

Delete cookies in popular browsers

In this article, we will show you how to clean cookies on today's most popular browsers: IE 9, Firefox 4, Chrome 10 and Safari 5.

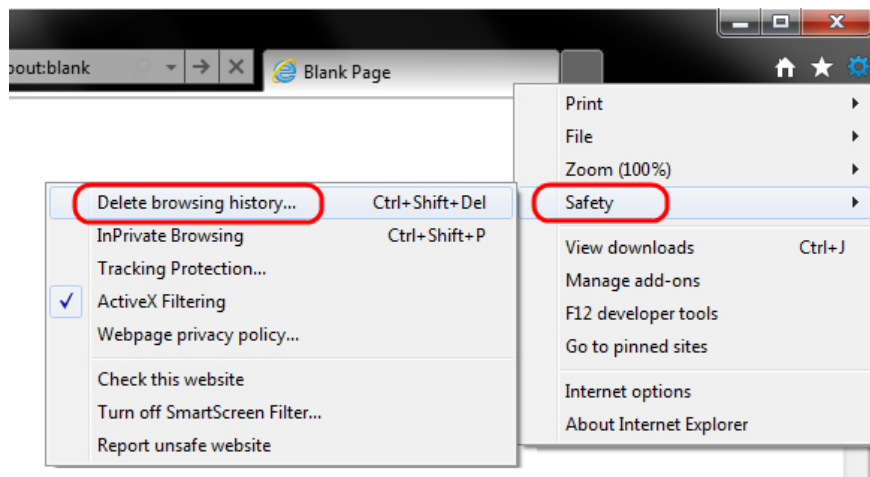

TipsMake.com - **The computer you are using (whether Windows, Mac OS X or Linux) will become slower and slower because of the large amount of crap** . If you frequently surf the web, browser-based cookies are a factor in creating a large amount of crap that slows down your computer. One of the things you should regularly do is clean up cookies in your browser on your computer. This work has two main effects: removing crap causing slowdown and ensuring information security for yourself when surfing the web frequently.

In this article, we will show you how to clean cookies on today's most popular browsers: IE 9, Firefox 4, Chrome 10, Safari 5 and Opera 11.

