Manufacturer Dell has launched a new series of Vostro models using Intel's Ivy Bridge platform. The company's new products include Vostro 3360 13 inches, 3460 14 inches and 3560 15 inches.

Three new Dell products are equipped with anti-glare LED displays. In particular, the screen resolution of model 3560 can be up to Full HD. New generation Dell Vostro can use Core i3, i5 or i7 processors and RAM can expand up to 8GB. Users can choose to integrate 4G LTE connectivity for both 13 and 14 inch models.

The product uses anti-dazzling LED screen.*(Photo: Slashgear)*.

In addition, the manufacturer also allows the selection of either Intel HD Graphics 4000 or AMD Radeon HD 7670M integrated graphics with 1GB VRAM. In terms of basic configuration, all three new Vostro models will be installed with Windows 7, 4GB of RAM along with a 320GB or 500GB hard drive.

Currently, only information about the price of Dell Vostro 3560 is available. This product is priced from 599 USD to 1,289 USD.
