

# Detailed review of ASUS TUF Gaming A15: Too good for the price

With a price of only 17 million, ASUS TUF Gaming A15 has a pretty impressive configuration, with Ryzen 5 7535HS, RTX 2050 4GB graphics card and 2 versions of 8/16GB RAM.

*With a price of only 17 million, ASUS TUF Gaming A15 has a pretty impressive configuration, with Ryzen 5 7535HS, RTX 2050 4GB graphics card and 2 versions of 8/16GB RAM.*

Although the market is not lacking in famous gaming laptops, ASUS still affirms its leading position with many diverse product segments for users. This is once again affirmed, because since the time ASUS TUF Gaming A15 was introduced, this 'warrior' has been searched a lot on media sites.

The 'bargain' price of 17 million VND can make users skeptical, especially gamers. Because they worry about whether this laptop is powerful enough to handle popular games or not. However, ASUS always knows how to 'pamper' users with reasonable adjustments, so that the TUF Gaming A15 is beautiful in both price and performance!

## Play any game with ASUS TUF Gaming A15

Although it must be affirmed that the Ryzen 5 7535HS combo, RTX 2050 4GB graphics card, 8/16GB RAM is not enough to max out heavy games like Cyberpunk 2077, Helldiver II., but it is more than enough for you to

handle all the top eSports games today. League of Legends, Valorant, PUBG, Overwatch,. are all 'defeated' easily.