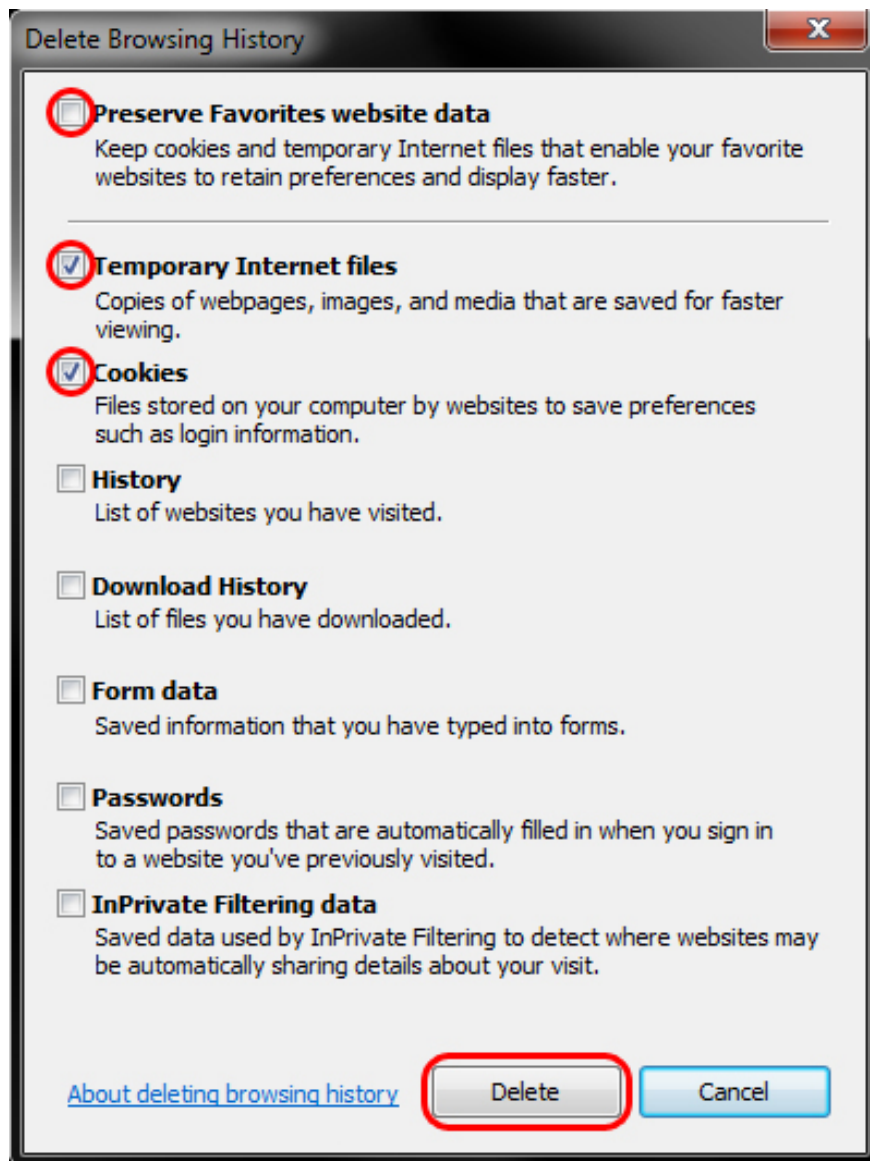

Internet Explorer 9

Open IE 9 browser on your computer

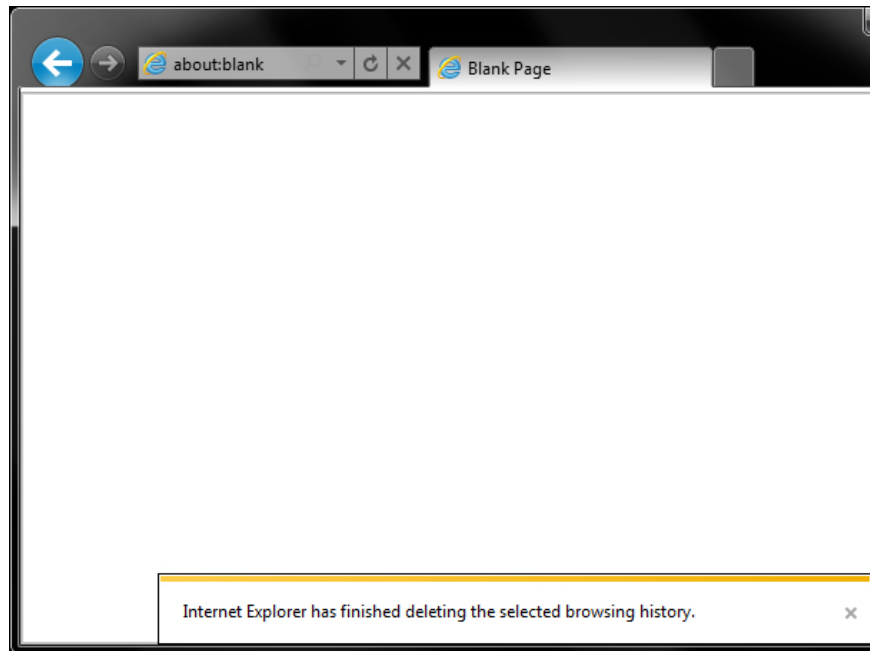

Go to **Tools > Safety > Delete browsing history** . or press **Ctrl + Shift + Del** on the keyboard

On the *Delete Browsing History* window, uncheck the **Preserve Favorites website data section** , select both the **Temporary Internet Files** and **Cookies options** just below that section; then click **Delete** .

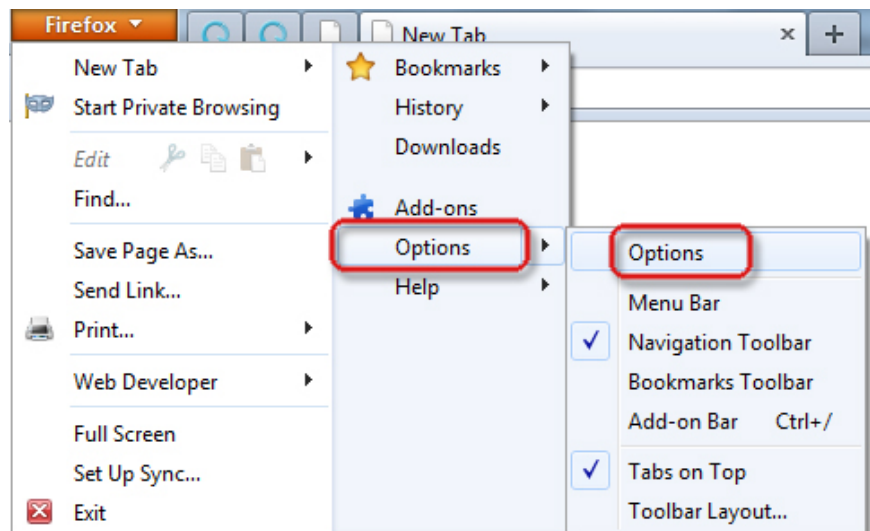

After IE finishes deleting, you will receive a message at the bottom of the window that it successfully deleted your browser's cache and cookies.

