Dell Studio 14z is Dell's new laptop with the design of Studio series, beautiful and fashionable. It has a 14-inch screen, 16: 9 ratio, LED technology with 2 options with 720p resolution (1280 x 720 pixels) and 900p (1600 x 900 pixels).

This model is equipped with an Intel Core 2 Duo T9550 2.66 GHz processor (FSB 1066 MHz, 6 MB L2 cache), 5 GB DDR3 RAM, 500 GB hard drive. Popular connections include standard Wi-Fi n, optional WWAN, Bluetooth 2.1.

It has HDMI, DisplayPort, IEEE1394a and e-SATA cum USB ports that support charging when the device is turned off. However, Studio 14z has no optical drive. One of the impressive is the machine equipped with GeForce 9400M G graphics card, strong support for image and video processing.

Machine with chiclet keyboard, buttons are separate, but lack of leather cover like many Studio XPS laptops and touch control keys. Selling price starts at 649 USD (nearly 12 million VND).
