMI port (STB).