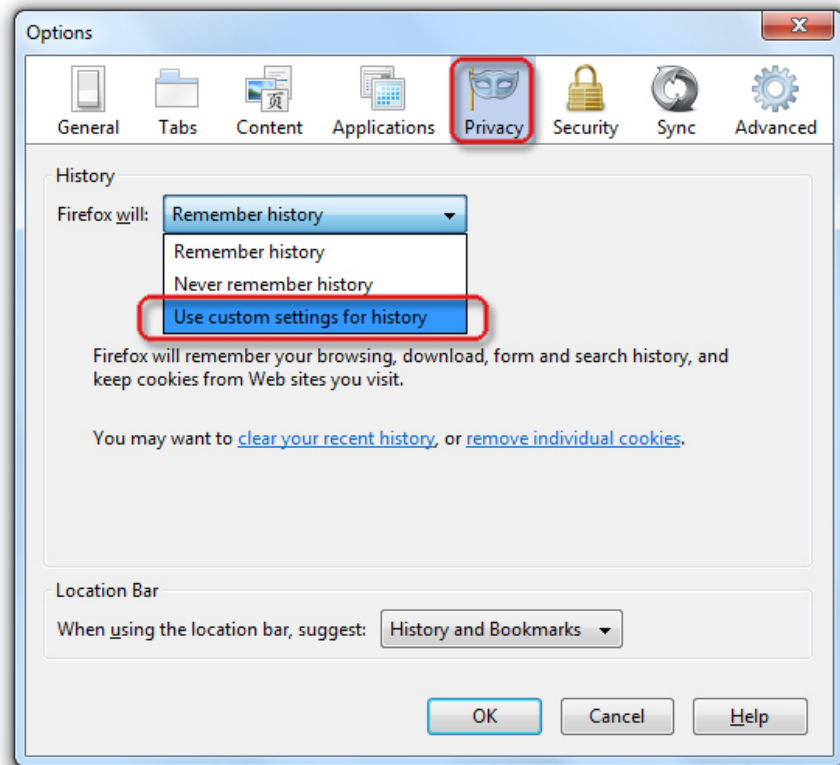

Firefox 4

Open Firefox 4 browser

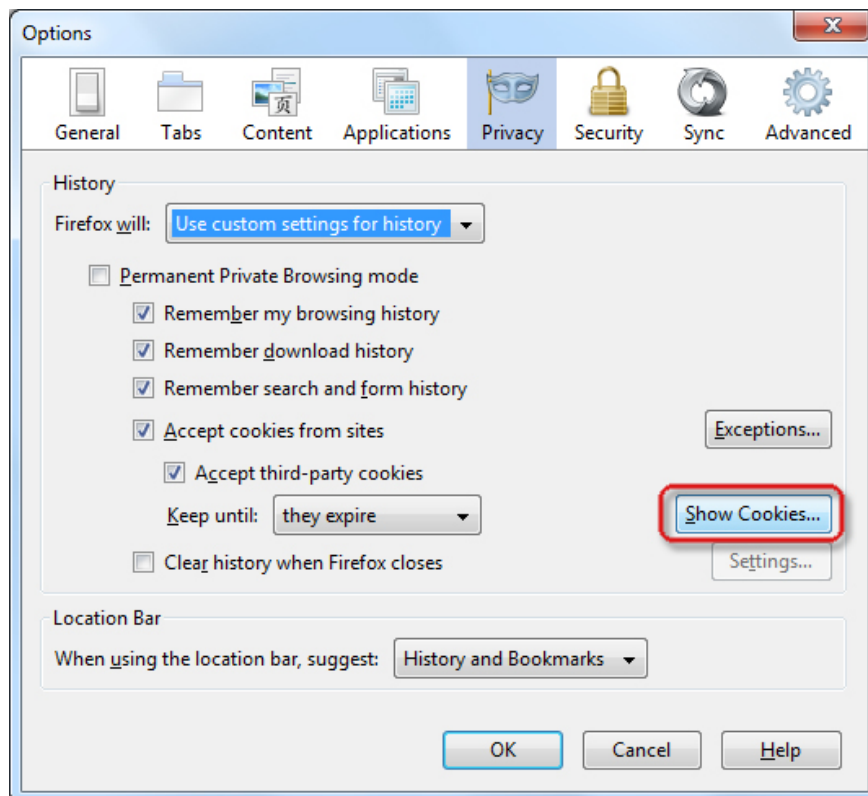

Go to the **Firefox** tab in the top left corner of the browser, select **Options > Options** .

