

# Decoding the magical mysteries in Genshin Impact

Genshin Impact is not simply a role-playing game and goes on a mission, but the game itself has hidden countless mysteries waiting for gamers to discover.

Since the launch of the anime-style role-playing game Genshin Impact has become the focus of the community with poetic graphics and creative gameplay combining extremely creative elements.

Especially besides the main missions, gamers will take a lot of time when encountering mysterious puzzles in the game.

To easily save time and help gamers easily do the task, let's take a look at how to decode a few difficult puzzles in the game.

## Find your way to the Musk Range

Musk Range is a small island in the lower corner of Mondstadt and this is also the place where gamers often come to conquer La Hoan Tham Canh. However, for new players, they choose to swim across the sea to go to the island or use Ice-type characters such as Chongyun, Kaeya . to freeze the sea surface to shorten the swimming distance, in fact this approach is not at all. is there only a quicker way?

Specifically, gamers can teleport straight to the island with an ancient teleportation gate at the Top of the Vow. Thereby when the player opens this portal, you just need to climb up the next big rocky slope to see a ghost used to activate the stone statue, the last 2 keys are behind the other 2 statues, you just You need to go straight back to gather the 3 spirits to open the wind gate to go straight to the Musk Range.

However, after opening, gamers do not rush to go immediately, because there is a chest sealed by the wind, you just need to go up very high and land in the middle is a high-class chest already in your pocket.

## Secret bonsai pots

On the way to Liyue port, gamers will pass by Vong Thu inn. Just take the elevator and go to the balcony of the inn above, gamers will easily recognize a bonsai pot with a rather strange shape with a marked place.

Actually, this is a suggestion and gamers just need to go to the 'Liyue Van Lai' area right in front of the entrance to Liyue harbor to see the mountain shaped similar to the Bon Sai pot. Let's climb to the top of the highest mountain, there is a rare chest waiting for you up there.

To easily conquer this strange mountain, gamers climb from the left wing over the lower mountain then use the wings to fly over the higher mountain to get the chest and Nham Than Dong.

However, after finishing your work, don't rush down to Liyue Port, go straight to the other side of Thien Hoanh Son to open the teleport point and get more chests as well as Nham Than Dong.

## Island of love

Isolated in the middle of the sea is a small island with a rare hidden chest, but if gamers want to get this chest, a couple is required. Specifically, if you want to go to this island, gamers have to use ice-type characters such as Kaeya, Chongyun . to freeze the sea surface to cross (because the island is far from the mainland and gamers cannot swim to even with full strength. durable).

However, that was only the beginning because if the player wanted to get this chest the easiest way, they had to pair with another teammate to get on the island. After going to the island, the two will meet a pile of stones arranged in a heart shape, just two people standing on either side of the heart of a rare chest will appear.

It is rumored that this task can be done with one person by using Amber or Xiaoling with the ability to summon a pet to one side of the heart and gamers just need to stand on the other side, however if there is no love between couples , gamers will find it difficult to throw the pet in the right position as well as take more time for the sea crossing.

But let's say it again when gamers on the island often only use Kaeya and Chongyun (because these two characters are easy to spin the gacha, and Qiqi is harder) and just imagine the scene where the two Kaeya are standing at the heart Squeezing is a bit harmful to the player's eyes

**Explore the oasis in the sky**

In the series of quests to find the elves in Liyue, gamers will have to travel to Khanh Van Dinh and it is also here that gamers will have the opportunity to admire the oasis in the sky, a mystical wonder of the Nham Than.

Specifically, gamers, after activating the Seven Angels of God in Khanh Van Dinh, go straight to the top of the mountain.

Here, gamers will discover a strange stone stele with the request of three worshipping dynasties to open up the miracle, actually the three phoenixes here are 3 bird statues placed on 3 nearby mountains and gamers just need to Rotating these three statues towards Khanh Van Dinh was able to open up a unique path to heaven.

Specifically, the first bird is located at the top of the mountain near That Thien Than Tuong, the second bird is located at the Tiger Lao Son of Li Thuy Diep Son Chan Quan and the third bird is located in Hidden Tang Son of Luu Van Ta Phong Chan Quan. .

On the way on the mission to announce the death of the Nham God to the fairies here, gamers also pass by these strange bird statues, so consider doing this task to make a way to the sky.

After activating 3 bird statues, gamers will open a wind path blowing straight up the oasis to get 3 super-rare chests and 1 Nham Than Dong, but in fact, those items are only secondary because Coming here, gamers will have a very beautiful location to live virtual and watch the sunset in the true sense of happiness like a cloud on the wind.
