

# Delete the SkyDrive Pro command in the right-click menu

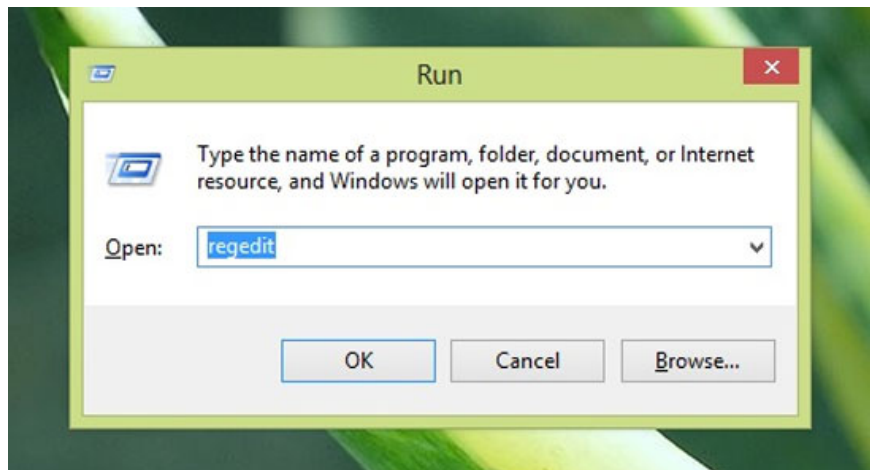

When you install and use the Microsoft Office 2013 suite, your right-click menu will appear to add the SkyDrive Pro command. This option always appears in the right-click menu every time you click to manipulate any file and folder, but it will be useless if you don't use Office's SharePoint application.

**When you install and use the Microsoft Office 2013 suite , your right-click menu will appear to add the " SkyDrive Pro " command. This option always appears in the right-click menu every time you click to manipulate any file and folder, but it will be useless if you don't use Office's SharePoint application.**

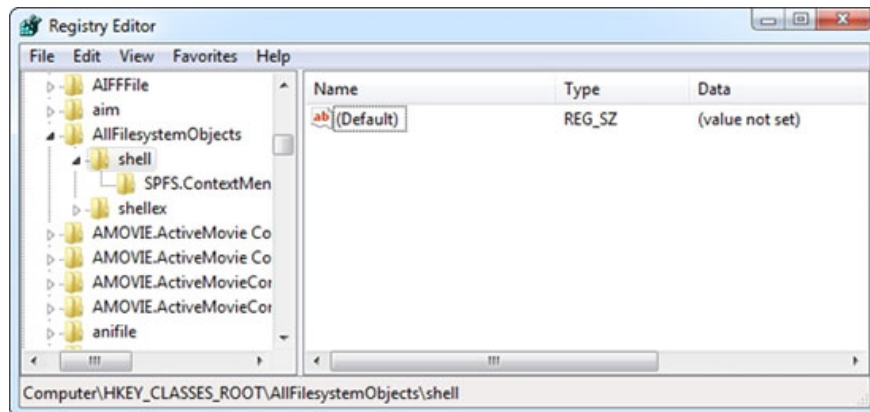

*So how to remove this option? Please refer to the following instructions.*

Call the Windows " **Run** " dialog box using the **Win + R** shortcut key combination and fill out the " *regedit* " command to call the " **Registry editor** " dialog box.

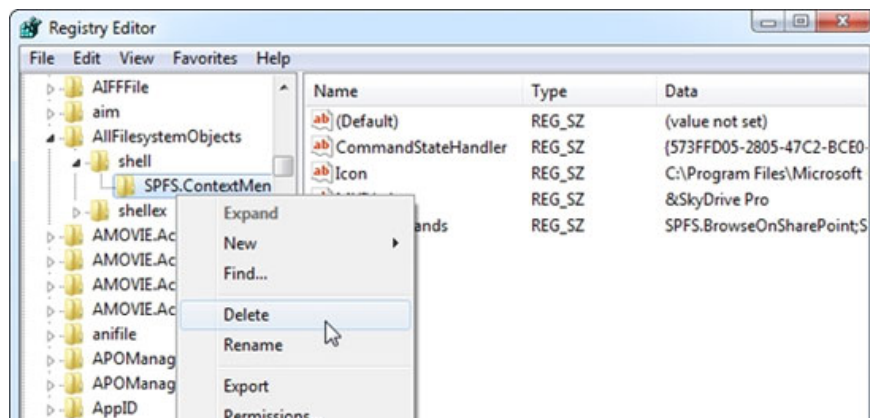

The **Registry editor** dialog box appears, you find the path:

' *HKEY\_CLASSES\_ROOT\AllFilesystemObjects\shell* '

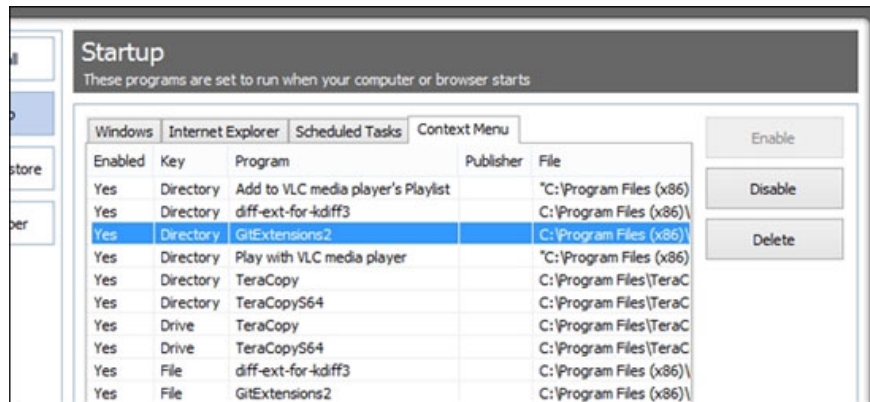

Expand the **shell** folder, we will see the command " *SPFS.ContextMenu* ", right-click this command folder and select " *Delete* ".

So you have completely removed the " *SkyDrive Pro* " option in the right-click menu.

Use " *CCleaner* " to remove some unwanted options in the right-click menu.

Similarly, you can use the " *Context menu* " feature in **CCleaner** 's " *Tools* " tool group to remove the SkyDrive Pro option or other unwanted options in the right-click menu.

This way will be much simpler for readers.

Good luck!