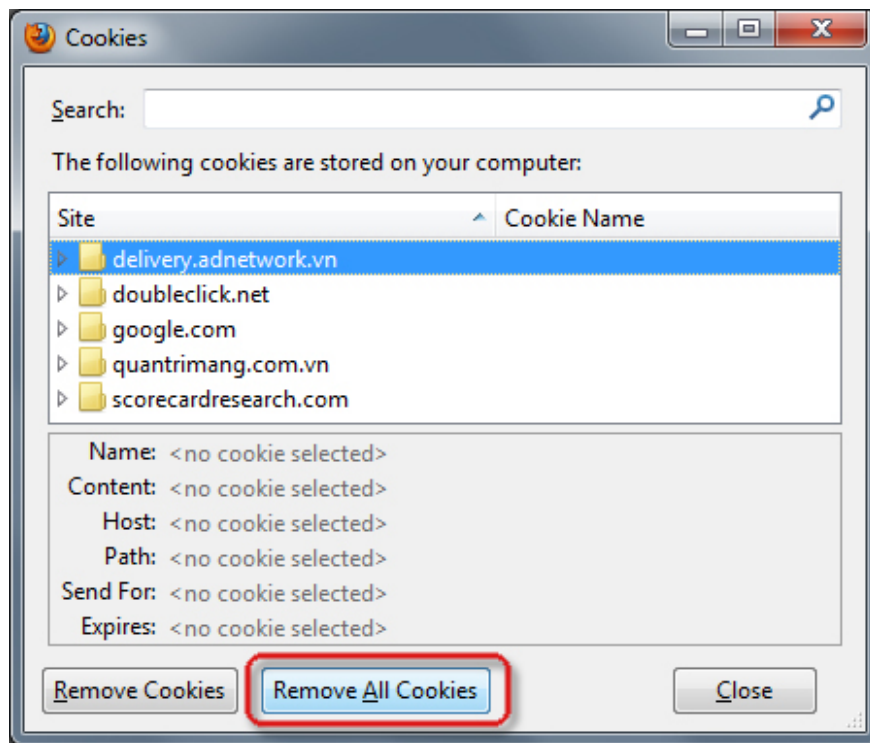

On the Firefox settings window, select the **Privacy** tab. In the *History* section, select **Use custom settings for history**

With the new options appear, you will see the **Show Cookies** button, click it

On the *Cookies* window that opens, click **Remove All Cookies** , and then click **Close** .

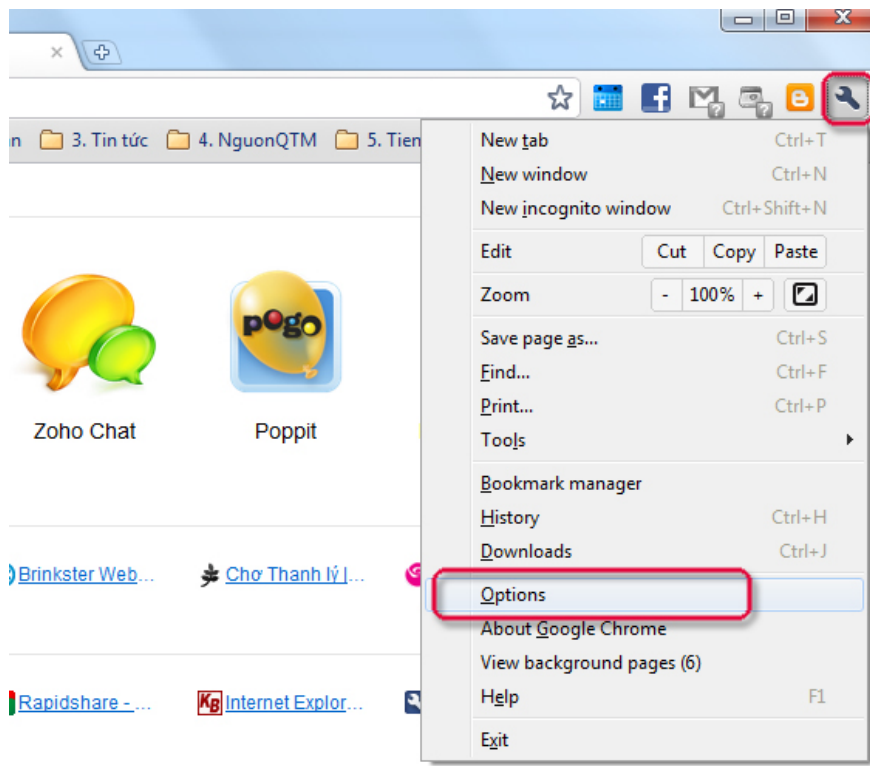

Click **OK** to close the Firefox setup window.

