

## Dell released desktop 1TB, notebook

In a market-saving campaign, giant Dell unveiled two new Inspiron desktop models with up to 1TB of hard drive capacity. The side with them is the new 8 notebook models 'brilliant colors'.

**In a market-saving campaign, giant Dell unveiled two new Inspiron desktop models with up to 1TB of hard drive capacity. Standing side by side are 8 new notebook models "brilliant colors".**

With prices starting at \$ 249, two Inspiron 530 and 531 models are designed to be the entertainment hub of the family. As a result, they all have huge memory capacity and a quite stylish appearance, suitable for living room space.

Users can choose one or two 500GB hard drives for their system, which means the new Inspiron maximum storage capacity is up to 1 TeraByte.

Another plus is that these Inspiron models are equipped with no less than 8 USB ports. Some even have up to 10 USB ports, evenly distributed on the front, back and sides.

The included accessories and peripherals are very stylish and stylish, most notably the SE198WWFP with a flat screen of up to 19 inches.

For all Inspiron models, you can choose between a single processor or dual-core processor, as well as a choice between an Intel or AMD chipset. You are also free to decide the version of Windows Vista for your system: either Home Basic, or Premium, or Ultimate.

## **Rejuvenation**

In order to increase its appeal, Dell is about to launch a system called DataSafe. Users will be able to backup up to 30GB of their most important and important data onto Dell's server. These data are encrypted and stored in a separate "tunnel" that only you will have the remote access key.

In the past, Dell's laptops were always classified as "hard-working", ludicrous and lack of serious fashion.

Striving to change this "preconception", Dell has unveiled a new series of notebooks with 8 . different colors, including the brilliant summer tones of pink flamingo, summer sunshine, ruby ??red, night blue and milk coffee .

In the same period, Dell unveiled its first laptop model to use flash memory instead of a traditional hard drive. With a 32GB "range" capacity, this laptop model is quite "light weight".

The price of the most basic version is quite "affordable": 749 USD, much cheaper than the Sony or Apple fashion notebooks.
