

Display saved passwords on web browsers

The password saving mode on browsers saves you a lot of time without having to type each account type anymore. But if you unfortunately have to reinstall the operating system or at least the web browser, you will miss the password because it doesn't have to be remembered for a long time. That leads to the possibility that you will have to set up a new account.

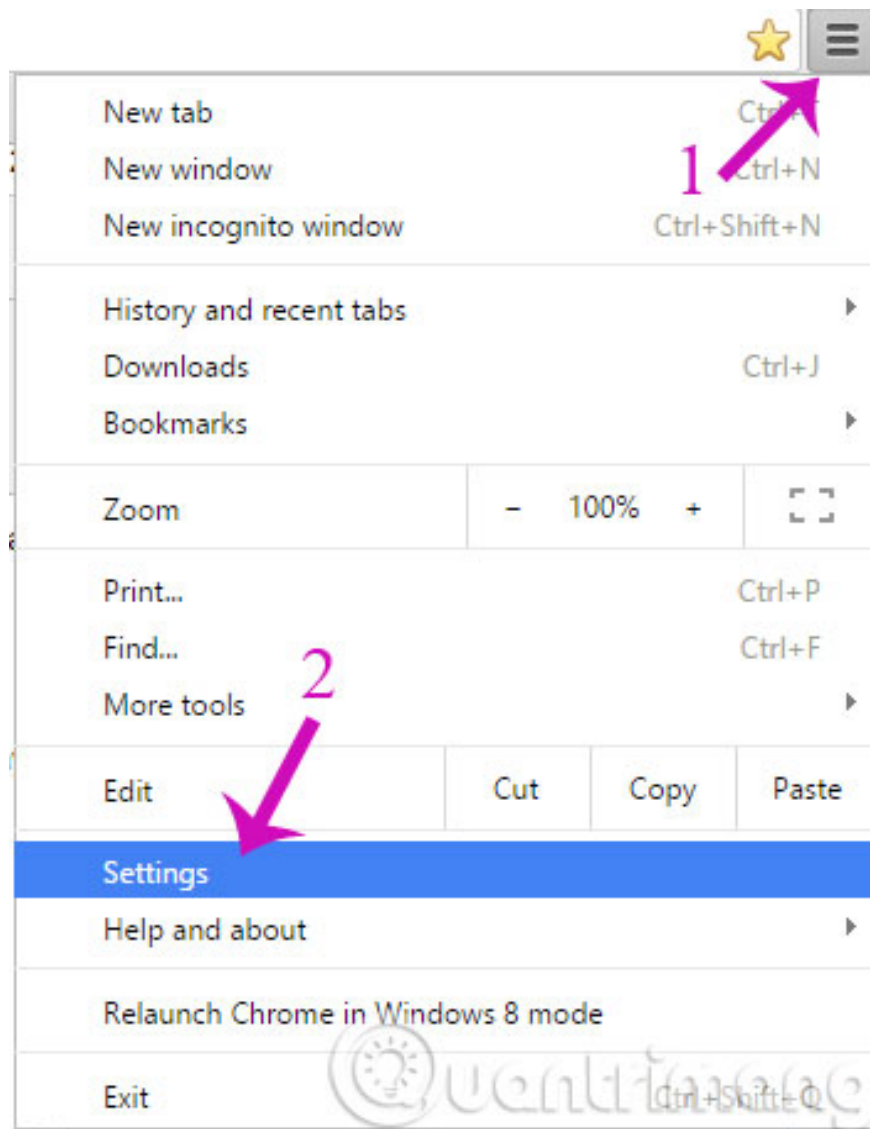

The password saving mode on browsers saves you a lot of time without having to type each account type anymore. But if you unfortunately have to reinstall the operating system or at least the web browser, you will miss "forget" the password again because it doesn't have to be remembered for a long time. That leads to the possibility that you will have to set up a new account.

To avoid falling into that "bad situation", it is best to record the account name and password to a notebook. In the article below, we will guide you how to display the password saved on the web browser if you unfortunately "forget" or remember.

Show password on Google Chrome

1. Download Google Chrome 46

Step 1 : Open your Chrome browser, click on the **3 dash** icon and select **Settings**

Step 2 : At the **Settings** page, you scroll down to the bottom and click on the link **Show advanced settings** .

