

Details of Fantasy Mode PUBG mode

Here are a few things about Fantasy BR mode like new skins, classes in Fantasy BR Mode, new Dragon Island maps ...

The new skin is somewhat mythical in PUBG

While gamers have not yet received the refreshed Vikendi, there has been a series of images representing the new mode that will be updated by Bluehole in the next update of PUBG.

Before that, images of new outfits had been revealed and many gamers mistook them for skins in ancient mythological games.

When the images of this skin were released in the PUBG gaming community. There have been a lot of different opinions yet. Many people expect this mode to be launched as soon as possible and see how it will work.

Still others say that this is just an April 1 April joke or the day of lying.

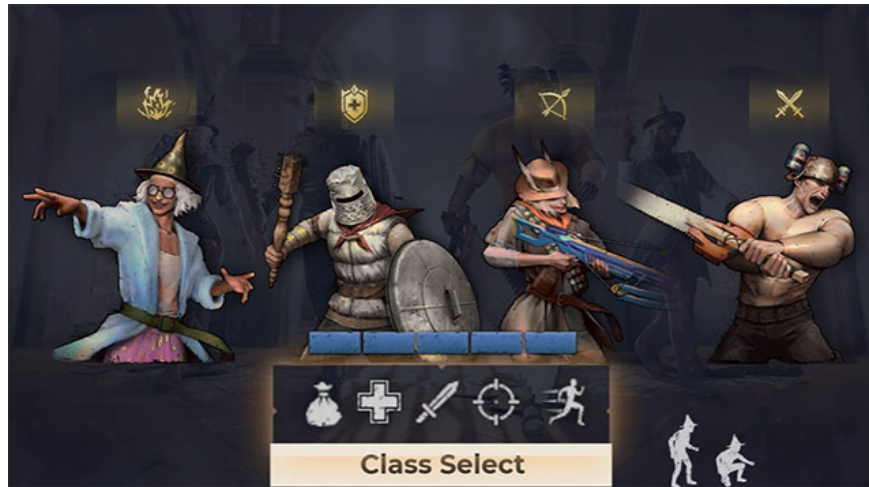

And recently, added images that make gamers believe that this will be a real new mode for gamers in PUBG that is a bit Fantasy.

The images of the unicorn head-mounted motorcycle, items such as level rings or level collars . make gamers believe that this will be an interesting mode to help players have the most special experience from before now.

In addition, we also have 4 character classes with different symbols attached. Below is an outfit based on each class and some information about each class.

Along with the above information about Fantasy BR Mode, the player also discovers a story printed on the skin of the new parachute.

The story has the following content:

"Once upon a time, warriors fought with an ancient dragon that destroyed cities, in search of hidden treasures. Before dying, the dragon cursed those treasure hunters, causing the greed of each person becomes extremely strong. The warriors suddenly turn their backs on each other and fight until there is only one left left. "

"To this day, a metal iron bird flying in the sky (meaning airplanes) carrying warriors to the dragon island is once again looking for treasure . but first they have to survive together."

Through the above story, we can believe that the refreshed Erangel map in this mode will be Dragon Island. Not much is known about this Fantasy mode yet, but you will have a crafting system and, along with that, a stat boost for your character.