>>> Delete individual cookies in Firefox

Chrome 10

Open Chrome browser on your device

Go to the " *wrench* " icon in the rightmost corner of the address bar section and select **Options**

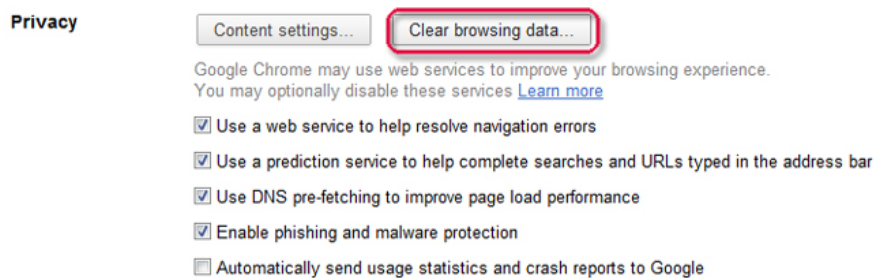

The *Options* tab will open and select **Under the Hood** , there are many ways to choose

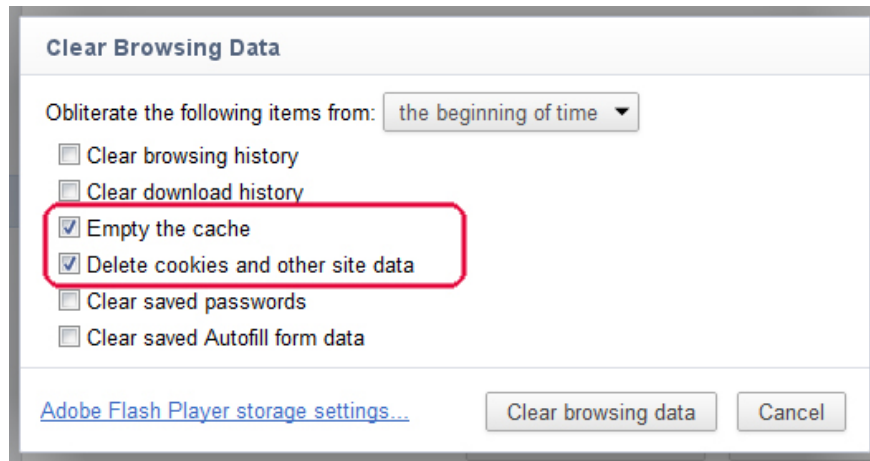

Way 1

On the original Under the Hood interface, in the *Privacy* section, select **Clear browsing data** .

Under the Hood

On the popup, you can select the data to delete: Browsing history, Download history Cache, Cookies and other site data, Saved passwords and Saved Autofill form data. In the purpose of this article, we will choose **Delete cookies and other data sites** and **Empty the cache** . Then click the **Clear browsing data** button.

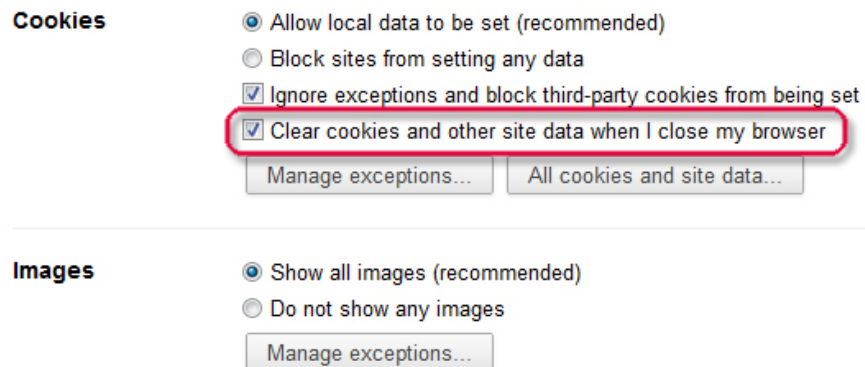

Method 2

In the *Privacy* section, you still choose **Content settings** .