Search

Set which search engine is used when searching from the [omnibox](#).

Google ▼ Manage search engines...

People

- Enable Guest browsing
- Let anyone add a person to Chrome

Add person... Edit... Remove... Import bookmarks and settings...

Default browser

The default browser is currently Google Chrome.

[Show advanced settings...](#)

Step 3 : In the **Passwords and forms** section , click on **Manage passwords**

Passwords and forms

- Enable Autofill to fill out web forms in a single click. [Manage Autofill settings](#)
- Offer to save your web passwords. [Manage passwords](#)

Web content

Page zoom: 100% ▼

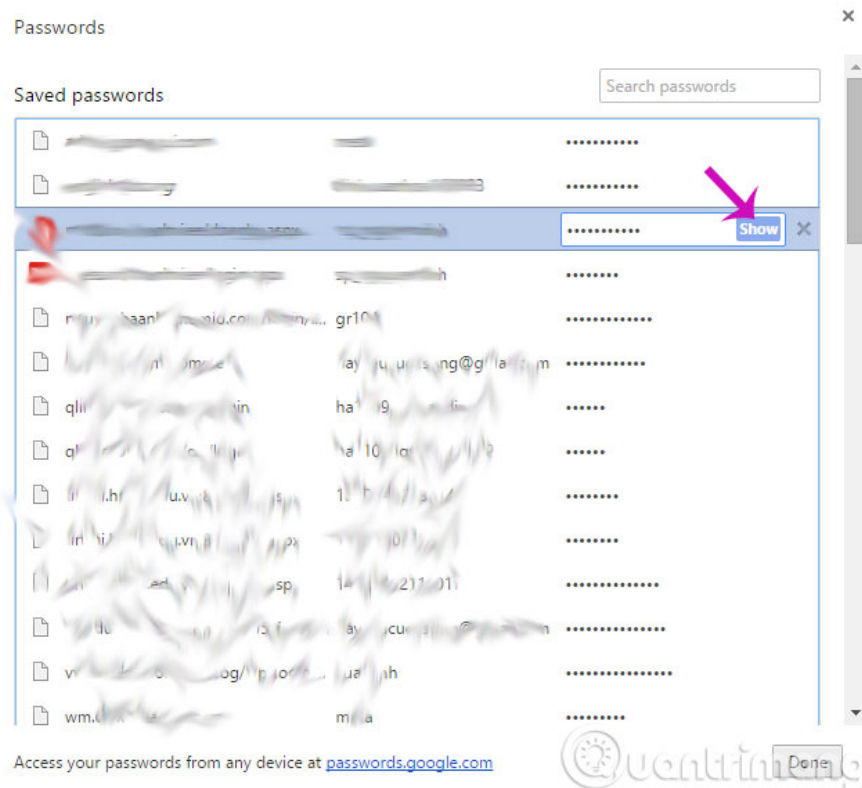

Network

Google Chrome is using your computer's system proxy settings to connect to the network.

