

Dell launched three Windows 8 computers simultaneously

The XPS 10 works 20 hours on a single charge, the XPS Duo 12 has a flexible rotating screen and the XPS Oone 27 is equipped with a high-resolution screen.

The XPS 10 works 20 hours on a single charge, the XPS Duo 12 has a flexible rotating screen and the XPS Oone 27 is equipped with a high-resolution screen.

Dell has just introduced three new Windows computers at the IFA, Berlin (Germany) event including: XPS 10; XPS Duo 12 and XPS One 27. Price of all 3 models has not been announced.

XPS 10 runs Qualcomm's processor.

In particular, XPS 10 runs Windows RT operating system with 10-inch IPS touch screen HD resolution. It comes with a keyboard dock and has an impressive uptime of up to 20 hours on a single charge.

According to *Slashgear*, this model uses Qualcomm's processor, but it is unclear which model. The thickness of the XPS 10 is 10 mm. This model supports Bluetooth connectivity, Wi-Fi, microUSB and microSD card slot.

XPS Duo 12 has a flexible flip screen.

The XPS Duo 12 model uses a 12.5-inch Full HD touchscreen with Gorilla Glass glass, which can be rotated in a variety of dimensions. The exterior of the product is made of aluminum and carbon fiber. Users can choose different processor models for this model, the highest is Core i7.

Other specifications of the Dell XPS Duo 12 have not been announced yet.

Dell's all-in-one computer has a pixel count of 3.7 million units.

The XPS One 27 is Dell's all-in-one computer running Windows 8. The product is equipped with a screen resolution of 2,560 x 1,440 pixels with a number of pixels up to 3.7 million units. In addition, users can adjust the stand at different heights to suit the purpose of use.

Regarding hardware, this model uses Core i5 or i7 processor, 16 GB RAM, hard drive capacity up to 2 TB. In addition, users can choose Intel HD 4000 Graphics integrated graphics or Nvidia discrete cards with mSATA

flash drives. It supports connections like HDMI, Ethernet, Bluetooth 4.0 and USB 3.0.

As expected, Dell XPS One 27 can be sold for up to \$ 1,399 (about 29.1 million).

Actual photos of Dell XPS 10 and XPS Duo 12:

XPS 10 has an accompanying keyboard dock.

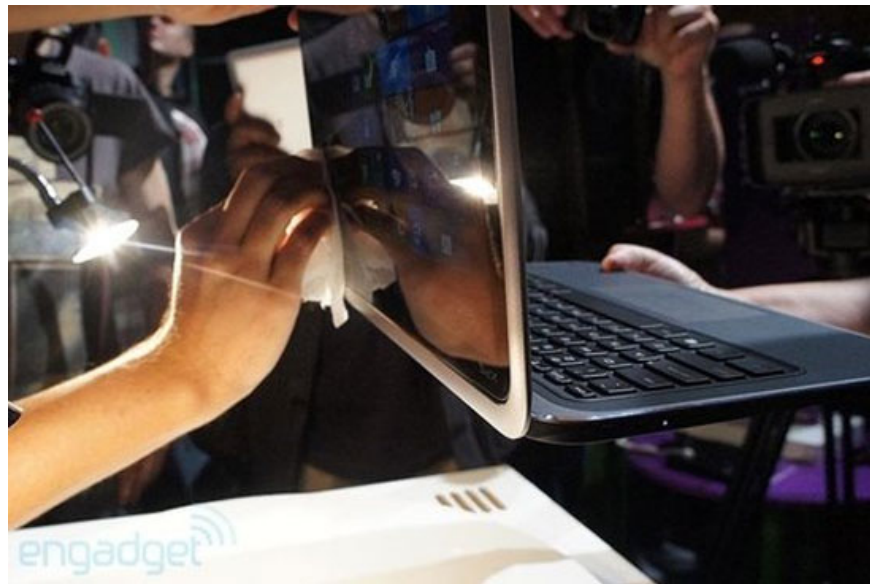

The 5XPS 10 is capable of operating up to 20 hours on a single charge.

Surrounding the rotating screen of the XPS Duo 12 is a metal frame.

Users can turn the screen backwards to operate.

The XPS One 27 uses a Core i5 or i7 processor, 16 GB RAM and a hard drive of up to 2 TB.

All products have no official prices.