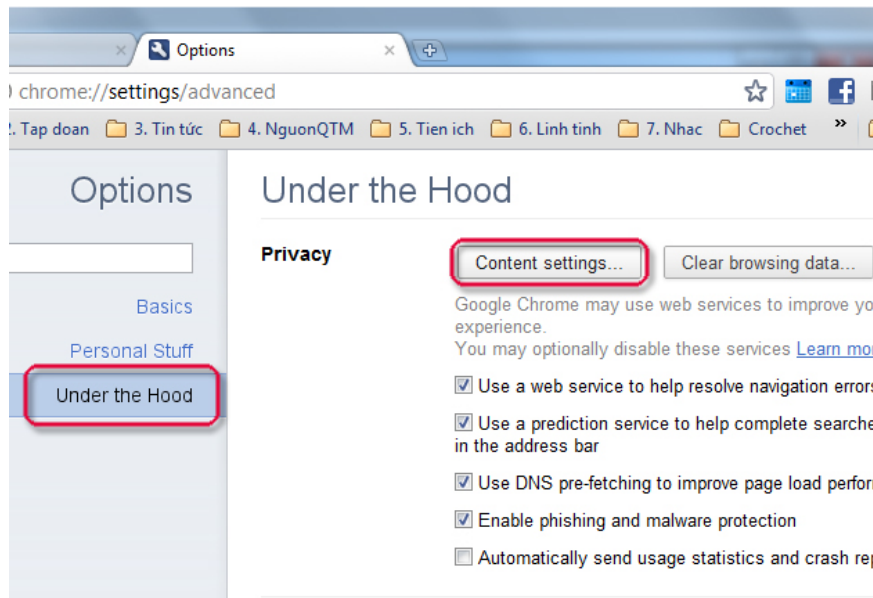

On popup *Content Settings* , click on **Clear cookies and other data sites when I close my browser** . With this option, Chrome will automatically delete cookies every time you close your browser.

Content Settings

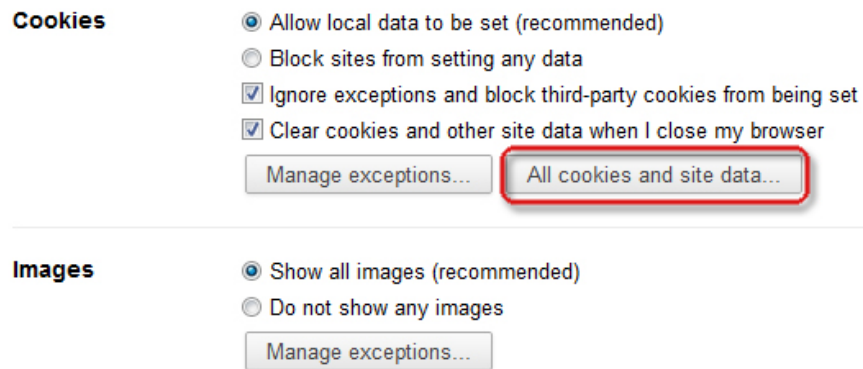

Method 3

On the *Under the Hood* interface, in the *Privacy* section, you select **Content settings** .

On the *Content Settings* popup that appears, click **All cookies and site data** .

Content Settings

On *Cookies and Other Data* , select **Remove All** , then close all windows.

