

# Disable or uninstall Edge browser extensions on Windows 10

However, installing and allowing too many extensions on the Edge browser will slow down your web browser. Therefore, if you want to improve Edge browser speed, you should uninstall the extensions that you no longer use or rarely use.

On Windows 10 Anniversary Update version has supported the extension (extension) for Microsoft Edge browser. Like other browsers - Chrome and Firefox, users can now install extensions on the Edge browser.

Although the number of extensions available to Edge browser is limited, in the future, it is likely that these extensions will be 'expanded' similar to those on Chrome browser and Firefox browser. .

Pinterest Save Button, Evernote Web Clipper, Save to Pocket, Translator, LastPass, Turn Off the Lights and Tampermonkey are extensions available on Edge browser.

However, installing and allowing too many extensions on the Edge browser will slow down your web browser. Therefore, if you want to improve Edge browser speed, you should uninstall the extensions that you no longer use or rarely use.

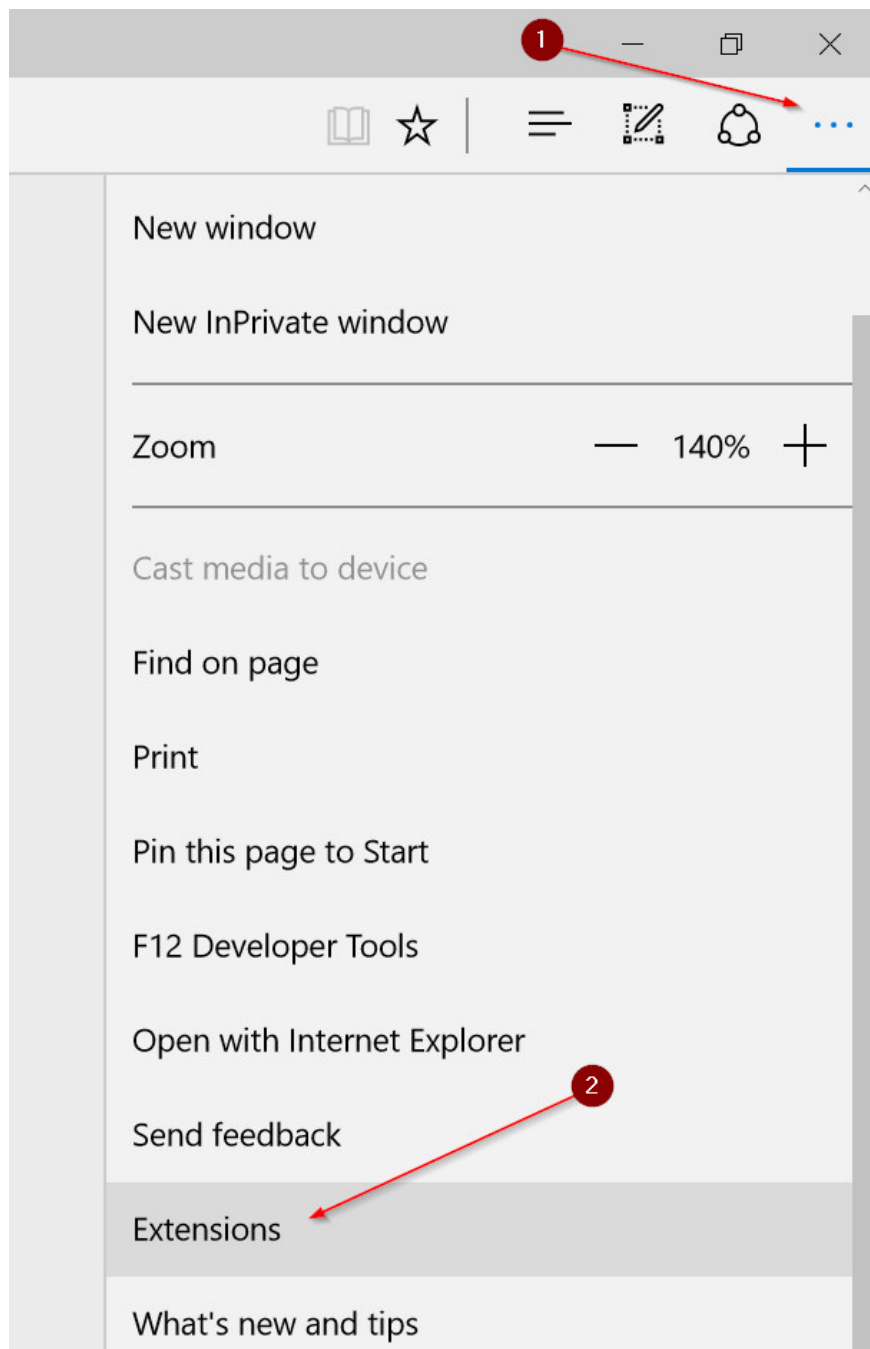

Disabling or uninstalling extensions on the Edge browser is quite simple and easy.

## 1. Disable the extension - the Edge browser extension

To disable the extension - the Edge browser extension on Windows 10, follow the steps below:

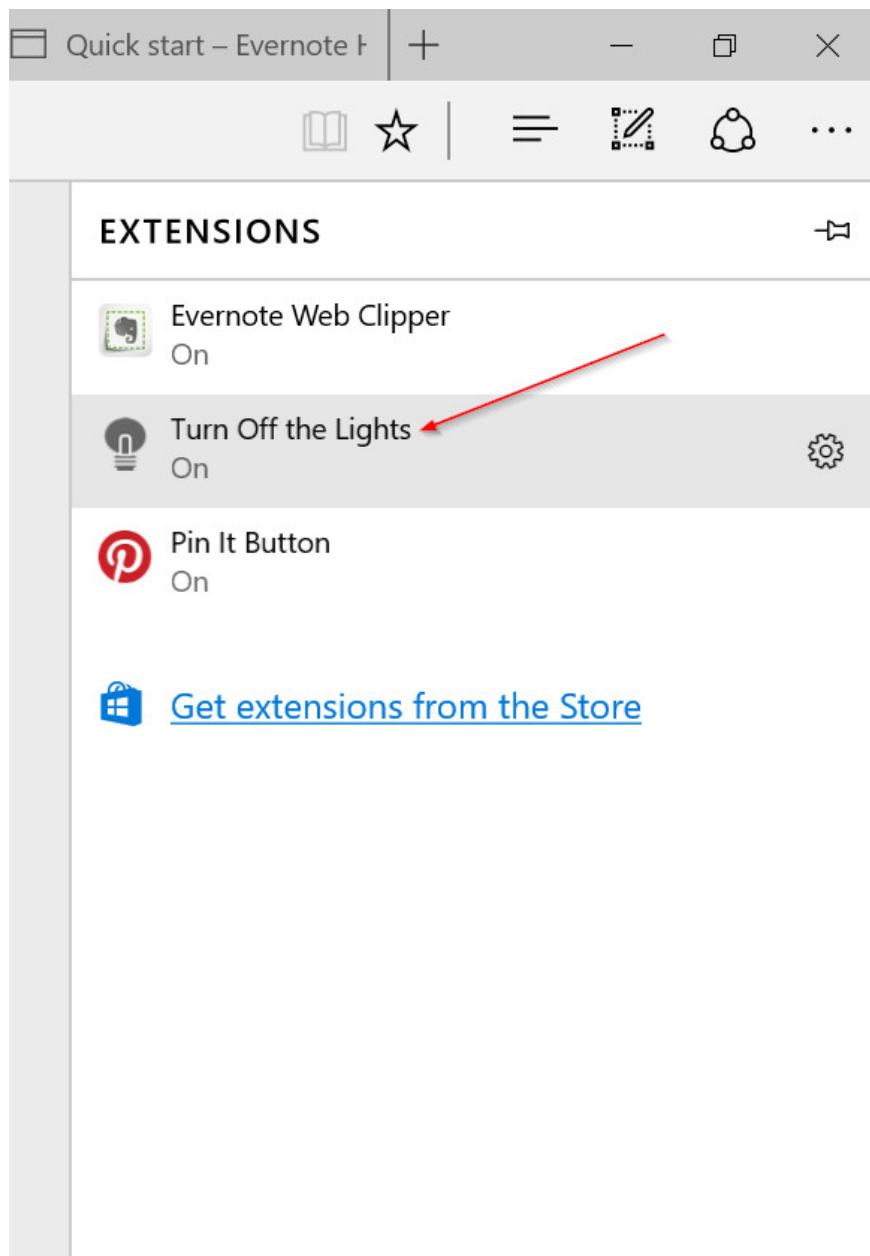

### Step 1 :

First open the Edge browser, then click the More icon (3 dots icon), then click **Extensions** to see all the extensions (extensions) installed.

