

Defeating the seniors, Windows 10 became the operating system version chosen by many gamers

According to statistics provided by Valve, Windows 10 64 bit version has knocked out the legendary version of Windows 7 to become the operating system version chosen by gamers.

According to statistics provided by Valve, Windows 10 64 bit version has knocked out the legendary version of Windows 7 to become the operating system version chosen by gamers. Specifically, Windows 10 holds 57.03% market share, up 1.5% from the previous month, while Windows 7 with 32.38% falls to second place.

However, if not included in the game, but considering the number of users worldwide, Windows 10 still ranks behind his man.

According to statistics, 96.5% of computers using Steam are running Windows operating system while only 2.93% of macOS operating system comes from Apple.

Windows 10 is currently the most developed version of Microsoft operating system and in the upcoming updates, it is certain that this operating system will defeat its man on all fronts. .