Cookies and Other Data

Safari 5

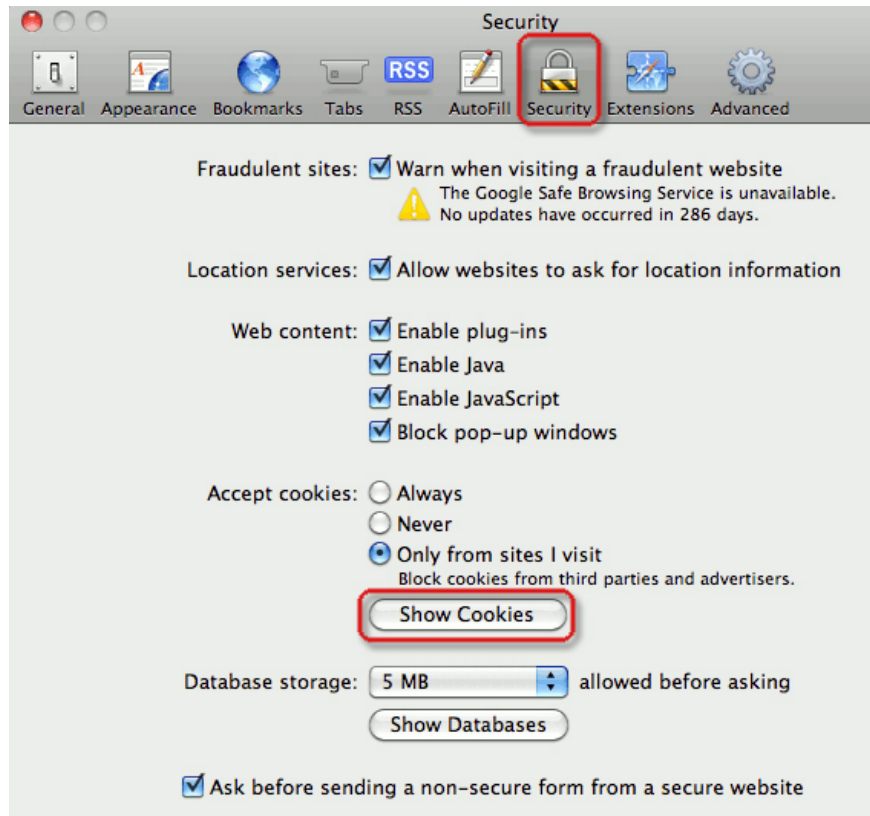

Open Safari browser on your computer (Mac OS X)

In the top menu bar, select **Safari** > **Preferences** . If you use the keyboard, you can press the **Apple** + key (,) at the same time.

On the opened *Preference* window, select the **Security** tab. This tab contains security options for Safari.

On this tab, you will see a button labeled **Show Cookies** , click this button

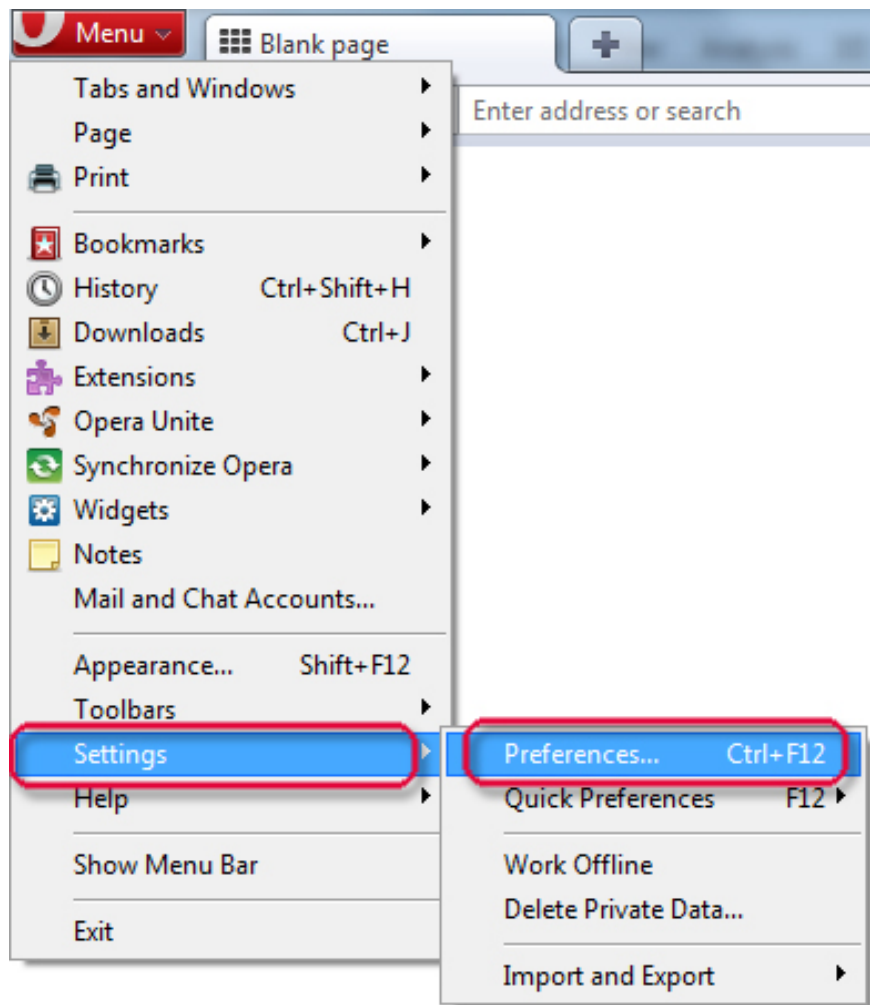

On the new window that appears, click **Remove All** to delete all browser cookies.

