

Detecting tremors about the ancient Egyptians confused the scientific world

Recently, when analyzing ancient Egyptian mummies, the experts were astounded to discover the existence of cocoa and tobacco. Is this evidence of a journey across the ocean 5,000 years ago?

Recently, when analyzing ancient Egyptian mummies, the experts were astounded to discover the existence of cocoa and tobacco. Is this evidence of a journey across the ocean 5,000 years ago?

1. Great Pyramids of Giza and 4 mysterious anomalies have no solution
2. Found how the ancient Egyptians used to build pyramids?
3. "Eccentric" things are only available in ancient Egypt

German doctor Svetla Balabanova, was shocked to see the results of an analysis of the ancient Egyptian king mummy DNA with nicotine and tetrahydrocannabinol. And they are used to preserve mummies over thousands of years.

Surprised by the results, Balabanova conducted several tests, even sending samples to other laboratories for independent testing. All analysis received the same results.

The ancient Egyptian mummy contained substances such as nicotine and tetrahydrocannabinol at a high level, making the experts curious. They wondered where the ancient Egyptians took cigarettes?

To find evidence of this new discovery, another team of experts examined Egyptian mummies in a museum in England to find traces of nicotine.

Finally, experts realized that cocoa and cigarettes that ancient Egyptians could use were actually extremely rare plants from Africa, not from South America. This forced them to reconsider: Is tobacco and cocoa true from South America?

Now scientists are still very confused, they do not know what to do to explain these controversial results and answer questions, thousands of years ago the ancient Egyptians could go to America. how.

But many researchers agree that the new finding is irrefutable evidence that ancient Egyptians were involved in products of American origin.
