

# Disable search suggestions on Chrome and Safari browsers

Every time you type a search term into the address bar of Chrome or Safari, the browser will display suggestions for related search terms. With many users, this is a useful feature when they can expand their search. However, for many other users, it is uncomfortable about this because the information they seek is not central.

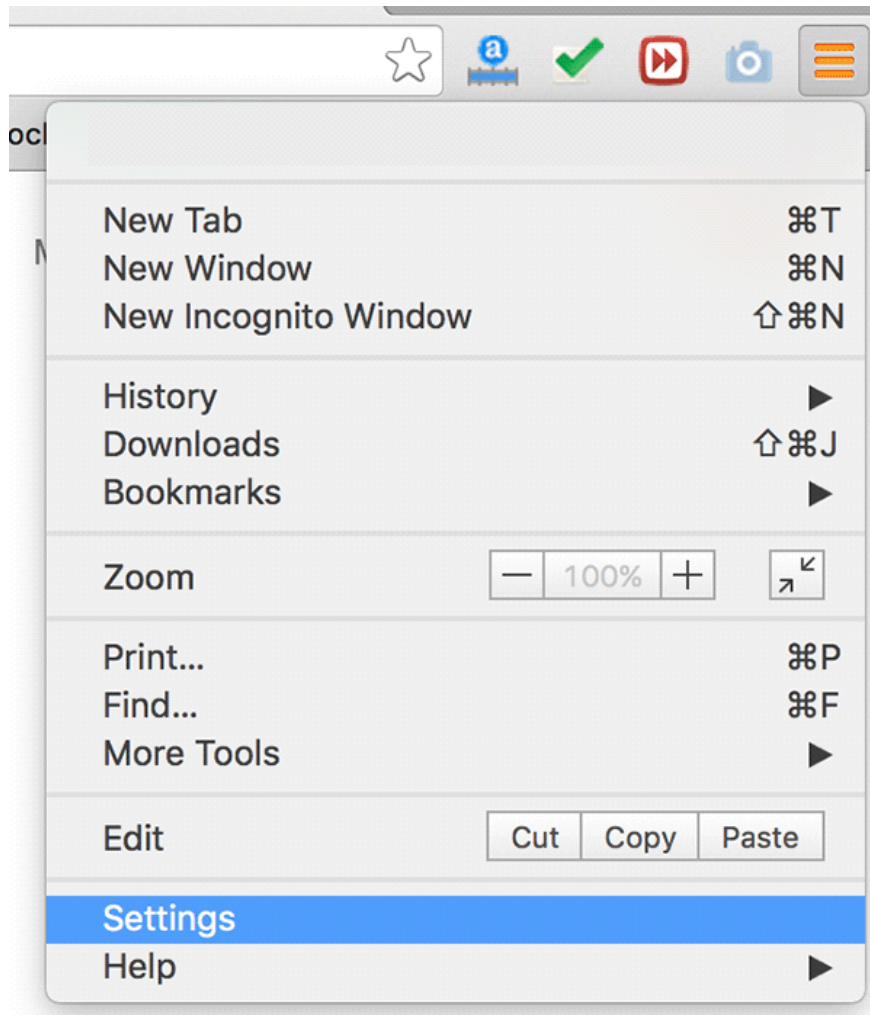

Every time you type a search term into the address bar of Chrome or Safari, the browser will display suggestions for related search terms. With many users, this is a useful feature when they can expand their search. However, for many other users, it is uncomfortable about this because the information they seek is not central.

So how to disable the search suggestions feature on Chrome and Safari browsers, invite you to refer to the following article of Network Administrator.

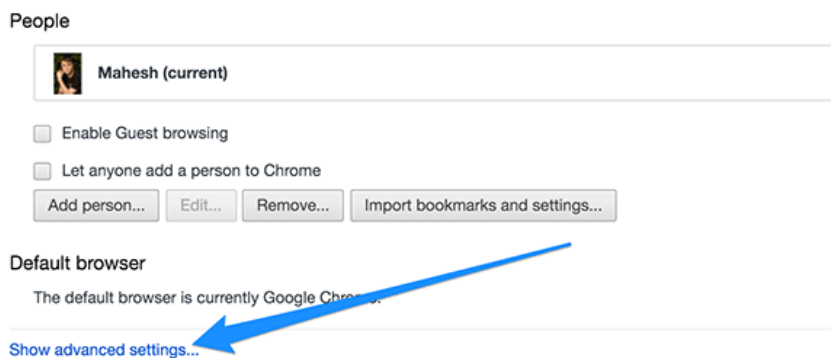

## 1. Disable suggestions for finding Chrome browser on the computer

1. Open the Chrome browser on your computer, then click on the 3 dash line icon in the top right corner of the screen and select **Settings**.

2. On the Settings interface, scroll down to find and select the option **Show advanced settings** . (show **advanced settings** ).

3. Under the **Privacy** section, you will see the option **Use a prediction service to help complete searches and URLs typed in the bar address or the search bo app launcher** . Your task is to leave this option unchecked.
