XPS 14 uses a screen resolution of 1,600 x 900 pixels with a brightness of 400 nit. This product has two versions. In terms of configuration, both models use 8GB RAM, 500GB hard drive, 5,400 rpm and 32GB SSD or 512GB SSD.

The more advanced version is capable of supporting broadband connection thanks to Dell's NetReady technology along with Nvidia GeForce GT 630M graphics card. The lower model is only equipped with Intel HD Graphics 4000 graphics. The manufacturer said that the built-in battery makes the XPS 14 work continuously for 11 hours. This product has a starting price of \$ 1,099.

Next is the XPS 15 using 1,920 x 1,080 pixel resolution screen which is Gorilla Glass-coated glass and weighs 5.79 pounds (about 2.62kg). It is equipped with DVD-RW or Blu-ray drive with 16GB RAM and 1TB hard

drive. Users can choose one of two Nvidia GeForce GT 630M graphics cards with 1GB VRAM or GeForce GT 640 with 2GB VRAM. The starting price of this model is 1,299 USD.

The connection ports are located on the left side of the machine.

The product uses chiclet keyboard with bright assist lights.

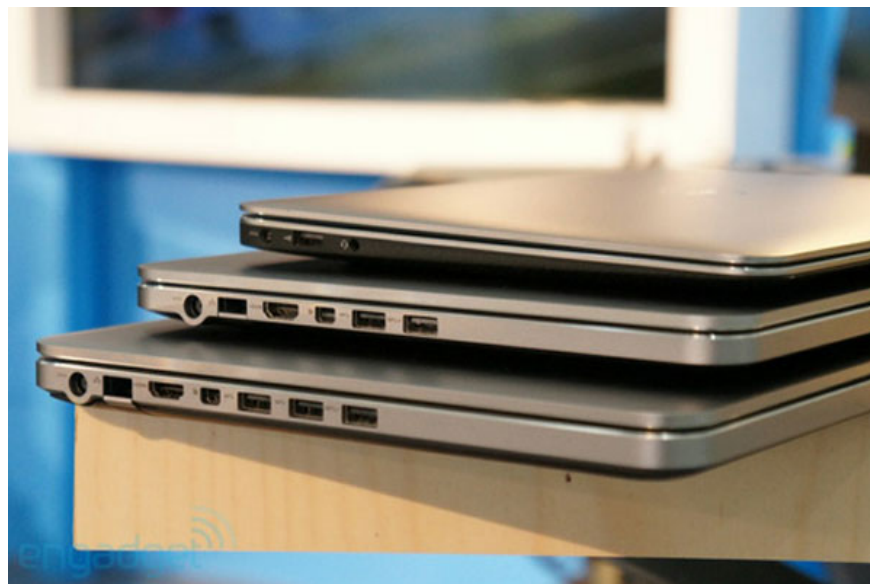

The right side must contain the drive and headphone jack.

From top to bottom are XPS models 13, 14 and 15.

The 13-inch model was introduced earlier this year.

Design slightly different port between XPS 14, 15 and "juniors".
