

Disable PDF reader functionality on Google Chrome.

The PDF reading feature on Google Chrome has been updated in recent versions. However, it struggles to function properly with large PDF files. Therefore, you should disable the PDF reading feature on Google Chrome to avoid frustration.

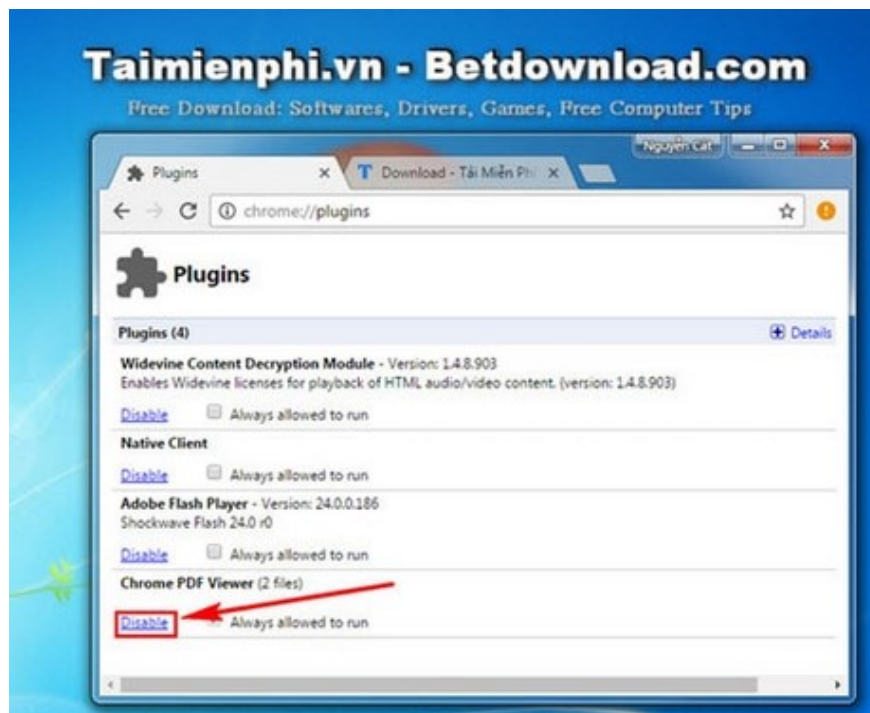

Both Google Chrome and Firefox have a feature that automatically views PDF files. If you don't need it, you should turn it off. The method for disabling PDF viewing in Firefox differs from Google Chrome. This is because Firefox doesn't use the Chromium source code, so the way to disable PDF viewing in Firefox is different from Google Chrome or C?c C?c. Read both articles to find out which method is easier for disabling PDF viewing in Google Chrome or Firefox.

Disable the PDF reader feature on Google Chrome:

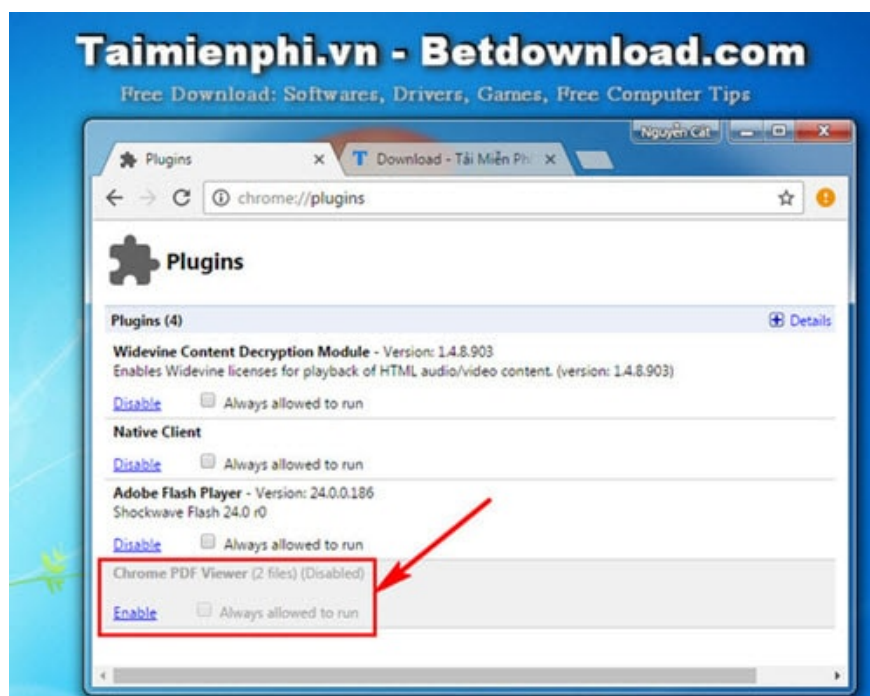

Step 1: Open the Google Chrome browser and enter the following command into the URL bar:
Chrome://plugins/

Step 2: Pay attention to the **Chrome PDF Viewer** plugin ; click **Disable** to turn this feature off.

Step 3: When Chrome PDF Viewer **turns gray** , you have successfully disabled the PDF reading feature on Google Chrome.

After completing those simple steps, you have disabled the PDF reading feature on Google Chrome. To re-enable it, simply click **Enable** .

On the C?c C?c browser, disabling PDF reading is similar to Google Chrome. The only difference is replacing Chrome://plugins/ with coccoc://plugins/. If your internet connection is strong enough, there's no need to disable PDF reading on Google Chrome; downloading CocCoc or Firefox is unnecessary .

Chrome and Firefox users should also install IDM in their Add-ons list for convenient downloading. With the IDM CC extension, simply enabling IDM CC on Google Chrome or Firefox will allow these browsers to automatically detect video and song links. Refer to the instructions on how to enable **and** disable IDM CC on Google Chrome for optimal use, supporting downloads without hindering your music or video playback.
