

Dell's new Inspiron R line costs only 449 USD

In addition to Intel Core i3, i5 processor options, the Inspiron R series is also equipped with Wireless Display wireless high-definition video signal technology.

In addition to Intel Core i3, i5 processor options, the Inspiron R series is also equipped with Wireless Display wireless high-definition video signal technology.

With a price of only 449 USD (according to Dell's website), users can choose the new laptop line of this product with 5 colors: black, pink, red and blue with screen sizes of 14, 15 and 17 inch HD resolution standard.

In addition to the Core i processor, the Dell Inspiron R series is also powerful with the option to upgrade DDR3 RAM to 8GB, 640 GB hard drive, ATI discrete graphics card with 1GB VRAM and SRS Premium Sound speaker system.

The most special feature of this product line is that despite being quite cheap, it is equipped with Intel's Wireless Display technology to help broadcast wireless high-definition video signals to TVHD.

Surface in scratched aluminum is a new trend in the design of manufacturers.

Touchpad.

The 15 and 17 inch models own a full keyboard with the right side number pad.

SRS Premium Sound speaker system.

Upper surface with glossy plastic cover.

Next to the optical drive.

Three models of Inspiron R series with screen sizes of 17, 15 and 14 inches respectively from left to right.
