Some notable features included in the latest version of Office include real-time task content synchronization, syncing OneDrive for Outlook. Office 2016 Preview is compatible with Mac, iPad and Android tablets.

In the new version, Excel has been significantly improved. This program can now transfer workbooks to Microsoft Power BI, capable of displaying data in new rankings. In addition, the Power Query feature will allow you to use Excel to connect to a variety of data sources, such as Salesforce.

Clutter, a new Exchange feature that appears in Outlook 2016 is also worth your attention. This smart app has the ability to read your email template and adjust the display of more logical, scientific mailboxes. However, it is not the only smart application released by Microsoft in Office 2016.

For example, the Tell Me feature will allow you to search all Word, PowerPoint and Excel files exactly as you want, or the Insights feature provided by Bing makes it easy to look up that you are searching on the Internet.

Finally, Office 2016 comes with a number of security features, such as data protection, data loss, additional multi-factor authentication security, an important part of connecting people. Use Office together.

Currently, Office 2016 Preview is still in development. Not all features are released at the same time, but will be updated, added monthly. The full version is expected to be released at the end of 2015.
