

DMR class weapon details in PUBG Mobile

Designated Marksman Rifle is a powerful gun class in PUBG Mobile. This gun will be used appropriately to move.

Among the weapons of PUBG Mobile, Designated Marksman Rifle is a weapon of choice. This line of weapons has the ability to shoot at a very good distance, acceleration of large bullets and often used to destroy moving objects.

Although the recoil of the DMR gun is relatively high, the damage is extremely large. Also find out details about the types of guns in the DMR class in PUBG Mobile.

The weapons in the DMR PUBG Mobile class

1. Mini 14

Mini14 is a light gun type found on the Erangel and Miramar maps. The gun uses 5.56mm ammunition, has the lowest damage of weapons but the bullet speed is very fast, up to 990m / s. When combined with high bullet speed and low ballistic drop, players can accurately shoot moving targets.

However, Mini 14 can only affect about 90m radius. If you shoot further than this radius, the gun's damage will be significantly reduced.

2. SKS password

SKS is hunted by gamers because of its high damage power, which can control the recoil. SKS can fully equip accessories, gun damage index is about 53 units, bullet speed is 800m / s. Compared to Mini 14, the SKS's drop is quite high, so it is not accurate to shoot with moving targets. One point that the gunmen should pay attention to is that the amount of bullets on the SKS's ice is low, so the firing skill is needed to avoid wasting bullets.

3. SLR

SLR will have a relatively large recoil, high bullet speed. SLR can not equip the handle so players need to be careful when shooting, due to the large recoil. Gun damage is 58 units higher than SKS. If the player has a good technique to control the recoil of a gun, it will quickly reduce the target.

4. MK14 EBR

MK14 is found to be much in the hearing, with a relatively high recoil. The strength of MK14 is the ability to operate effectively at near and far distances, because of combining 2 Semi and Auto modes at the same time. The gun's damage power is up to 61 units, the bullet speed is 853m / s, so users can be assured of the accuracy of the gun when lowering the moving target. The maximum damage distance of MK14 is 120m and gradually decreases to 488m.

5. QBU password

QBU is a new name and appears in the updated Sanhok map. QBU can rush is another version of Mini 14, which can compensate for each other's damage and bullet speed. With a standstill when lying on the attack, QBU will reduce the recoil considerably. Gun silencer reduces noise when ambushing opponents. These are all default gun accessories that players don't need to equip.

In general, the weapons in PUBG Mobile's DMR class have great damage, capable of destroying targets that are far away or moving. Some guns are also equipped with accessories to increase the power of guns when attacking.