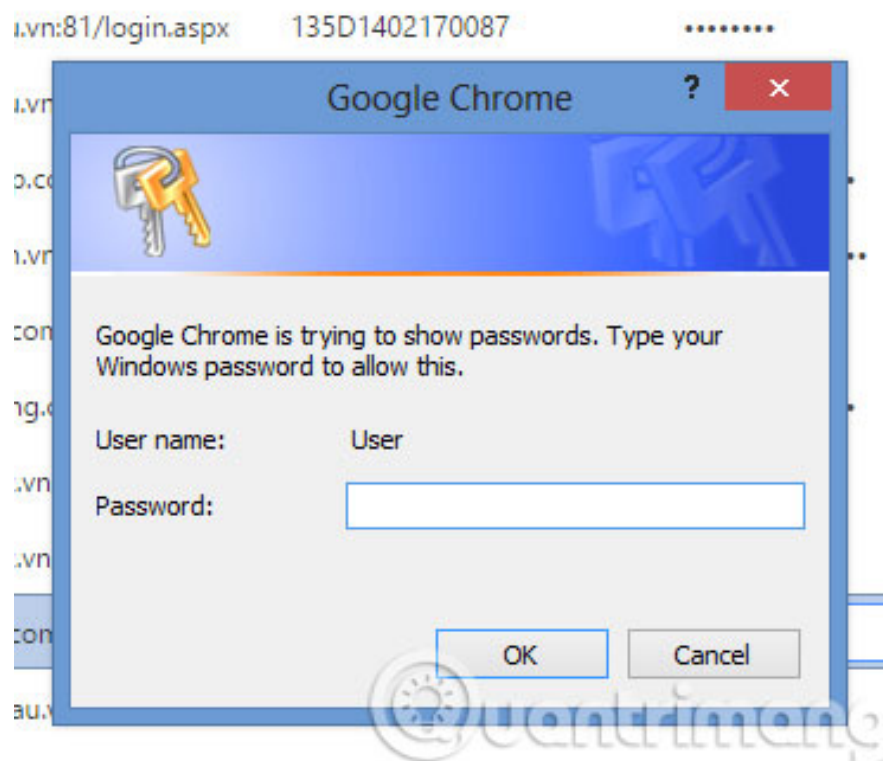

Change proxy settings...

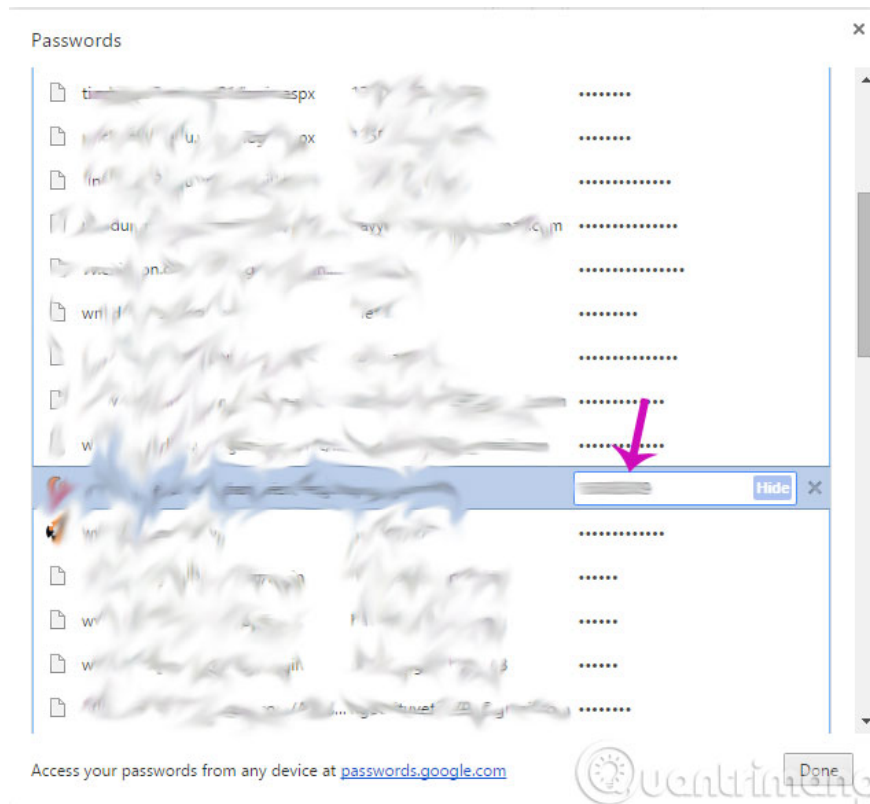

Step 4 : Appear the **Saved passwords** dialog box that includes web pages, usernames and corresponding passwords for each page. Which page you want to see, click that page. At this point, a small square will appear around the password display area. To view this password, click **Show** .

A message box confirming whether to show the password? You enter the machine's User password and then click **OK**

