

Details about OS X 10.8 Mountain Lion

The next generation Mac operating system is OS X 10.8 Mountain Lion with iMessage application, Notification Center, integrating both Game Center and AirPlay.

On February 16, Apple announced details of its next-generation Mac operating system version, OS X 10.8 Mountain Lion.

Notable new features introduced by Apple in the new Mac desktop operating system include the iMessage application (first introduced on iOS 5 mobile platform) and the Notification Center.

With the aforementioned features, it can be seen that Apple intends to make OS X more similar to the iOS operating system, thereby making the public believe that there will be a release date of OS X version of the screen. desktop application.

In addition, OS X 10.8 Mountain Lion also integrates Game Center, AirPlay, enhances support for iCloud services and some redesigned apps.

After launching a preview of OS X 10.8 Mountain Lion for developers, Apple will release this operating system for users in the summer.
