Oil heaters help effectively warm when it is cold for families with young children, newborn babies, the elderly and sick people.

Oil heater Tiross 9 bar, 11 bar, 13 different thermal bar how?

The popular Tiross oil heaters on the market today vary in the number of heating rods:

1. **Oil heater Tiross 9 bar thermostat:** has 9 heat bars
2. **Oil heater Tiross 11 heat bar:** has 11 heat bars
3. **Oil heater Tiross 13 heat bar:** there are 13 heat rods

The number of heat bars of different machines will affect heating capacity and product cost. The more heat the machine has, the greater the heating capacity, the higher the cost.

Tiross 11 bar TS9211 oil heater has 11 heat bars, is designed to be easy to move and has an LCD screen to monitor the temperature.

Should choose to buy oil heater Tiross 9 bar, 11 bar, 13 heat bar?

Because the oil heater has a simple structure and operation, the warmth radiates evenly without causing dry skin, causing no breathing difficulties, high safety, so it is suitable for families with elderly people, sick people, babies and babies. Many Tiross oil heaters also have the function of drying clothes, helping to heat clothes for babies so that they don't get cold or avoid rainy days without enough clothes for babies.

To choose Tiross oil heater 9 bars, 11 bars or 13 heat bars, you need to base on the heating area and the time to use the machine:

1. Room has an area of less than 15 square meters or just need to use the machine at some time of the day (when you need to bathe or clean your baby .): should choose Tiross oil heater 9 heat bars with a heating capacity of 2,000 - 2,500W . These 9-heat oil heaters are priced at VND 1.7 - 2 million.
2. Room with an area of 15 - 20 square meters: should choose Tiross oil heater 11 heat bars with heating capacity of 2,200 - 2,500W. These 11-heat heating oil heaters cost 1.8 to 2.4 million VND.
3. Room with an area of 20 - 28 square meters: should choose Tiross oil heater 13 heat bars with a capacity of 2,200 - 2,800W. These 13-heat oil heaters are priced at 1.9 to 3.3 million VND.

If you buy a machine with a higher amount of heat than you need to use, it will consume electricity. Conversely, if the capacity of the machine does not meet the room area, the machine will have to operate continuously to reduce the life of the machine.

Oil heater Tiross TS9216 13 heat bar suitable for rooms with an area of 22-28 square meters.

What should be noted when using an oil heater?

Oil heaters often have the function of automatically disconnecting when overheating or some high-end machines also have a timer function, but during use, users should keep in mind some of the following to ensure safety and power saving. :

1. Place the device in a large space, not close to flammable, explosive objects, away from children.
2. Regularly check, make sure the machine's indicator light is working stably to know the status of the machine is turned on or off.
3. If using the machine for heating at night, it is advisable to turn off the machine 2-3 hours before waking up to save electricity because of the ability to keep the heat of the oil heater for a long time. *For example, if you wake up at 7:30, you can turn off the computer from 5 hours.*

Hopefully the above information has helped you better understand the general oil heater and Tiross oil heaters in particular, an efficient and safe heating device in the cold season.