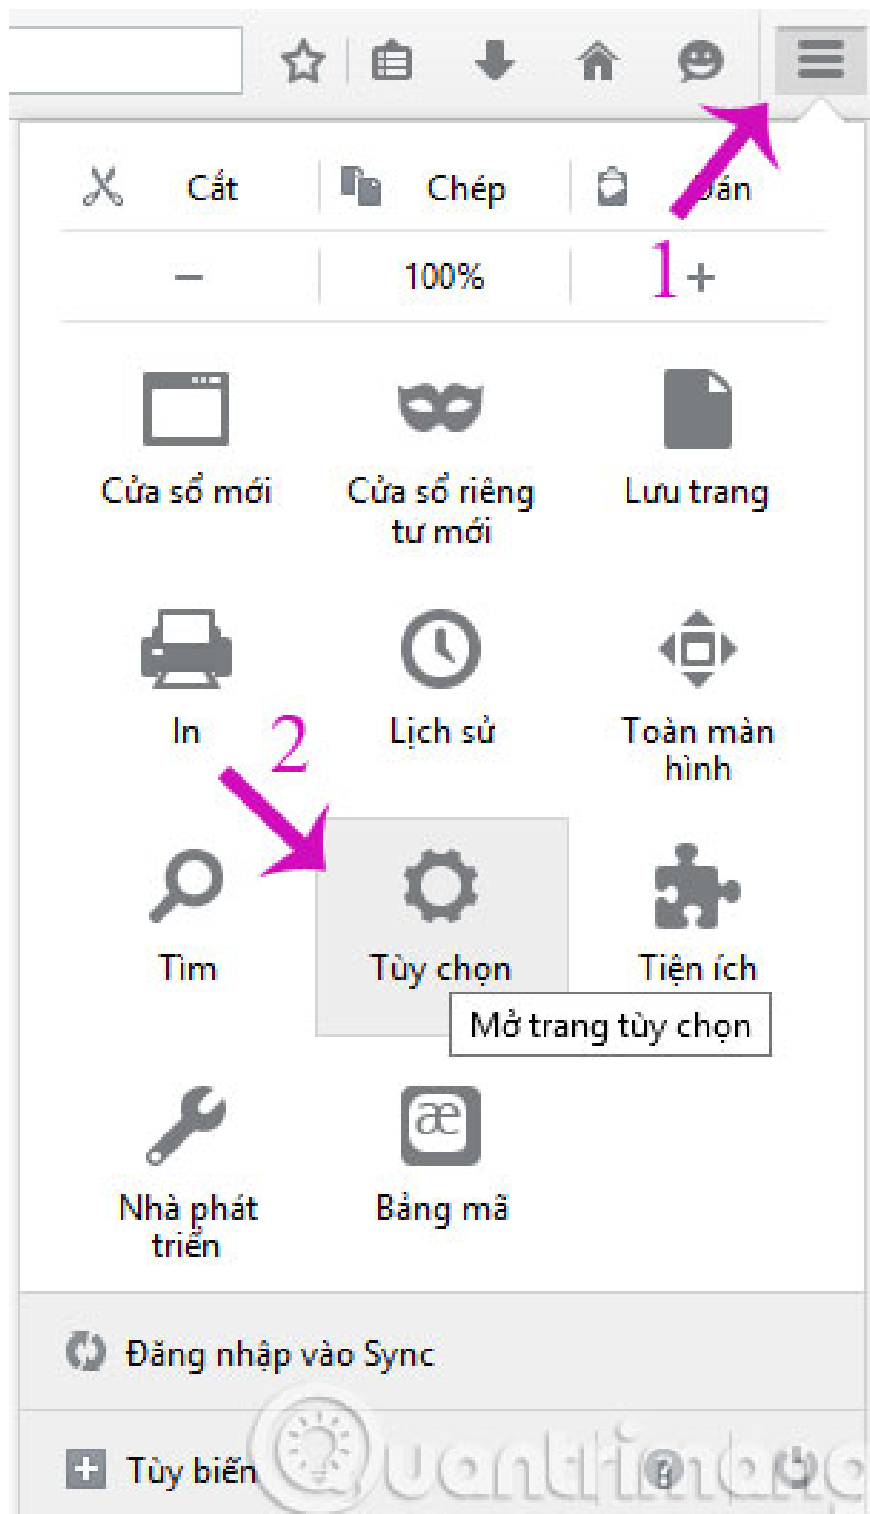

After confirming, the password you need will appear in the square as shown below.

