

Does Google confirm that Mate 30 may not install Google applications and services, an end to Huawei in the international market?

Recently, Google representatives have officially confirmed that Huawei Mate 30 and Mate 30 Pro (likely to launch in September) will not be installed with Google applications and services.

Recently, Google representatives have officially confirmed that Huawei Mate 30 and Mate 30 Pro (likely to launch in September) will not be installed with Google applications and services. This will put Huawei Mate 30 at serious disadvantage, reducing its competitiveness compared to other competitors in the international market.

Recently, the Commerce Department has extended the ban for another three months to Huawei, allowing it to continue buying goods from the US to provide services and support for existing Huawei handsets. eyes during and before May 16, 2019.

According to a Google representative, the Mate 30 and its upcoming devices, including the delayed Mate X, will not have access to Google apps and services because they are not in the extended category. .

For the Android operating system, Google applications and services, including the Google Play Store - are considered a crucial component. Last year, Google was fined \$ 5 billion by the European Union EU for leveraging access to the Play Store as leverage forcing Android device manufacturers to install the Google

search bar by default on their devices.

So far, Amazon's low-cost Fire tablets are the only successful Android device without Google services. But the Mate 30 can't be applied that way because it's a flagship device created to compete with other devices like the Galaxy Note 10+, Pixel 4 and OnePlus 7 Pro.

1. Huawei officially launched its own Harmony OS, ready to quit Android