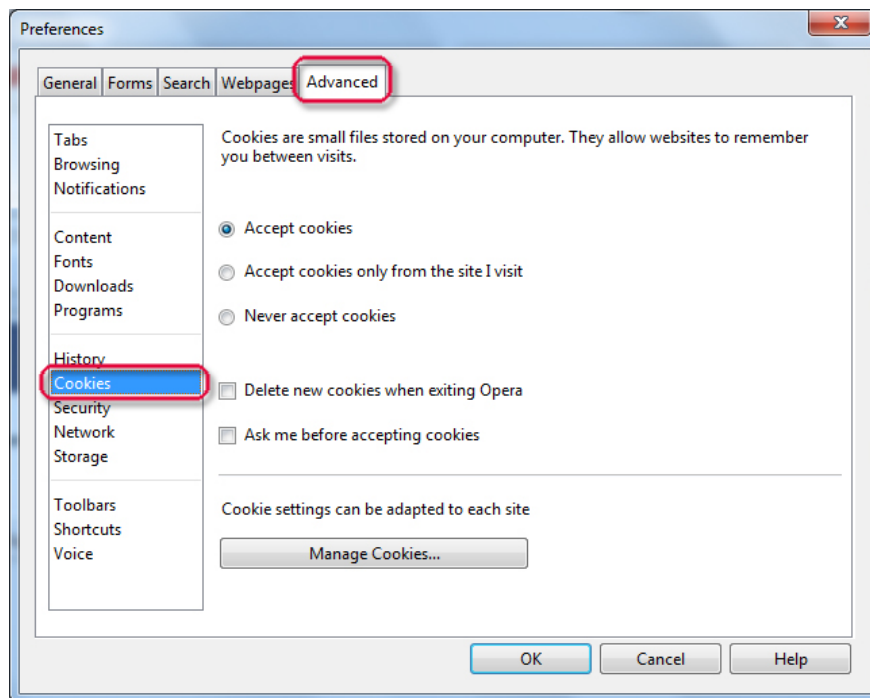

Opera 11

Open Opera browser

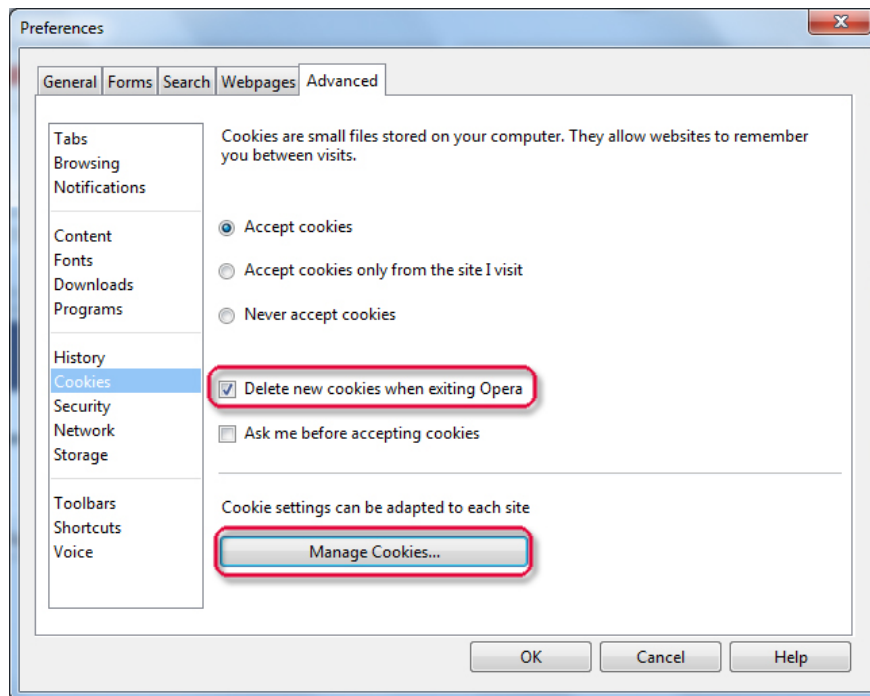

Go to the Menu section at the top left corner of the browser window, select **Settings > Preferences** . (or press **Ctrl + F12**)

On the *Preferences* window, select the **Advanced** tab, select **Cookies** in the left pane.

In the right options, select **Delete new cookies when exiting Opera** , then click **Manage Cookies** .

Select and **Delete** each Cookies, then click **Close** to close the Manage Cookies window.

If you regularly delete cookies, you will see your browser running faster and smoother. Depending on how long it does not clean the crap, you may feel the difference across the system with just one simple task.