Show password on Firefox browser

1. Download Firefox 42

Step 1 : Open the Firefox browser, click on the **3 dashes** in the upper right corner, select **Options**

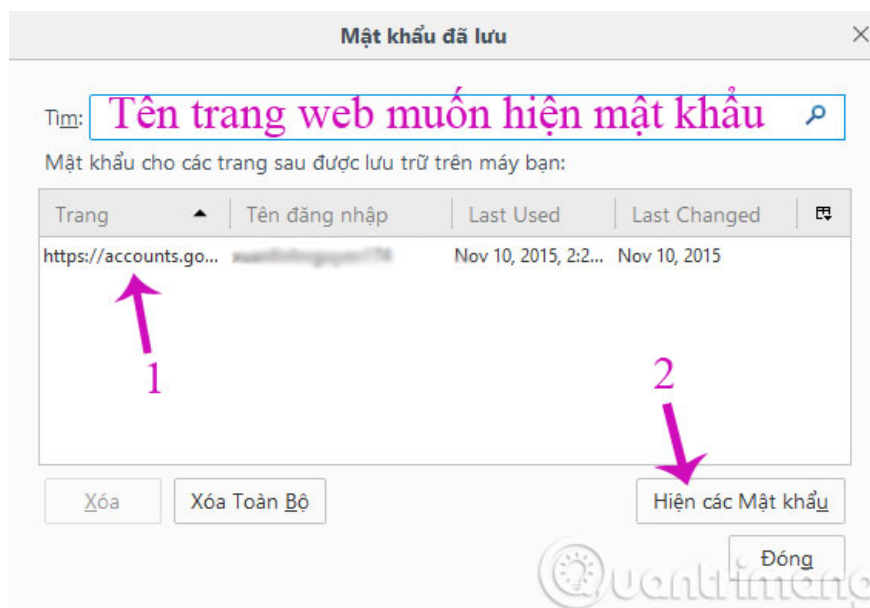

Step 2 : In the **Options** window, select **the Security** tab. Look at the bottom, click on **Saved Password** .

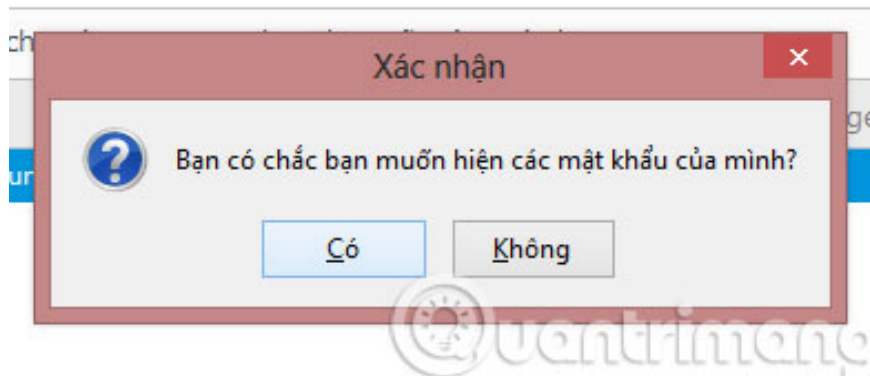

Step 3 : Here, the **saved Password** dialog box includes the pages that users have accessed during a certain period of time. You can see here only 2 columns: Page and Username. That is the page you have visited with the corresponding username. Do the following:

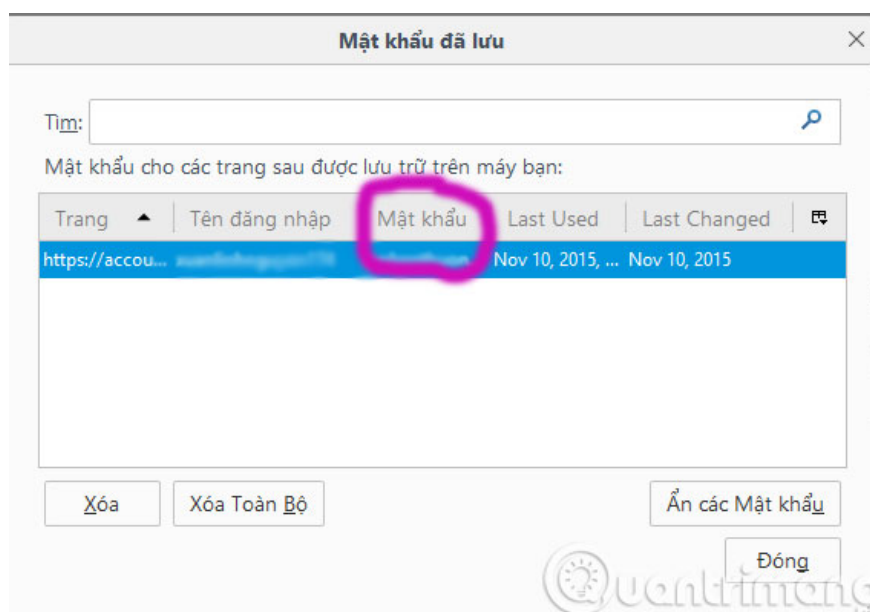

1. View and find in the list table or want faster, directly type in the Search address box of the website to retrieve the password.
2. Click on the line containing the web page you want to use (after it is selected, the line will be green as shown below), and click **Show passwords** .