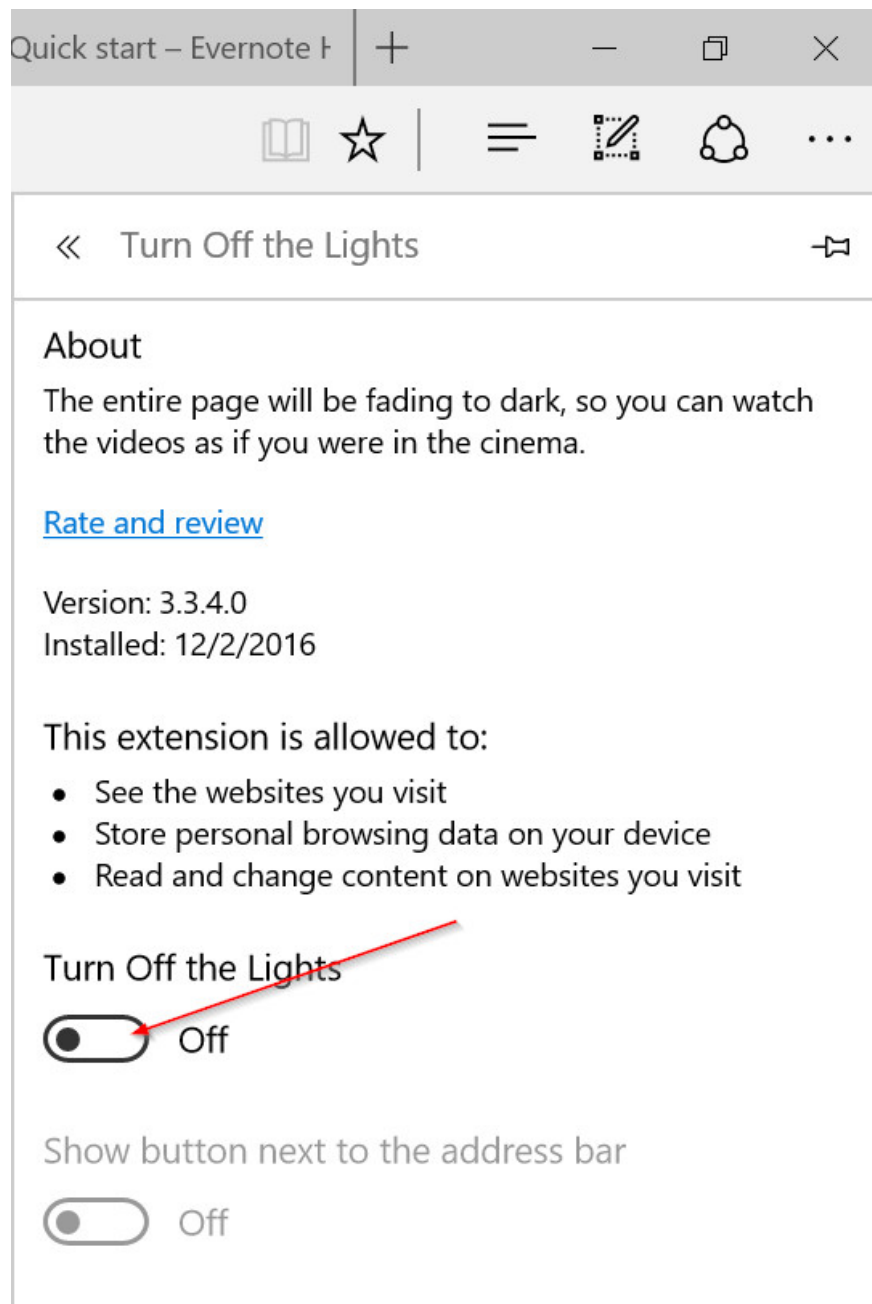

## Step 2 :

To disable or disable extension - extensions, click on the extension name to see the About table. For example, to disable Turn Off the Lights, click Turn Off the Lights.

