

## Do you see where the panther is the most sought-after community in the photo?

Do you see where the panther is the most sought-after community in the photo? Please observe us!

1. Funny test: Are you an extrovert or introvert?
2. If you can find a difference in 10 seconds, you're really a genius!
3. We bet 99% you can't find all the animals 'hiding' in the collection below!

Animals are one of the masters of camouflage and hiding, snow leopard is no exception.

In a documentary of photographer **Inger Vandyke**, when he was wearing a beautiful coat, the snow leopard in the picture completely blended with the surrounding grass to deceive the bad prey. **Do you see where the panther is the most sought-after community in the photo?**

On a 17-day expedition in Ladakh, India, a few years ago, the photographer, **Inger Vandyke**, unknowingly saw the leopard's movements hiding in a grass bush to prepare to hunt. The photograph of this photographer was quickly shared and everyone together searched for the main character in the photo. Below is a higher resolution photo provided, can you find this notice?

You still can't discover predators? That's a blessing when you're not one of those sheep. By possessing the ability to run faster, under normal conditions, the sheep can easily escape the pursuit of predators. This makes the predators like the snow leopard in the picture "hide" and wait for a favorable opportunity.

**This is where the snow leopard is hiding. Please click to enlarge the image:**
