

Delete saved places on Google Maps and Google Now

However, when you don't need to use those locations, you don't know how to remove the old location and replace it with the new one. If you are in this situation and do not know how to handle it, please refer to our following article.

Google Maps is an application that provides a visual route for users through the Get Directions feature. There are 4 options to move depending on the region, which is driving, using public transport (bus, subway .), walking or cycling. Combined with Google Street View, Google Map helps you look up more useful information such as parking, lane changes, 1-way roads . for reference before starting the perfect route.

Usually in the process of using the map, to facilitate the search process, we often choose to save automatic locations in Google Maps. However, when you don't need to use those locations, you don't know how to remove the old location and replace it with the new one. If you are in this situation and do not know how to handle it, please refer to our following article.

How to delete saved places on Google Maps and Google Now as follows:

Step 1:
