**Microsoft has introduced Windows Phone 8, the latest version of its smartphone operating system to users. Windows Phone 8 offers a truly personal phone experience, connecting users with friends and the things that users care about most.**

The heart and soul of Windows Phone are dynamic blocks, called Live Tiles, only for Windows Phone operating system. Users can arbitrarily arrange application icons on the Start screen by pinning relatives, applications, music, games, images . in the way you want.

Live Tiles can be set up in three sizes with 20 bright color options according to the cobalt color spectrum, crimson and lemon colors - meaning users can personalize the Start screen in their own way. can be confused.

In addition to Live Tiles, Windows Phone 8 offers a host of new features for a fully personalized smartphone experience. Here are the new features, bringing convenience to mobile users.

### **Online application:**

Online Apps direct information on the Start screen, such as daily Groupon offers, flight information and news headlines . On Windows Phone 8, online applications like Facebook even You can also update real-time information on your locked desktop.

### **Windows Phone application store:**

Windows Phone Store has 120,000 applications to choose from, with hundreds of apps added every day. Online traffic is also very high in this period, such as Angry Birds Star Wars, Cut the Rope - Cut the Rope, Disney's Where's My Water, LivingSocial, Temple Run, Urbanspoon .

### **Kid's Corner - children's corner:**

Exclusive application of Windows Phone 8, Children's Corner is a free application to share your phone with your child. As a result, babies can play Angry Birds without texting, which affects the main user. Parents can hand the phone to their children without having to worry about the unmanaged photo gallery, contacts, or SMS or email, as well as random phone calls.

With just a few simple settings, parents can activate a separate space in the phone for children to play - complete with a customized Start screen - where they can access applications, games, and copies. Music and videos are selected by parents.

### **Rooms:**

The Rooms feature allows you to create separate groups for people with Windows Phone 8 and easily connect with them, for example, family members, close friends or passionate soccer groups. Chat, share calendars, shopping lists or photos of ongoing conversations that only invited people can join. You can also share some Rooms information with friends and family on another smartphone.

### **Data Sense:**

This new feature will help you surf the web and do more without worrying about exceeding the data limit. Data sense helps preserve data volume by compressing Web images, transferring to free Wi-Fi data and automatically adjusting user usage to closely follow their data limits. Data Sense feature also indicates the amount of data used for each application. Verizon will be the first Data Sense provider in the US.

### **Wallet and near-field communications:**

Windows Phone 8 brings the best technology to the collection of electronic wallets, including near-field communication (NFC) payments. Wallet feature can also store debit, credit, membership cards on user phones.

### **Stay connected, experience the ultimate Skype:**

New Skype applications, which will soon connect to Windows Phone 8, make it possible to make and receive Skype calls like a regular phone call. Just touch the image of a friend or family member in the People Hub, or just get a ringing phone, Skype is ready to connect users to the world.

It can be said that Windows Phone 8 is the best companion for Windows devices. With familiar core interface and technology, SkyDrive cloud service, Windows Phone 8 is built to work seamlessly with Windows 8 computer, Microsoft Surface and Xbox 360 screen. Edit a document while you're on the move with Windows Phone 8 and get it onto your computer when you get home.

Or access music tracks including your albums, songs and playlists, anywhere and anytime on Xbox Music. Create playlists that play music from your computer, hang out and play that book from your phone. All of this is possible on the Windows family.
