

Dell upgraded Inspiron 14R, 15R to Ivy Bridge

The special version of these two laptops will be equipped with Ivy Bridge chips and available for distribution today.

The special version of these two laptops will be equipped with Ivy Bridge chips and available for distribution today.

The 14R, 15R special edition has a stronger configuration. (*Photo: NotebookCheck*).

Inspiron 15R is equipped with Core i7-3612QM processor, with up to 8GB of RAM, and a graphics chip on Full HD 1,920 x 1,080 pixel resolution of a 15.6-inch screen.

Meanwhile, the 14-inch Inspiron 14R is equipped with the same CPU but does not have the option of Full HD screen and is only equipped with NVIDIA GeForce GT640M graphics chip.

Along with equipped with new processors, Inspiron 14R and 15R duo have improved appearance with black with silver aluminum border at the edges.

New version has a better design. *(Photo: NotebookCheck).*

According to information posted on Dell's official website in Singapore, the new Dell 14R has a starting price of \$ 1,047, and 15R is priced from \$ 1,289. Both 14R and 15R are now ready to place orders on Dell.com and distribute free shipping in Asian countries. However, there is still no date information on this official version in other regions.
