Dell Inspiron 15 will be upgraded and launched on the upcoming CES2010. Photo: *Notebookcheck*.

Before CES 2010, a series of new product launches and updates were leaked, and this time it was Dell's turn. Although the manufacturer has not announced any plans to upgrade Inspiron 15 but on the *Costco.ca* sales website, there is a configuration information and a selling price for the device. According to the source, Dell's new product will use Intel Core i3 chip, 2.1 GHz (3MB L3 cache) based on Arrandale platform and will be sold by *Costco.ca* on January 17 for about 845 USD.

It is likely that users will be tested for the authenticity of the information at the CES technology fair tomorrow.

*Below is the configuration information of the new Inspiron 15 generation announced by Costco.ca.*

Processor 2.13 GHz Intel Core i3-330M (1066 MHz FSB, 512 KB L2 Cache, 3 MB L3 Cache) Chipset Intel HM55 Express Chipset RAM 4GB DDR2 RAM Card Intel GMA HD screen (500 / 667MHz) GP Display 15.6" Glossy TFT (resolution of 1366 x 768 pixels) Hard drive 320 GB SATA (5400 rpm) Connect ExpressCard 34 slot, 7-type memory card reader, RJ45, 3 USB 2.0 ports, VGA, Microphone in, Line out Network LAN 10/100, WLAN 802.11 Optical read / write CD-RW DVD ± RW 2 layers Size 244 x 39 x 343 mm Weight of about 2.6

kg.Incremental battery6 cell Operating system Windows 7 Home Premium 64 bitMore accessoriesWebcam 1.3 MP Price about 845 USD
