The revealed photos clearly show the title of "the world's thinnest laptop", with a thickness of 9.99 mm on the Dell Adamo XPS.

Dell Adamo XPS "super-slim" XPS laptop is less than 1 cm thin, with LED-backlit screen 13.4 inches 720p resolution. It comes with an ultraportable configuration using the 1.4 GHz Intel Core 2 Duo CPU, Intel GS45 chipset, 4GB DDR3 RAM, 128 GB SSD hard drive, running Windows 7 Home Premium 64-bit operating system.

Despite being 9.99 mm thin, it still has 2 USB ports and a DisplayPort port with full 802.11a / g / n Wi-Fi connection, Bluetooth 2.1. Comes with the machine also has external dongle boxes for LAN port, VGA, HDMI output port, optional DVD drive or Blu-ray drive, 2 250 GB HDD and 500 GB.

According to *Engadget* , Dell Adamo XPS is priced at 1,799 USD, about 32.4 million VND. Built-in removable Li-Ion 20 WHr battery ensures 2 hours and 36 minutes of continuous use. If switching to a 40 WHr battery included, the running time is up to 5 hours 17 minutes.