### Step 3 :

At the name of the extension, you'll see a button to turn it off or on. Your task is to move the button to **OFF** to disable the extension.

To re-enable the open utility, simply switch the slider to ON and you're done.

## 2. Uninstall the extension - the Edge browser extension

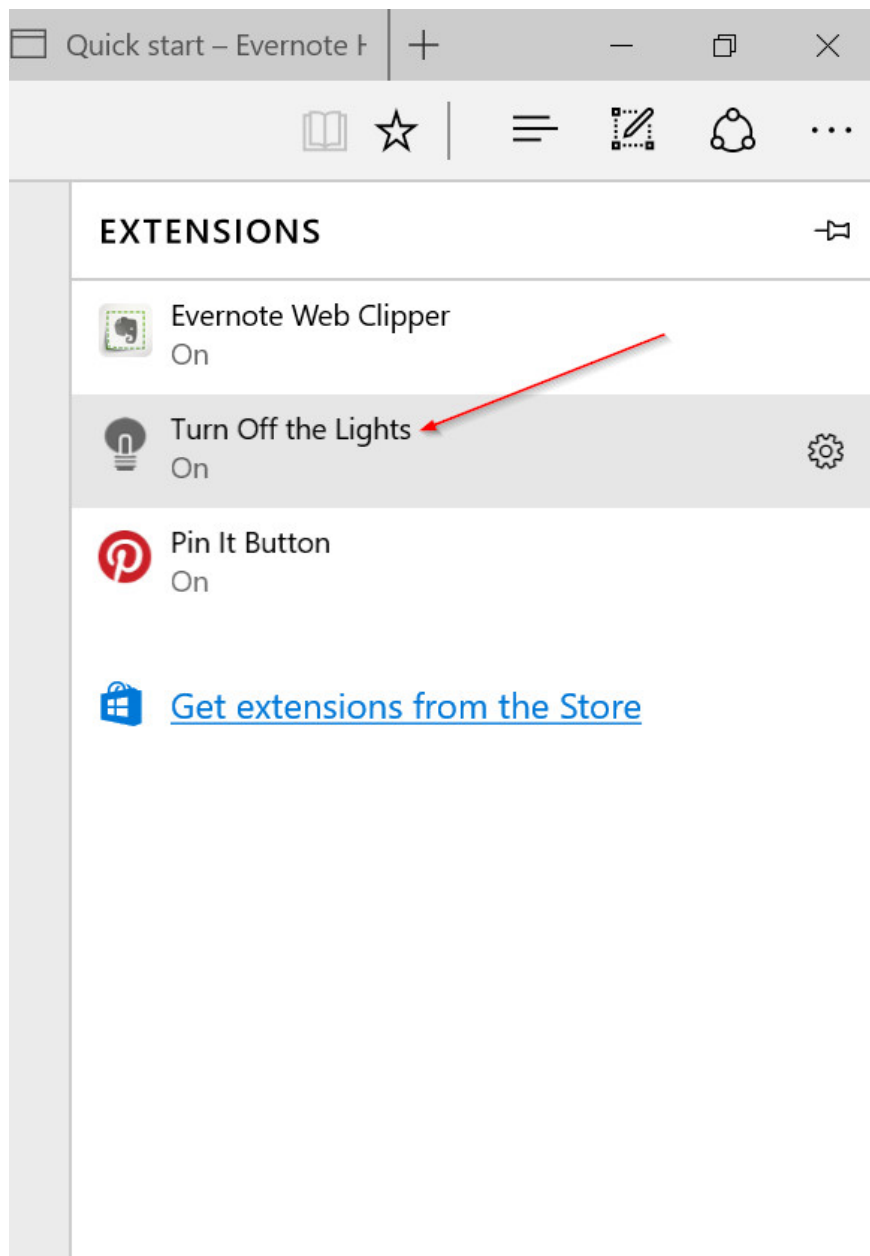

### Step 1 :

Open the Edge browser, then click the **More** icon and then click **Extensions** to see the extension panel - extension.

**Step 2 :**

Click on the extension name - the extension you want to uninstall to see the About table. The About table displays the version number and the date of the installation of the extension.

**Step 3 :**

Click the **Uninstall** button and then click **OK** if a confirmation dialog box appears to uninstall the extension.
