

Delete iPhone wallpaper extremely quickly with a few simple steps

Deleting the iPhone wallpaper and changing the wallpaper is not difficult, you just need to perform a few operations on the screen. Today's article will show you detailed instructions on how to delete iPhone wallpaper very simply.

How to delete iPhone wallpaper in iOS versions from 16 and above can be done right on the lock screen. This will help you save a lot of time when you want to change your phone screen without having to access the settings. If you still don't know how to do it, please refer to how to delete iPhone wallpaper extremely quickly below:

Step 1: First, turn on the iPhone screen and do not need to unlock it.

Step 2: At this lock screen, press and hold anywhere (about a few seconds), wallpaper options will appear.

Step 3: Now, swipe left or right to select the wallpaper you want to delete. After selecting, swipe that wallpaper up. At this time, the screen will display the trash icon, click on it.

Step 4: Select Delete this wallpaper to confirm deletion. After deleting the background, you just need to select another wallpaper to replace it immediately.

After deleting the background image, you can also reset it in the settings if you want, as long as you still keep the original image.

How to delete iPhone wallpaper simply and quickly. Hopefully the above information will help you have more interesting experiences on your iPhone.