Click **Yes** to confirm that you want to make your password appear.

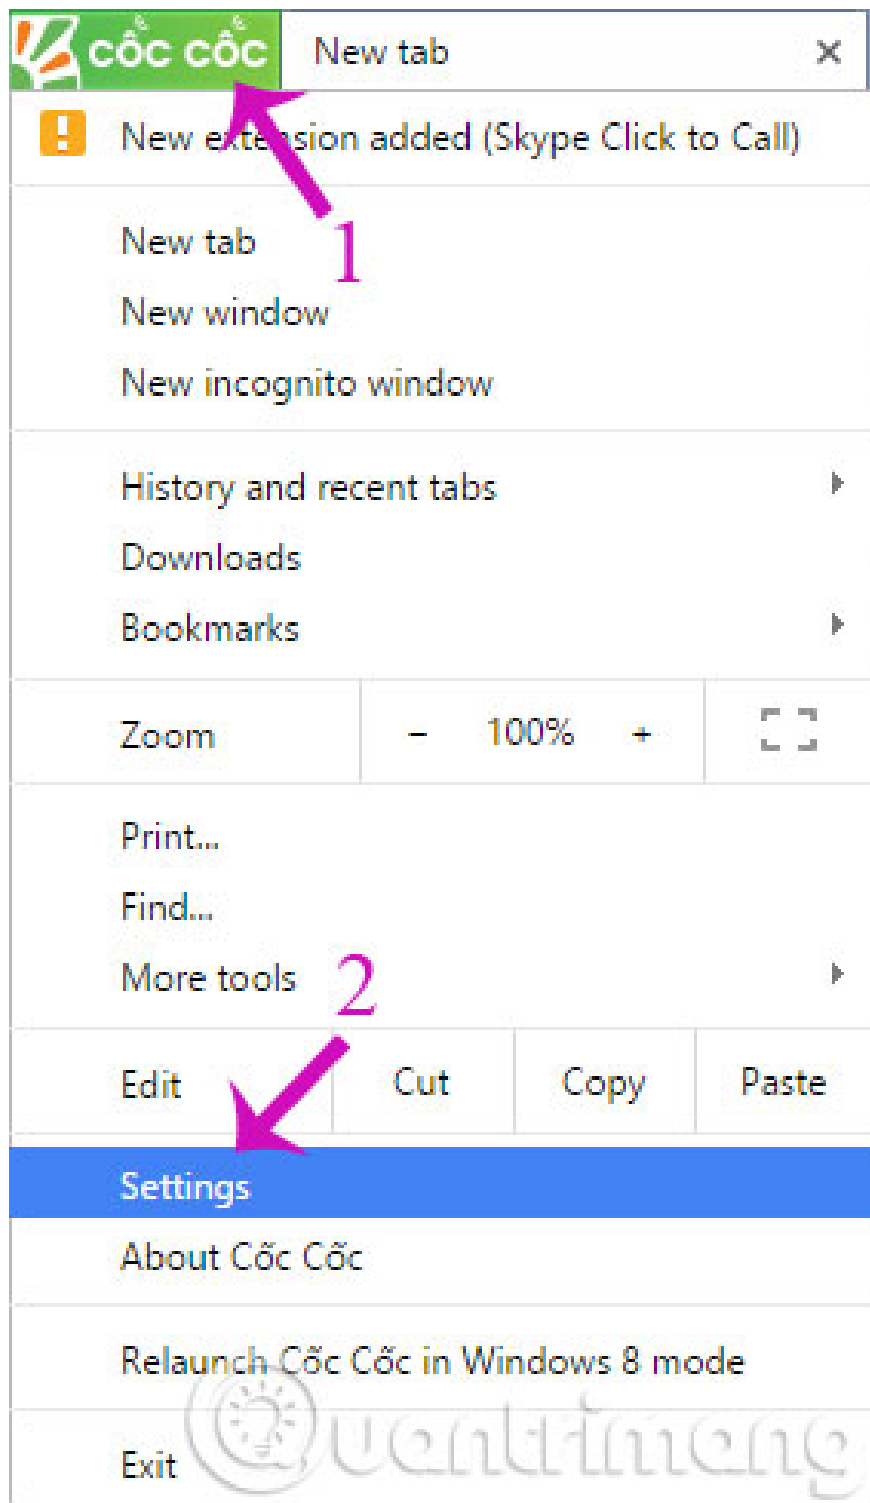

Step 4 : At this time, in the **saved Password** table, another column will appear, which is the **Password** column you need.

Display password in Coc Coc browser

1. Download Coc Coc 51

Step 1 : Open your Coc Coc browser, click on the **green Coc Coc** and then select **Settings**

Step 2 : The **Settings** interface appears, scroll down to the bottom and select **Show advanced settings** .

People

Here will list the passwords that have been saved in the **Saved passwords** box and list the sites you set up and never save the password in the **Never saved** frame.

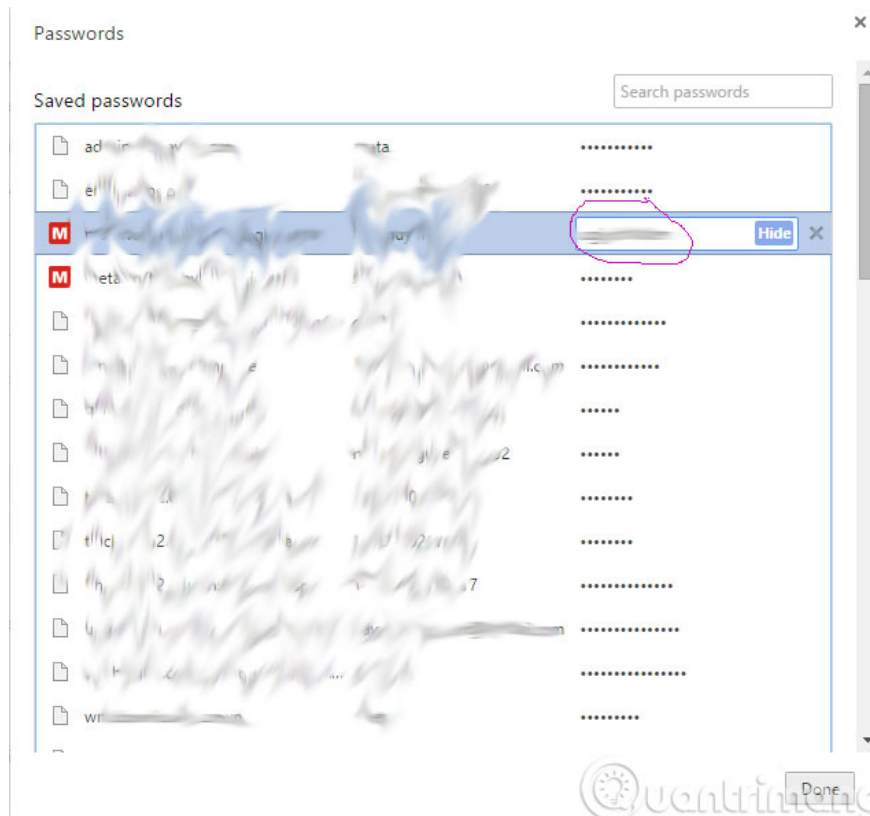

Step 4 : Click on the line you want to see, the **Show** button will appear , click this button to view the password or click on the X to delete the saved password (as shown).

If the computer has a password set up, a window will appear asking for the following password:

Step 5 : The password you need is displayed, if you want to hide the password, click the **Hide** button.

With the above instructions, I hope you know how to retrieve the password for the websites you need. However, to avoid trouble, we recommend that you **DO NOT SHOULD SAVE THE PASSWORD** when using public computers.

1. How to create bookmarks on web browsers
2. How to set the default browser when opening any link on the computer
3. Clear Cache and Cookies on web browser

Good luck!
