

Do you know how to peel off decal on cars?

Probably, among us, more or less thought that peeling a piece of decal on the car is a simple and quick job. But many people have encountered cases such as scratches, glue, glue sticking on the body, or have to work all hours to peel one piece of Decal out of the paint surface of the car.

In the near time, cheering for Vietnam's U23 football team to enter the Asian finals with Uzbekistan team, many vehicle owners decided to stick decal on their cars with images of national team and flags to express their gratitude. His fans with the team. After yesterday night, January 28 when the players returned home, many people also considered leaving the decal on the car. To remove this decal layer, then choosing to go to the car repair center or shop will be the fastest and safest option for everyone. However, with just a few simple steps and familiar items you can also remove the decal layer at home. Note: when removing the decal at home, you need to do it carefully, in order to avoid being scratched, losing the aesthetics of the car.

Method 1: Perform decal removal at home, with items after soapy water (warm), plastic knives, rags, high knives, sponge, asphalt remover, window cleaner.

In order to make the peeling process easiest, you should first clean it so you can remove it from the car. Accordingly, use soapy water to clean the decal and surrounding areas. The sponge should be used to remove dirt, and this may help soften the decal. Note, with decal stickers in the car window, you should not use soapy water but use specialized detergents.

After cleaning the decal, use a dry cloth to wipe off the amount of water sticking on the decal stickers to make the car dry. Next spray a sufficient amount of asphalt remover on the decal and wait for 5 minutes. Slowly remove the decal angles gently with a knife. Please pay attention when peeling off the decal on the window.

Only remove the decal when you see that the decal angle is sufficiently fast that you can gently pull the scissors. The process of peeling off the decal needs to be done slowly, carefully, avoid hurry because it can stain the sticky plastic of the decal on the car, causing aesthetic loss. In addition, during the process of removing the decal, you need to continuously spray the asphalt remover.

And after the decal has been completely removed from the car, you can use sponge and soapy water to completely clean the remaining dirt on the car.

Method 2: Remove the decal on the car with hair dryer and plastic card. To do this, you need to prepare the following materials: cleaning rags, hair dryers, plastic cards, razors, surface cleaners, window cleaners. With how to remove decal by hair dryer and plastic card do the same as above to clean the decal.

Finally, use a hair dryer (or hot water) in hot mode and place it a few inches away from the decal on the car.

After about 30 seconds, the adhesive on the bottom of the decal will start to peel off. Now you use a plastic or razor card to gently relieve an angle of the decal to make it easier to remove them from the car.

Remove the decal pieces from the car. During the peeling process you can use a hair dryer to be able to perform more efficiently and quickly. Finally, after the decal layer is peeled off the car, use detergent and rags to clean the same way.

Above are 2 ways to remove simple decal at home that we have introduced to you. In addition, you can also buy in the market the specialized chemicals to use decal remover paste on the car for only a few tens of thousands of dong. Or you can take advantage of chemicals like RP-7, degreasing water, .

I wish you all success!
