

## Dell XPS 13 Ultrabook sold in Vietnam on March 16

Dell's ultrabook model equipped with 4 GB RAM and 128 GB SSD drive and sleek but no information about the price.

**Dell's ultrabook model equipped with 4 GB RAM and 128 GB SSD drive and sleek but no information about the price.**

Dell XPS 13.

Dell's ultrabook will start selling in Vietnam from March 16. This product is also expected to be equipped with the configuration including Intel Core i5-2467M processor, 4 GB RAM, Intel HD 3000 graphics chip, 128 GB SSD hard drive. However, the price of this product has not been disclosed yet.

Dell XPS 13 starts selling in the US from today with the same configuration as above with a starting price of 999 USD. Higher options with Core i7 chips and SSDs with 256 GB capacity cost \$ 1,499.

Model ultrabook called XPS 13 was introduced by Dell at CES 2012 earlier this year. This product weighs about 1.35 kg. Dell's new Ultrabook has aluminum lid, frame made from carbon fiber and a tapered design on one side. The thickest part of the machine is 18 mm while the thinnest part is 6 mm.

The screen of the XPS 13 has a size of 13 inches, 300 nit brightness, resolution of 1366 x 768 pixels and Gorilla Glass coated glass. The included 47Wh battery allows the device to work for 8 hours. Intel's Ultrabook supports Bluetooth 3.0 with Intel technologies such as Smart Connect and Rapid Start. These two technologies make it possible for computers to automatically update information on web applications when the device is in " Sleep "

mode and resume operation after " *hibernation* " takes only 5 to 6 seconds.
