Although it is not official information, it seems that the pair of Dell's new Studio XPS laptops will definitely appear with two new screen sizes of 15 and 17 inches. Sources from LesDelliens and Dell France said the two models will soon appear this year.

The duo includes the Studio XPS 15 and Studio XPS 17 (the design will be similar to the XPS 13 and XPS 16 as shown above) and uses the Intel Core i7 processor, Nvidia's discrete graphics card, and the specific model is unknown. .

The Studio XPS 15 will have up to 8GB of RAM, a 750GB hard drive while the Studio XPS 17 will be 16GB of RAM and a hard drive of up to 1.2TB.

Dell France does not provide any more information about these two models, this site only affirms that the

machine has a slim, beautiful design.
